Limits of Settlement Growth Roland Fletcher,1995-09-29 In this study Roland Fletcher argues that the built environment becomes a constraint on the long term development of a settlement It is costly to move settlements or to demolish and rebuild from scratch so the initial layout and buildings and the forms of communication that result may come to shackle further development and also to place constraints on social and political change Using this theoretical framework Dr Fletcher reviews worldwide settlement growth over the past 15 000 years and concludes with a major discussion of the great transformations of human settlements from mobile to sedentary sedentary to urban and urban to industrial This book is an ambitious contribution to archaeological theory and the questions it raises also have implications for the future of urban settlement The Floating University Tamson Pietsch,2023-05-17 In 1926 New York University s Floating University sailed 500 American collegians around the globe hoping to make them better citizens of the world and demonstrate a new educational model It didn t go well Tamson Pietsch here excavates a rich picture of this folly its origins and the insights it affords into an America that was being defined increasingly by both imperialism and the professionalization of higher

education For Pietsch the voyage traced the expanding tentacles of US power even as it tried to somehow model a new kind of cultural expertise with an all white student body and crew traveling under the implicit protection of American hegemony

An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable demonstrating how we can restore function and beauty to our urban spaces for the long term Nearly everything we treasure in the world's most beautiful cities was built over a century ago Cities like Prague Paris and Lisbon draw millions of visitors from around the world because of their exquisite architecture walkable neighborhoods and human scale Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years not because of traffic population growth or other practical hurdles but because of ill considered theories emerging from Modernism and reactions to it The errors of urban design over the last century are too great not to question The solutions being offered today sustainability walkability smart and green technologies hint at what has been lost and what may be regained but they remain piecemeal and superficial In *The Art of Classic Planning* architect and planner Nir Haim Buras documents and extends the time tested and holistic practices that held sway before the reign of Modernism With hundreds of full color illustrations and photographs
