Cities, Migration, and Governance Felicitas Hillmann, Michael Samers, 2023-07-31 This volume examines how cities migration and urban governance are intertwined Questioning and re working the conceptual reliance on scales and levels it draws on examples from both Europe and North America to conceptualize the variety of cities as re active and pro active within glocal and socio territorial dynamics The book covers the governance of the myriad dimensions of urban life such as work housing racism Islamophobia xenophobia the arts leisure and other cultural practices political participation social movements and contentious politics in North American and European cities While cities might implement integration policies the chapters do not necessarily assume that migrants live with the telos of

integration but rather conduct their lives as anyone else would making meaning and voicing concerns under often difficult material conditions strewn with the markers of race religion gender sexuality age and often illegality The volume highlights four arguments themes or contributions addressed by one or more of the chapters how demographic change is prompting more pro active urban governance responses in many cities in the 21st century how the sheer complexity of migration in the 21st century is shaping the participation of citizen civil society actors the growing role of new private actors in the realm of urban governance and the participation of migrants themselves in this governance The book reminds us that we are confronted with a spectrum of urban governance strategies ranging from re active cities to pro active and welcoming cities Both timely and relevant this book collects the work of well known scholars in the field of migration and urban studies The chapters in this book were originally published as a special issue of Geographical Review Contending Global Apartheid, 2022-10-04 Contending Global Apartheid Transversal Solidarities and Politics of Possibility spells out a plea for utopia in a crisis ridden 21st century of unequal development exclusionary citizenship and forced migrations The volume offers a collection of critical essays on human rights movements sanctuary spaces and the emplacement of antiracist conviviality in cities across North and South America Europe and Africa They proceed from the idea that cities may accommodate both a humanistic sensibility and a radical potential for social transformation The figure of the migrant is pivotal It expounds the prospect of transversal solidarity to capture a plurality of commonalities and to abjure dichotomies between in group and out group the national and the international or society and institutions Contributors are Aleksandra Iund Ilker Ata Martin Bak J rgensen Harald Bauder Iriann Freemantle Christophe Foultier scar Garc a Agust n Shannon Gleeson Margaret Godoy Els de Graauw Ilhan Kellecioglu Loren B Landau Jorge Morales Cardiel Janet Munakamwe Kim Rygiel Ana Santamarina Carl Ulrik Schierup Sarah Schilliger and Maurice Stierl *Free City!* Marcy Rein, Mickey Ellinger, Vicki Legion, 2021-06-29 Free City The Fight for San Francisco s City College and Education for All tells the story of the five years of organizing that turned a seemingly hopeless defensive fight into a victory for the most progressive free college measure in the US In 2012 the accreditor sanctioned City College of San Francisco one of the biggest and best community colleges in the country and a year later proposed terminating its accreditation leading to a state takeover Free City follows the multipronged strategies of the campaign and the diverse characters that carried them out Teachers students labor unions community groups public officials and concerned individuals saved a treasured public institution as San Francisco s working class communities of color battled the gentrification that was forcing them out of the city And they pushed back against the national reform agenda of corporate workforce training that drives students towards debt and sidelines lifelong learning and community service programs Combining analysis with narrative Free City offers a case study in the power of positive vision and solution oriented organizing and a reflection on what education can and should be **Library of Congress Subject Headings** Library of Congress, 2011 *The Topography of Ancient Idalion and its Territory* Stephan G. question of how to define the territories of the ancient polities city kingdoms of Iron Age Cyprus is a fascinating but also a very difficult one While this topic has already been widely explored by previous scholarship recent investigations that include both modern approaches such as the application of landscape archaeological methodologies as well as a re evaluation of the available archaeological evidence from a new perspective now offers a fresh take on such questions A workshop organized in Berlin in 2018 aimed at discussing additional information on the topography of the ancient city of Idalion and its hinterland This volume therefore includes unique contributions that deal with a wide array of relevant aspects They provide new information on the location chronology and character of settlements necropoleis and sanctuaries from the wider area of Idalion and discuss important issues such as the continuity or discontinuity of settlement activities from the Late Bronze Age to the Iron Age and how this is reflected by material culture They address questions concerned with the physical control of territories and communication networks by considering Idalion s resource availability and the overall development of its rural settlement pattern in contrast to that of its neighbouring polities

This book explores urbanism in Antiquity from an archaeological perspective focusing on the area of western Thessaly in central Greece Presenting all the available evidence for ancient urban sites in the region the study outlines and discusses the origins development and decline of urbanism in the area The archaeological evidence shows that urban sites in western Thessaly developed from the mid 4th century BCE with at least 25 identified contemporaneous cities spread over the area These cities appear to have been planned and organised from the onset with regular street grids fortification systems and water supply works but were generally short lived typically existing for only five six generations Most of the sites were completely or nearly completely abandoned as settlements in the early 2nd century BCE often with evidence of violent destruction and only a handful survived as smaller regional centres under the Roman administration Restorations of the former urban sites and especially their fortifications occur towards the end of Antiquity especially the first half of the 6th century CE but re occupation appears again to have been short lived as only three cities survived into the Middle Ages From a regional perspective the study shows that the rise and fall of urbanism itself did not necessarily cause complete socio political disruption but rather reflect changes in regional and supra regional political organisation On a global scale the study exemplifies the political nature of the pre Industrial city its synthetic rather than organic role in agrarian societies and the cyclic nature of urbanity in history The book contains an extensive catalogue presenting each site with photographs topographical sketches and complete bibliography

The Other Lands of Israel Liv Ingeborg Lied,2008 According to the current scholarly consensus the apocalypse of 2 Baruch written after the Fall of Jerusalem either rejected the concept of the Land of Israel as a place of salvation or regarded it as of minor importance Inspired by the perspective of Critical Spatial Theory this book discusses the presuppositions behind this consensus with regard to the spatial epistemology it assumes and

explores the conception of the Land as a broad redemptive category The result is a fresh portrait of the vitality of the Land theme in the first centuries of the common era and a new perspective on the spatial imagination of 2 Baruch *The Jubilee from Leviticus to Qumran* John Bergsma,2007-03-31 The observation of the Jubilee Year 2000 by many Christian groups worldwide generated renewed interest in the theological historical and socio economic aspects of the biblical jubilee This book begins with an analysis of the historical origins of the jubilee institution in ancient Israel and then traces the reinterpretation of the jubilee and the text of Leviticus 25 through the Old Testament the Second Temple literature and the Qumran documents It demonstrates that with the passage of time the socio economic implementation of the jubilee is increasingly de emphasized in favor of an eschatological interpretation in which the jubilee itself functions as a type of the final age and cycles of jubilee years are employed to calculate when this age will arrive *Routledge Handbook of Immigration and Refugee Studies* Anna Triandafyllidou,2022-12-30 The Routledge Handbook of Immigration and Refugee Studies offers a comprehensive study of the multi disciplinary field of international migration and asylum studies The new edition incorporates numerous new chapters on issues including return migration the relationship between urbanisation and migration the role of advanced digital technologies in migration governance decision making and human agency and the COVID 19 pandemic and its impact on global migration Utilising contemporary information and analysis this innovative Handbook provides an in depth examination of the major analytical questions pertaining to migration and asylum whilst discussing key areas such as work welfare families citizenship the relationship between migration and development asylum and irregular migration With a comprehensive collection of essays written by leading contributors from different world regions and covering a broad range of disciplines including sociology geography legal studies political science and economics the Handbook is a truly multidisciplinary reader Organised into thematic and geographical chapters the Routledge Handbook of Immigration and Refugee Studies provides a concise overview on the different topics and world regions as well as useful guidance for both the starting and the more experienced reader The Handbook s expansive content and illustrative style will appeal to both students and professionals studying in the field of migration and international organisations **Open Borders** Reece Jones,2019 Border control continues to be a highly contested and politically charged subject around the world This collection of essays challenges reactionary nationalism by making the positive case for the benefits of free movement for countries on both ends of the exchange Open Borders counters the knee jerk reaction to build walls and close borders by arguing that there is not a moral legal philosophical or economic case for limiting the movement of human beings at borders The volume brings together essays by theorists in anthropology geography international relations and other fields who argue for open borders with writings by activists who are working to make safe passage a reality on the ground It puts forward a clear concise and convincing case for a world without movement restrictions at borders The essays in the first part of the volume make a theoretical case for free movement by analyzing philosophical legal and moral arguments for opening

borders In doing so they articulate a sustained critique of the dominant idea that states should favor the rights of their own citizens over the rights of all human beings The second part sketches out the current situation in the European Union in states that have erected border walls in states that have adopted a policy of inclusion such as Germany and Uganda and elsewhere in the world to demonstrate the consequences of the current regime of movement restrictions at borders The third part creates a dialogue between theorists and activists examining the work of Calais Migrant Solidarity No Borders Morocco activists in sanctuary cities and others who contest border restrictions on the ground

CHERUBIM AND SERAPHIM Drew Worthen, 2024-05-30 Who or what are cherubim and seraphim I never gave much thought to the question until I was teaching through the book of Ezekiel Despite scholars defining them as angels upon further study it became clear that cherubim and seraphim are anything but angels This book takes a deep dive into the real nature of these creatures by using all the biblical texts that are applicable to them in both Old and New Testaments In the pursuit of exegeting the related Scriptures concerning this class of being I was forced to consider other classes of beings that surround the throne of God together with historical events and places that are linked with the cherubim and seraphim thus the subtitle to the book *Heaven's Beasts and Other Assorted Beings Events and Places Associated with Them* This is why it was necessary to travel side paths that intersect with these creatures in question Examples include cherubim and seraphim's role in the throne room of God the Holy of Holies Thus I show their relation to the Ark of the Covenant the mercy seat and all creatures that attend God in this holy place I also speak to the present heaven whom many assume is only spiritual and yet the Scriptures give us a much different picture Traveling further down this path I then address the ultimate kingdom of God the Scriptures call the new heavens and new earth which is the final destination for all believers in Christ Upon discovering the real nature of the cherubim and seraphim I also make the connection to what Ezekiel describes as the spirit of the living beings residing in their wheels and the spirit of earthly animals in which resides the breath of life revealing where that animal's spirit goes at death Yes this means all animals with the breath of life including your pets have a life after death Is there a doggie heaven This book answers that question and much more while focusing on the life of the cherubim and seraphim and their role in the kingdom of God
