City Bound Urban Life And Political Attitudes Among Chicano Youth:

City Bound Martín Sánchez-Jankowski, 1986 Chicano Politics and Society in the Late Twentieth Century David Montejano, 2010-05-28 The various protest movements that together constituted the Chicano Movement of the 1960s and 1970s urged a politics of inclusion to bring Mexican Americans into the mainstream of United States political and social life This volume of ten specially commissioned essays assesses the post movement years asking what went wrong what went right and where are we now Collectively the essays offer a wide ranging portrayal of the complex situation of Mexican Americans as the twenty first century begins The essays are grouped into community institutional and general studies with an introduction by editor Montejano Geographically they point to the importance of Hispanic politics in the Southwest as well as in Chicago wards and in the U S Congress with ramifications in Mexico and Central America Thematically they discuss non traditional politics stemming from gender identity environmental issues theatre production labor organizing university policymaking along with the more traditional politics revolving around state and city government the Congressional Hispanic Caucus and various advocacy organizations A Century of Chicano History Raul E. Fernandez, Gilbert G. Gonzalez, 2012-11-12 This study argues for a radically new interpretation of the origins and evolution of the ethnic Mexican community across the US This book offers a definitive account of the interdependent histories of the US and Mexico as well as the making of the Chicano population in America The authors link history to contemporary issues emphasizing the overlooked significance of late 19th and 20th century US economic expansionism to Europe in the formation of the Mexican community Handbook of Research on Civic Engagement in Youth Lonnie R. Sherrod, Judith Torney-Purta, Constance A. Flanagan, 2010-07-30 Engaging youth in civic life has become a central concern to a broad array of researchers in a variety of academic fields as well to policy makers and practitioners globally This book is both international and multidisciplinary consisting of three sections that respectively cover conceptual issues developmental and educational topics and methodological and measurement issues Broad in its coverage of topics this book supports scholars philanthropists business leaders government officials teachers parents and community practitioners in their drive to engage more young people in community and civic actions **Latinos and Politics** F. Chris Garcia, 1991 **Latinos and the U.S. Political System** Rodney Hero, 1992-01-29 An analysis of American politics from the vantage point of the Latino political condition City Bound Martín Sánchez-Jankowski, 1986 **Justice and the Politics of Difference** Iris Marion Young, 2011-08-22 In this classic work of feminist political thought Iris Marion Young challenges the prevailing reduction of social justice to distributive justice It critically analyzes basic concepts underlying most theories of justice including impartiality formal equality and the unitary moral subjectivity The starting point for her critique is the experience and concerns of the new social movements about decision making cultural expression and division of labor that were created by marginal and excluded groups including women African Americans and American Indians as well as gays and lesbians Iris Young defines concepts of domination and

oppression to cover issues eluding the distributive model Democratic theorists according to Young do not adequately address the problem of an inclusive participatory framework By assuming a homogeneous public they fail to consider institutional arrangements for including people not culturally identified with white European male norms of reason and respectability Young urges that normative theory and public policy should undermine group based oppression by affirming rather than suppressing social group difference Basing her vision of the good society on the differentiated culturally plural network of contemporary urban life she argues for a principle of group representation in democratic publics and for group differentiated policies Danielle Allen s new foreword contextualizes Young s work and explains how debates surrounding social justice have changed since and been transformed by the original publication of *Justice and the Politics of Difference* *Mexicanos, Second Edition* Manuel G. Gonzales, 2009-08-20 Newly revised and updated *Mexicanos* tells the rich and vibrant story of Mexicans in the United States Emerging from the ruins of Aztec civilization and from centuries of Spanish contact with indigenous people Mexican culture followed the Spanish colonial frontier northward and put its distinctive mark on what became the southwestern United States Shaped by their Indian and Spanish ancestors deeply influenced by Catholicism and tempered by an often difficult existence Mexicans continue to play an important role in U S society even as the dominant Anglo culture strives to assimilate them Thorough and balanced *Mexicanos* makes a valuable contribution to the understanding of the Mexican population of the United States a growing minority who are a vital presence in 21st century America

Racialised Barriers Stephen Small, 2014-04-04 A systematic comparison of key differences and similarities in the experience of black people in the US and England amidst racial hostility Small argues for an approach to combatting this built on shared racial identities

Nationalism, Ethnicity, and Identity Russell F. Farnen, 2017-07-05 Nationalism national identity and ethnicity are cultural issues in contemporary Western societies Problems in the United States the Netherlands Germany Austria Turkey Poland Croatia Ukraine Hungary and Bulgaria illustrate both large scale internal variations in these phenomena and their cross national relevance for teaching research and educational development on such subjects as multiculturalism ethnic diversity and socialization *Nationalism Ethnicity and Identity* now in paperback reflects the consequences of rapid change as well as the impact of longstanding social values Contributors from a number of different countries use a variety of methodological approaches empirical quantitative qualitative historical and case study among others to analyze important issues These include anti-Semitism stereotyping militarism authoritarianism postmodernism moral development gender patriarchy theory of the state critical educational theory Europeanization and democratic public policy options as related to competing choices among monocultural and multicultural policy options In addition contributors examine the situation of minorities in their respective national settings Chapters cover the impact of mass media culture patriotism and other universal values This cross national study is a unique addition to the literature on multiculturalism

Seeking El Dorado Lawrence B. de Graaf, Kevin Mulroy, Quintard Taylor, 2014-07-01 From the 18th century African

Americans like many others have migrated to California to seek fortunes or often the more modest goals of being able to find work own a home and raise a family relatively free of discrimination Not only their search but also its outcome is covered in Seeking El Dorado Whether they settled in major cities or smaller towns African Americans created institutions and organizations churches social clubs literary societies fraternal orders civil rights organizations that embodied the legacy of their past and the values they shared Blacks came in search of the same jobs as other Americans but the search often proved frustrating Throughout the 19th and 20th centuries African American leadership in the state consistently focused on achieving racial justice The essays in this book speak of triumph and hardship success discrimination and disappointment Seeking El Dorado is a major contribution to black history and the history of the American West and will be of interest to both scholars and general readers I'm Neither Here Nor There Patricia Zavella,2011-06-13 Studies poor and working class Mexicans in the USA showing how migration influences the creation of identity family and community and how it affects even those who don t themselves actually migrate **Metropolis** Philip Kasinitz,1995 Draws on renowned social thinkers to help understand why Americans flock to urban centers The modern city is the nexus of culture politics and art Despite the manifold problems cities face more and more Americans are abandoning rural areas and relocating to urban centers By the year 2000 4 out of 5 Americans will live within one hour of a major city What has prompted this emphasis on the city Chronicling the rise of the modern city Metropolis draws from the work of such renowned social thinkers as Georg Simmel Lewis Mumford Walter Benjamin Richard Sennett and Herbert Gans to illustrate how and why we have come to be an urban society and what the future holds for the American city Each of the five sections on modernity and the urban ethos New York City community and social bonds in the city social relations and public places and the role of space race class and politics in the American city is prefaced by an introduction by the editor highlighting the issues under discussion **At the Threshold** S. Shirley Feldman,Glen R. Elliott,1990 Presents the findings of the Carnegie Foundation study on adolescence an interdisciplinary synthesis of research into the biological social and psychological changes occurring during this key stage in the life span Focuses on the contexts of adolescent life social and ethnic family and school leisure and work On the Streets and in the State House Diane-Michele Prindeville,2004-06-01 This study explores the politics of American Indian and Hispanic women leaders in New Mexico s environmental policymaking arena Using non random purposive sampling 50 women were selected for participation who were political activists in grassroots organization or public officials elected or appointed to local state or tribal government Personal interviews were employed to gather data on their political socialization their leadership trajectories their motives for engagement in public life their political ideology their racial ethnic and gender identity and their policy agendas and strategies for influencing public policymaking *Democracy, Authoritarianism and Education* NA NA,2016-04-30 Democracy Authoritarianism and Education reviews the most recently published empirical research findings on these subjects as well as results from a survey of the attitudes of 10 000 college and university students

in 44 countries towards authority democracy nationalism militarism internationalism and educational policy choices One interesting finding is that cross nationally higher authoritarianism levels translate into lower scores on democratic attitudes and internationalism higher nationalism and militarism scores and support for more conservative and provincial and monocultural educational policy options *Mexican American Politics in a Multi-ethnic Community* Jose Zapata Calderon,1991 *Cultivating Democracy* James G. Gimpel,J. Celeste Lay,Jason E. Schuknecht,2003-10-15 Scholars across several social science disciplines have indicated that the behavior described by the term civic engagement is girded by a set of attitudes that show knowledge about and positive evaluations of government and politics Drawing on extensive interviews with high school students from a variety of socioeconomic backgrounds *Cultivating Democracy* examines the sources of those attitudes including individual characteristics and the qualities of local environments that shape the experiences of late adolescence The authors gathered data on adolescent attitudes by interviewing students in a wide variety of locations from Baltimore s inner city and suburbs to the most affluent communities in Montgomery County Maryland Focusing initially on attitudes toward ethnic diversity and immigration the authors expanded their focus to the political socialization of young people including patriotism and political knowledge and participation The authors demonstrate how political socialization is shaped through the social messages presented to citizens by others According to Gimpel Lay and Schuknecht while formal education as a means of socializing youth is critically important other useful means for communicating positive socializing messages through political parties elections and the media have been ignored They recommend compensatory strategies to promote civic engagement among those who are at risk to be nonparticipants *Boletin Bibliografico III* ,
