## City Close Up:

World Cities, City Worlds William Solesbury, 2018-12-17 When living and working in cities we need to make sense of them in order to get by We must delve below their surface to understand what makes them tick and how we can best engage with them This book argues that three tropes can help us namely metaphors icons and perspectives Metaphorically we can see the city as a community a battleground a marketplace a machine or an organism Some cities are iconic they present us with characteristics that are more generally true of cities and city life such as Venice Mumbai New York Tokyo Paris and Los Angeles Cities can also be viewed from different perspectives those of artists analysts rulers and citizens This book explores these ways of understanding cities drawing on rich accounts of cities across the world and through time *Racial Exclusionism and the City* Christopher T. Husbands, 2013-03-07 First published in 1983 this book reports on the results of a survey in thirteen areas of England where the National Front NF had previously gained significant levels of electoral support and examines the social and political histories of these areas to reveal not only who and was voting for the NF in the 1970s but also why **Accounts and Papers** Great Britain. Parliament. House of Lords, 1843 Mall City Stefan Al, 2016-07-01 Hong Kong is the twenty first century paradigmatic capital of consumerism Of all places it has the densest and tallest concentration of malls reaching tens of stories Hong Kong s malls are also the most visited sandwiched between subways and skyscrapers These mall complexes have become cities in and of themselves accommodating tens of thousands of people who live work and play within a single structure Mall City features Hong Kong as a unique rendering of an advanced consumer society Retail space has come a long way since the nineteenth century covered passages of Paris which once awed the bourgeoisie with glass roofs and gaslights It has morphed from the arcade to the department store and from the mall into the mall city where expresscalators crisscross mesmerizing atriums Highlighting the effects of this development in Hong Kong this book raises questions about architecture city planning culture and urban life At the nexus of density humidity topography and prosperity Hong Kong has spawned more malls per square mile than any place on earth This fantastic book decodes and graphically depicts an environment both apart and ubiquitous a convulsive form of public space in a liquid territory where intensely contested politics commerce and sociability weirdly merge in a city like no other Michael Sorkin distinguished professor of architecture of the City University of New York Hong Kong may be packed with the most shopping malls per square kilometer in the world but Mall City is packed with the most drawings information and fascinating mall facts The book dissects categorizes and displays all kinds of intriguing data on the city state s shopping complexes and culture Its richly layered analysis perfectly matches Hong Kong s multi story machines for consumption Clifford Pearson director of USC American Academy in China Stefan Al has again produced a book that provides a sharp lens on radically new urban forms that are emerging in China While his previous books Villages in the City and Factory Towns of South China introduced the site of production and housing for the migrant labor of the Pearl River Delta here we enter the phantasmagoria of the

enormous interconnected free trade shopping zone of the Hong Kong Special Administrative Region Mall City dissects the basic unit of this climate controlled consumer landscape the mall This beautifully illustrated book is a must read for those who wish to understand the future of public space in high density cities Brian McGrath professor of urban design and dean of constructed environments Parsons School of Design Seeing Cities Change Jerome Krase, 2016-04-01 Cities have always been dynamic social environments for visual and otherwise symbolic competition between the groups who live and work within them In contemporary urban areas all sorts of diversity are simultaneously increased and concentrated chief amongst them in recent years being the ethnic and racial transformation produced by migration and the gentrification of once socially marginal areas of the city Seeing Cities Change demonstrates the utility of a visual approach and the study of ordinary streetscapes to document and analyze how the built environment reflects the changing cultural and class identities of neighborhood residents Discussing the manner in which these changes relate to issues of local and national identities and multiculturalism it presents studies of various cities on both sides of the Atlantic to show how global forces and the competition between urban residents in contested terrains is changing the faces of cities around the globe Blending together a variety of sources from scholarly and mass media this engaging volume focuses on the importance of seeing and in its consideration of questions of migration ethnicity diversity community identity class and culture will appeal to sociologists anthropologists and geographers with interests in visual methods and urban spaces **Tokyo** Hidenobu Jinnai, 2023-12-22 Tokyo destroyed by the earthquake of 1923 and again by the firebombing of World War II Does anything remain of the old city The internationally known Japanese architectural historian Jinnai Hidenobu set out on foot to rediscover the city of Tokyo Armed with old maps he wandered through back alleys and lanes trying to experience the city's space as it had been lived by earlier residents He found that despite an almost completely new cityscape present day inhabitants divide Tokyo's space in much the same way that their ancestors did two hundred years before Jinnai's holistic perspective is enhanced by his detailing of how natural topographical features were incorporated into the layout of the city A variety of visual documents maps from the Tokugawa and Meiji periods building floorplans woodblock prints photographs supplement his observations While an important work for architects and historians this unusual book will also attract armchair travelers and anyone interested in the symbolic uses of space A translation of Tokyo no k kan jinruigaku Tokyo destroyed by the earthquake of 1923 and again by the firebombing of World War II Does anything remain of the old city The internationally known Japanese architectural historian Jinnai Hidenobu set out on foot to rediscover the city of **Cities for People** Jan Gehl, 2013-03-05 For more than forty years Jan Gehl has helped to transform urban environments around the world based on his research into the ways people actually use or could use the spaces where they live and work In this revolutionary book Gehl presents his latest work creating or recreating cityscapes on a human scale He clearly explains the methods and tools he uses to reconfigure unworkable cityscapes into the landscapes he believes they should be cities for people Taking into account

changing demographics and changing lifestyles Gehl emphasizes four human issues that he sees as essential to successful city planning He explains how to develop cities that are Lively Safe Sustainable and Healthy Focusing on these issues leads Gehl to think of even the largest city on a very small scale For Gehl the urban landscape must be considered through the five human senses and experienced at the speed of walking rather than at the speed of riding in a car or bus or train This small scale view he argues is too frequently neglected in contemporary projects In a final chapter Gehl makes a plea for city planning on a human scale in the fast growing cities of developing countries A Toolbox presenting key principles overviews of methods and keyword lists concludes the book The book is extensively illustrated with over 700 photos and drawings of examples from Gehl's work around the globe
