City Deal Making:

Financialising City Statecraft and Infrastructure Andy Pike, Peter O'Brien, Tom Strickland, John Tomaney, 2019
Financialising City Statecraft and Infrastructure addresses the struggles of national and local states to fund finance and govern urban infrastructure. It develops fresh thinking on financialisation and city statecraft to explain the socially and spatially uneven mixing of managerial entrepreneurial and financialised city governance in austerity and limited decentralisation across England. As urban infrastructure fixes for the London global city region risk undermining national rebalancing efforts in the UK, city statecraft in the rest of the country is having uneasily to combine speculation risk taking and prospective venturing with co-ordination planning and regulation.

City Regions and Devolution in the UK David Beel, Martin Jones, Ian Rees Jones, 2022-09
Rich in case study insights, this book provides an overview of city region building and considers how governance restructuring shapes political economic social and cultural landscapes. Reviewing city regions in Britain, the authors address the tensions and opportunities for local elites and civil society actors.

Reconstructing City Politics David L. Imbroscio, 1997-02-03
Almost two decades of research in U.S. city politics has produced a compelling empirical account of the nature of urban governance revolving around the alliance of business interests and local public officials. In *Reconstructing City Politics*, author David L. Imbroscio urges that urban political economy must now move forward beyond the question of what is to a consideration of what might be. He systematically poses the possibilities for reconstructing the nature of contemporary city politics while integrating a wealth of innovative urban analysis. To bring about this reconstruction, Imbroscio explores three comprehensive alternative urban economic development strategies: entrepreneurial mercantilism, community based economic development, and municipal enterprise. He considers whether these three strategies are likely to be effective for bringing about urban economic vitality and whether it is feasible for cities to pursue these efforts in the current political economic context. By addressing these questions, Imbroscio is able to reach conclusions about the possibilities for a successful and sustainable reconstruction of U.S. city politics. This important volume will be vital for professionals and researchers in urban planning, urban studies, urban and regional economics, as well as urban politics.

The Voluntary City David T. Beito, Peter Gordon, Alexander Tabarrok, 2009-10-01
Assembling a rich history and analysis of large scale private and voluntary community based provision of social services, urban infrastructure, and community governance, this book provides suggestions on how to restore the vitality of city life. Historically, the city was considered a center of commerce, knowledge, and culture, a haven for safety, and a place of opportunity. Today, however, cities

are widely viewed as centers for crime homelessness poverty unemployment traffic pollution and other social ills In many cities government increasingly dominates life consuming vast resources to cater to special interest groups Decision making has become intensely politicized bureaucratic and largely unaccountable to the populace The Voluntary City provides a rich history and analysis of private locally based provision of social services urban infrastructure and community governance Such systems have offered superior education transportation housing crime control recreation health care and employment by being more effective innovative and responsive than those provided through special interest politics and bureaucracy The Voluntary City reveals how the process of providing local public goods through the dynamism of freely competitive market based entrepreneurship is unmatched in renewing communities and strengthening the bonds of civil society A refreshing challenge to the orthodoxy that government alone can improve community life The Voluntary City will be an essential reference for anyone interested in the future of cities including scholars and students policy makers civic and business leaders and urban citizens

HC 369 - Devolution: The Next Five Years and Beyond Great Britain. Parliament. House of Commons. Communities and Local Government Committee,2016 The Government has announced a devolution revolution transferring powers and opportunities to local government through a series of devolution deals The Cities and Local Government Devolution Bill gives statutory authority to deals and enables some of the specific reforms the Government wishes to make such as introducing directly elected mayors for combined authorities This inquiry set out to examine the contents of the Bill and in particular whether Greater Manchester s deal is a model for other areas but its scope quickly widened to a review of the way in which devolution in England is proceeding The Committee has identified various aspects of the current approach that it recommends are refined and improved The Committee has found a significant lack of public consultation and engagement at all stages in the devolution process The public should be engaged in the preparation of devolution proposals insofar as possible during the negotiations and once the results of a deal have begun to make an impact and communicated to throughout the process This is particularly the case for health devolution where the systems in place are complex changes are consequently more difficult to understand and the public s response is likely to be more emotional The Committee also believes that the Government s approach to devolution in practice has lacked rigour as to process there are no clear measurable objectives for devolution It suggests various ways in which proper process can be ensured

Planning the Twentieth-century American City Mary Corbin Sies, Christopher Silver, 1996 Arguing that planning in practice is far more complicated than historians usually depict the authors examine closely the everyday social political economic ideological bureaucratic and environmental contexts in which planning has occurred In so doing they redefine the nature of planning practice expanding the range of actors and actions that we understand to have shaped urban development

Times Square Roulette Lynne B. Sagalyn, 2003-08-29 The compelling story of the politics policies and personalities that made Times Square s revitalization possible The spectacularly successful transformation of Times Square has become a model for other cities From its beginning as Longacre Square Times Square s commercialism signage cultural diversity and social tolerance have been deeply embedded in New York City s psyche Its symbolic role guaranteed that any plan for its renewal would push the hot buttons of public controversy free speech property taking through eminent domain development density tax subsidy and historic preservation In Times Square Roulette Lynne Sagalyn debunks the myth of an overnight urban miracle performed by Disney and Mayor Giuliani to tell the far more complex and commanding tale of a twenty year process of public controversy nonstop litigation and interminable delay She tells how the troubled execution of the original redevelopment plan provided a rare opportunity to rescript it And timing was all the mid 1990s saw rising international corporate interest in the city was a mecca for mass market entertainment and synergistic merchandising Sagalyn details the complex relationship between planning and politics and the role of market forces in shaping Times Square s redevelopment opportunities She shows how policy was wedded to deal making and how persistent individuals and groups forged both

Making the Majors Eric M. Leifer, 1995 In this in depth look at major league sports Eric Leifer traces the growth and development of major leagues in baseball football basketball and hockey and predicts fundamental changes as the majors pursue international expansion He shows how every past expansion of sports publics has been accompanied by significant changes in the way sporting competition is organized With each reorganization the majors have created teams closer in ability bringing repetition to competition across time only to expand and energize the public's search for differences between teams and for events that disrupt the repetitive flow The phenomenal success of league sports Leifer writes rests on their ability to manufacture inequalities for fans to latch on to without jeopardizing the equalities that draw fans in Leifer supports his theory with historical detail and statistical analysis He examines the special concerns of league organizers in pursuing competitive balance and presents a detailed analysis of how large city domination has been undermined in the modern era of Major League Baseball Using games from the four major league sports he then shows how fans can themselves affect the course of competition In NFL football for example fans account for nearly all of the persisting inequality in team performance The possibility of sustaining inequality among equals emerges from the cross pressures that fans and leagues place on competition With substantial data in hand Leifer asks the essential question facing the leagues today how can they sustain a situation that depends entirely on simultaneous equality and contention one in which fan

involvement may evaporate as soon as one team dominates His answer has significant implications for the future of major league sports both nationally and internationally
