The Palgrave Handbook of Global Citizenship and Education Ian Davies, Li-Ching Ho, Dina Kiwan, Carla L. Peck, Andrew

Peterson, Edda Sant, Yusef Waghid, 2018-01-11 This Handbook is a much needed international reference work written by leading writers in the field of global citizenship and education. It is based on the most recent research and practice from across the world with the Geographically Based Overviews section providing summaries of global citizenship and education provided for Southern Africa, Australasia, Europe, the Middle East, North America, Latin America and East and South East Asia. The Handbook discusses in the Key Ideologies section the philosophies that influence the meaning of global citizenship and education including neo liberalism and global capitalism, nationalism and internationalism and issues of post colonialism, indigeneity and transnationalism. Next the Key Concepts section explores the ideas that underpin debates about global citizenship and education with particular attention paid to issues of justice, equity, diversity, identity and sustainable development. With these key concepts in place the Principal Perspectives and Contexts section turns to exploring global citizenship and education from a wide variety of viewpoints including economic, political, cultural, moral, environmental, spiritual and religious as well as taking into consideration issues of ethnicity, gender and sexuality and social class. Finally the Key Issues in the Teaching of Global Citizenship section discusses how education can be provided through school subjects and study abroad programmes as well as through other means including social media and online assessment and political activism. This Handbook will be vital reading for academics, postgraduates and advanced undergraduates in the fields of sociology and education particularly those with an interest in comparative studies. *From Foreign Language Education to Education for Intercultural Citizenship* Michael Byram, 2008-05-27 This collection of essays and reflections starts from an analysis of the purposes of foreign language teaching and argues that this should include educational objectives which are ultimately similar to those of education for citizenship. It does so by a journey through reflections on what is possible and desirable in the classroom and how language teaching has a specific role in education systems which have long had and often still have the purpose of encouraging young people to identify with the nation state. Foreign language education can break through this framework to introduce a critical internationalism. In a globalised and internationalised world the importance of identification with people beyond the national borders is crucial. Combined with education for citizenship, foreign language education can offer an education for intercultural citizenship.
