City Building On The Eastern Frontier:

City Building on the Eastern Frontier Diane Shaw, 2020-03-03 America's westward expansion involved more than pushing the frontier across the Mississippi toward the Pacific; it also consisted of urbanizing undeveloped regions of the colonial states. In 1810 New York's future governor DeWitt Clinton marveled that the rage for erecting villages is a perfect mania. The development of Rochester and Syracuse illuminates the national experience of internal economic and cultural colonization during the first half of the nineteenth century. Architectural historian Diane Shaw examines the ways in which these new cities were shaped by a variety of constituents: founders, merchants, politicians, and settlers, as opportunities to extend the commercial and social benefits of the market economy and a merchant culture to America's interior. At the same time, she analyzes how these priorities resulted in a new approach to urban planning. According to Shaw, city founders and residents deliberately arranged urban space into three segmented districts: commercial, industrial, and civic, to promote a self-fulfilling vision of a profitable and urbane city. Shaw uncovers a distinctly new model of urbanization that challenges previous paradigms of the physical and social construction of nineteenth-century cities. Within two generations, the new cities of Rochester and Syracuse were sorted at multiple scales, including not only the functional definition of districts but also the refinement of building types and styles, the stratification of building interiors by floor, and even the coding of public space by class, gender, and race. Shaw's groundbreaking model of early nineteenth-century urban design and spatial culture is a major contribution to the interdisciplinary study of the American city.

City Building on the Eastern Frontier Diane Shaw,

The Urban Department Store in America, 1850-1930 Dr. Louisa Iarocci, 2014-12-28 In the late nineteenth century, the urban department store arose as a built artifact and as a social institution in the United States. While the physical building type is the foundation of this comprehensive architectural study, Iarocci reaches beyond the analysis of the brick and mortar to reconsider how the spaces of selling were culturally produced spaces as well as the product of interrelated economic, social, technological, and aesthetic forces.

The Evolution of American Urban Society Howard P. Chudacoff, Judith Smith, Peter Baldwin, 2016-05-23 This interesting and informative book shows how different groups of urban residents with different social, economic, and political power cope with the urban environment, struggle to make a living, participate in communal institutions, and influence the direction of cities and urban life. An absorbing book, *The Evolution of American Urban Society* surveys the dynamics of American urbanization from the sixteenth century to the present, skillfully blending historical perspectives on society, economics, politics, and policy, and focusing on the ways in which diverse peoples have inhabited and interacted in cities. Key topics: Broad coverage includes the Colonial Age, commercialization, and urban expansion; life in the walking city; industrialization; newcomers; city politics; the social and physical environment; the 1920s and 1930s; the growth of suburbanization; and the future of modern cities. Market: An interesting and necessary read for anyone involved in urban

sociology including urban planners city managers and those in the urban political arena **The Making of the American Landscape** Michael P. Larkham, Michael P. Conzen, 2014-06-27 People have designed cities long before there were urban designers In Shapers of Urban Form Peter Larkham and Michael Conzen have commissioned new scholarship on the forces people and institutions that have shaped cities from the Middle Ages to the present day Larkham and Conzen collect new essays in urban morphology the people centered predecessor to contemporary theories of top down urban design Shapers of Urban Form focuses on the social processes that create patterns of urban forms in four discrete periods Pre modern early modern industrial era and postmodern development Featuring studies of English American Western and Eastern European and New Zealand urban history and urban form this collection is invaluable to scholars of urban design and town planning as well as urban and economic historians *How America Became Capitalist* James Parisot, 2019-02-20 Has America always been capitalist Today the US sees itself as the heartland of the international capitalist system its society and politics intertwined deeply with its economic system This book looks at the history of North America from the founding of the colonies to debunk the myth that America is naturally capitalist From the first white settler colonies capitalist economic elements were apparent but far from dominant and did not drive the early colonial advance into the West Society too was far from homogeneous as the role of the state fluctuated Racial identities took time to imprint and slavery whilst at the heart of American imperialism took both capitalist and less capitalist forms Additionally gender categories and relations were highly complex as standards of manhood and womanhood shifted over time to accommodate capitalism and as there were always some people challenging this binary By looking at this fascinating and complex picture James Parisot weaves a groundbreaking historical materialist perspective on the history of American expansion **Seven Generations of Iroquois Leadership** Laurence M. Hauptman, 2022-12-12 In Seven Generations of Iroquois Leadership Laurence M Hauptman traces the past 200 years of the Six Nations history through the lens of the remarkable leaders who

shaped it Focusing on the distinct qualities of Iroquois leadership Hauptman reveals how the Six Nations have survived in the face of overwhelming pressure Celebrated figures such as Governor Blacksnake Cornelius Cusick and Deskaheh are juxtaposed with less well known but nonetheless influential champions of Iroquoian culture and sovereignty such as Dinah John Hauptman s survey includes over thirty contemporary women highlighting the important role female leaders have played in Iroquois survival throughout history to the present day The book offers historical and contemporary portraits of leaders from all six Iroquois nations and all regions of modern day Iroquoia **Untimely Ruins** Nick Yablon,2010-06-15

American ruins have become increasingly prominent whether in discussions of urban blight and home foreclosures in commemorations of 9 11 or in postapocalyptic movies In this highly original book Nick Yablon argues that the association between American cities and ruins dates back to a much earlier period in the nation s history Recovering numerous scenes of urban desolation from failed banks abandoned towns and dilapidated tenements to the crumbling skyscrapers and bridges envisioned in science fiction and cartoons Untimely Ruins challenges the myth that ruins were absent or insignificant objects in nineteenth century America The first book to document an American cult of the ruin Untimely Ruins traces its deviations as well as derivations from European conventions Unlike classical and Gothic ruins which decayed gracefully over centuries and inspired philosophical meditations about the fate of civilizations America s ruins were often untimely appearing unpredictably and disappearing before they could accrue an aura of age As modern ruins of steel and iron they stimulated critical reflections about contemporary cities and the unfamiliar kinds of experience they enabled Unearthing evocative sources everywhere from the archives of amateur photographers to the contents of time capsules Untimely Ruins exposes crucial debates about the economic technological and cultural transformations known as urban modernity The result is a fascinating cultural history that uncovers fresh perspectives on the American city **Before Renaissance** John F.

Bauman,Edward K. Muller,2006-10-29 Before Renaissance examines a half century epoch during which planners public officials and civic leaders engaged in a dialogue about the meaning of planning and its application for improving life in Pittsburgh Planning emerged from the concerns of progressive reformers and businessmen over the social and physical problems of the city In the Steel City enlightened planners such as Frederick Law Olmsted Jr and Frederick Bigger pioneered the practical approach to reordering the chaotic urban industrial landscape In the face of obstacles that included the embedded tradition of privatism rugged topography inherited built environment and chronic political fragmentation they established a tradition of modern planning in Pittsburgh Over the years a melange of other distinguished local and national figures joined in the planning dialogue among them the park founder Edward Bigelow political bosses Christopher Magee and William Flinn mayors George Guthrie and William Magee industrialists Andrew Carnegie and Howard Heinz financier Richard King Mellon and planning luminaries Charles Mulford Robinson Frederick Law Olmsted Jr Harland Bartholomew Robert Moses and Pittsburgh s Frederick Bigger The famed alliance of Richard King Mellon and Mayor David Lawrence

which heralded the Renaissance owed a great debt to Pittsburgh's prior planning experience John Bauman and Edward Muller recount the city's long tradition of public private partnerships as an important factor in the pursuit of orderly and stable urban growth Before Renaissance provides insights into the major themes benchmarks successes and limitations that marked the formative days of urban planning It defines Pittsburgh's key role in the vanguard of the national movement and reveals the individuals and processes that impacted the physical shape and form of a city for generations to come **Spolia in Fortifications and the Common Builder in Late Antiquity** Jon M. Frey, 2015-11-24 Through intensive surveys of three fortifications in late Roman Greece Frey reveals the untapped potential of spolia in demonstrating the critical role played by non elites in bringing about the architectural and social changes that mark the end of classical antiquity As his analysis demonstrates when studied less as displaced objects to be classified by type and more as evidence for the construction process itself spolia offer a unique opportunity to examine the ways in which common builders met the challenge of using pre existing building materials to meet their contemporary architectural needs This bottom up approach offers an alternative to the traditional view that attributes change and innovation only to the genius of prominent individuals known to us in historical sources **City Walls in Late Antiquity** Emanuele Intagliata, Simon J. Barker, Christopher Courault, 2020-06-30 The construction of urban defences was one of the hallmarks of the late Roman and late antique periods 300 600 AD throughout the western and eastern empire City walls were the most significant construction projects of their time and they redefined the urban landscape Their appearance and monumental scale as well as the cost of labour and material are easily comparable to projects from the High Empire however urban circuits provided late antique towns with a new means of self representation While their final appearance and construction techniques varied greatly the cost involved and the dramatic impact that such projects had on the urban topography of late antique cities mark city walls as one of the most important urban initiatives of the period To date research on city walls in the two halves of the empire has highlighted chronological and regional variations enabling scholars to rethink how and why urban circuits were built and functioned in Late Antiquity Although these developments have made a significant contribution to the understanding of late antique city walls studies are often concerned with one single monument small group of monuments or a particular region and the issues raised do not usually lead to a broader perspective creating an artificial divide between east and west It is this broader understanding that this book seeks to provide The volume and its contributions arise from a conference held at the British School at Rome and the Swedish Institute of Classical Studies in Rome on June 20 21 2018 It includes articles from world leading experts in late antique history and archaeology and is based around important themes that emerged at the conference such as construction spolia use late antique architecture culture and urbanism empire wide changes in Late Antiquity and the perception of this practice by local inhabitants *Book Review Index - 2009 Cumulation* Dana Ferguson, 2009-08 Book Review Index provides quick access to reviews of books periodicals books on tape and electronic media representing a wide range of popular

academic and professional interests The up to date coverage wide scope and inclusion of citations for both newly published and older materials make Book Review Index an exceptionally useful reference tool More than 600 publications are indexed including journals and national general interest publications and newspapers Book Review Index is available in a three issue subscription covering the current year or as an annual cumulation covering the past year **"The Urban Department**

Store in America, 1850-1930 " Louisa Iarocci, 2017-07-05 In the late nineteenth century the urban department store arose as a built artifact and as a social institution in the United States While the physical building type is the foundation of this comprehensive architectural study Louisa Iarocci reaches beyond the analysis of the bricks and mortar to reconsider how the spaces of selling were culturally produced spaces as well as the product of interrelated economic social technological and aesthetic forces The agenda of the book is three fold to address the lack of a comprehensive architectural study of the nineteenth century department store in the United States to expand the analysis of the commercial city as a built and represented entity and to continue recent scholarly efforts that seek to understand commercial space as a historically specific and a conceptually perceived construct The Urban Department Store in America 1850 1930 acts as a corrective to a current imbalance in the historiography of this retailing institution that tends to privilege its role as an autonomous modern building type Instead Iarocci documents the development of the department store as an urban institution that grew out of the built space of the city and the lived spaces of its occupants **The Edinburgh Review ,1879 The Edinburgh Review, Or Critical Journal ,1879**
