Congress. Senate. Committee on Immigration, 1933 Citizenship and Citizenship Education in a Changing World Orit Ichilov, 2013-12-19 Political economic technological and cultural changes have taken place all over the globe changes which have transformed the meanings of citizenship and citizenship education This volume represents an effort to analyze the implications of these changes 1990 *Census of Population and Housing: Birthplace, citizenship, year of entry, and language*, 1990 **Citizenship** Diana L. Reische, American Association of School Administrators, 1987 The central question of this book is how can schools that are already overloaded with assignments from society find the time and techniques to produce effective citizens Six chapters examine this problem Chapter 1 documents the need for civic education and the problems related to providing an effective civic education Chapter 2 explores the many different interpretations of citizenship education and determines that it stems from all educational experiences A discussion of the different content areas and approaches associated with citizenship education is presented in chapter 3 State mandates and the place of citizenship education in the elementary junior high and high school curricula are outlined in chapter 4 Methods of providing hands on experience to students through youth participation programs are outlined in chapter 5 The concluding chapter discusses ways to use the bicentennial celebration to revitalize citizenship education A five page list of references is provided and the book concludes with 21 recommendations for strengthening civic education SM **Influences of the IEA Civic and Citizenship Education Studies** Barbara Malak-Minkiewicz, Judith Torney-Purta, 2021-05-26 This open access book identifies the multiple ways that IEA s studies of civic and citizenship education have contributed to national and international educational discourse research policymaking and practice The IEA International Civic and Citizenship Education Study ICCS first conducted in 2009 was followed by a second cycle in 2016 The project was linked to the earlier IEA Civic Education Study CIVED 1999 2000 IEA s ICCS remains the only large scale international study dedicated to formal and informal civic and citizenship education in school It continues

Abdi, 2013-02-11 In rapidly globalizing spaces of life any research project on international education would necessarily have multi directional emphases with the quality of observations and analyses reflecting the expanding political economic and cultural intersections which characterize this potentially promising century To respond to these emerging learning and living contexts of our world this book brings together some of the most active and established scholars in the field As such the book represents important epistemic interventions that analyze and critique the institutional socio economic linguistic and pedagogical platforms of international education As the locus of international education cannot be detached from the pragmatics of social development the specific recommendations embedded in this book expand the debates and broaden the boundaries of learning projects that should enhance the lives of people especially those who are continually marginalized by the regimes of globalization Thus the book actively advocates for possibilities of human well beings via different formats of education in diverse locations of life *Critical Perspectives on International Education* offers a historically

comprehensive intellectually honest and perspective rich scholarly exploration of a new education globalization dynamic This book courageously offers up diverse voices gathered into a robust and useful conversation regarding global education This book adds greatly to understanding why educational marketplaces must be driven by principles and practices that empower diverse peoples to secure sustainable knowledge benefits that contribute to personal local national and international well being This critical perspective reader will engage scholars researchers and citizens Jim Paul University of Calgary In the current intensifications of globalization and its resulting inequalities it is crucial to better understand the role of knowledge creation and knowledge dissemination Should knowledge be only a commodity to be sold in the market and a tool to increase economic capital or should it be a shared sociocultural capital aimed at improving democracy and the common good In **Critical Perspectives on International Education** Yvonne H bert and Ali A Abdi assemble an impressive array of contributions from all over the world that address this question from a variety of critical perspectives and case studies I recommend this book to everyone interested in the connections between education citizenship development and human well being Daniel Schugurensky Arizona State University **International Handbook of Interpretation in Educational Research** Paul Smeyers,David Bridges,Nicholas C. Burbules,Morwenna Griffiths,2015-01-06 This handbook focuses on the often neglected dimension of interpretation in educational research It argues that all educational research is in some sense interpretive and that understanding this issue belies some usual dualisms of thought and practice such as the sharp dichotomy between qualitative and quantitative research Interpretation extends from the very framing of the research task through the sources which constitute the data the process of their recording representation and analysis to the way in which the research is finally or provisionally presented The thesis of the handbook is that interpretation cuts across the fields both philosophically organizationally and methodologically By covering a comprehensive range of research approaches and methodologies the handbook gives early career researchers what they need to know in order to decide what particular methods can offer for various educational research contexts fields An extensive overview includes concrete examples of different kinds of research not limited for example to teaching and learning examples as present in the Anglo Saxon tradition but including as well what in the German Continental tradition is labelled p dagogisch examples from child rearing and other contexts of non formal education with full description and explanation of why these were chosen in particular circumstances and reflection on the wisdom or otherwise of the choice combined in each case with consideration of the role of interpretation in the process The handbook includes examples of a large number of methods traditionally classified as qualitative interpretive and quantitative used across the area of the study of education Examples are drawn from across the globe thus exemplifying the different opportunities and constraints that educational research has to confront in different societies **Constructing Modern Asian Citizenship** Edward Vickers,Krishna Kumar,2014-12-05 In many non Western contexts modernization has tended to be equated with Westernization and hence with an abandonment of authentic indigenous identities and values This is evident

in the recent history of many Asian societies where efforts to modernize spurred on by the spectre of foreign domination have often been accompanied by determined attempts to stamp national variants of modernity with the brand of local authenticity Asian values Chinese characteristics a Japanese cultural essence and so forth Highlighting or exaggerating associations between the more unsettling consequences of modernization and alien influence has thus formed part of a strategy whereby elites in many Asian societies have sought to construct new forms of legitimacy for old patterns of dominance over the masses The apparatus of modern systems of mass education often inherited from colonial rulers has been just one instrument in such campaigns of state legitimation This book presents analyses of a range of contemporary projects of citizenship formation across Asia in order to identify those issues and concerns most central to Asian debates over the construction of modern identities Its main focus is on schooling but also examines other vehicles for citizenship formation such as museums and the internet the role of religion in particular Islam in debates over citizenship and identity in certain Asian societies and the relationship between state centred identity discourses and the experience of increasingly globalized elites With chapters from an international team of contributors this interdisciplinary volume will appeal to students and scholars of Asian culture and society Asian education comparative education and citizenship

Negotiating the Boundaries of Belonging Nils Witte,2017-09-27 Nils Witte explores Turkish migrants destigmatization strategies and investigates their legal and symbolic motives for naturalisation Using mixed methods and unique data the author shows that Turkish migrants inclination to naturalise would be stronger if they were allowed to retain their former citizenship and if they were recognized as symbolic members of German society Minority members enjoy expansive rights as permanent residents and many are entitled to hold German citizenship However they often experience symbolic exclusion making symbolic membership a rare motive for naturalisation

Urban Education

Karen Symms Gallagher,Rodney Goodyear,Dominic Brewer,Robert Rueda,2013-03-19 Many factors complicate the education of urban students Among them have been issues related to population density racial ethnic cultural and linguistic diversity poverty racism individual and institutional and funding levels Although urban educators have been addressing these issues for decades placing them under the umbrella of urban education and treating them as a specific area of practice and inquiry is relatively recent Despite the wide adoption of the term a consensus about its meaning exists at only the broadest of levels In short urban education remains an ill defined concept This comprehensive volume addresses this definitional challenge and provides a 3 part conceptual model in which the achievement of equity for all regardless of race gender or ethnicity is an ideal that is central to urban education The model also posits that effective urban education requires attention to the three central issues that confronts all education systems a accountability of individuals and the institutions in which they work b leadership which occurs in multiple ways and at multiple levels and c learning which is the raison d tre of education Just as a three legged stool would fall if any one leg were weak or missing each of these areas is essential to effective urban education
