and Regions John W. Day, Charles Hall, 2016-01-23 This book takes you on a unique journey through American history taking time to consider the forces that shaped the development of various cities and regions and arrives at an unexpected conclusion regarding sustainability From the American Dream to globalization to the digital and information revolutions we assume that humans have taken control of our collective destinies in spite of potholes in the road such as the Great Recession of 2007 2009 However these attitudes were formed during a unique 100 year period of human history in which a large but finite supply of fossil fuels was tapped to feed our economic and innovation engine Today at the peak of the Oil Age the horizon looks different Cities such as Los Angeles Phoenix and Las Vegas are situated where water and other vital ecological services are scarce and the enormous flows of resources and energy that were needed to create the megalopolises of the 20th century will prove unsustainable Climate change is a reality and regional impacts will become increasingly severe Economies such as Las Vegas which are dependent on discretionary income and buffeted by climate change are already suffering the fate of the proverbial canary in the coal mine Finite resources will mean profound changes for society in general and the energy intensive lifestyles of the US and Canada in particular But not all regions are equally vulnerable to these 21st century megatrends Are you ready to look beyond America's Most Livable Cities to the critical factors that will determine the sustainability of your municipality and region Find out where your city or region ranks according to the forces that will impact our lives in the next years and decades Find out how resource availability and ecological services shaped the modern landscape emerging megatrends will make cities and regions more or less livable in the new century your city or region ranks on a sustainability map of the United States urban metabolism puts large cities at particular risk sustainability factors will favor economic solutions at a local rather than global level these principles apply to industrial economies and countries globally This book should be cited as follows J Day C Hall E Roy M Moersbaecher C D Elia D Pimentel and A Yanez 2016 America's most sustainable cities and regions Surviving the 21st century megatrends Springer New York 348 p

Windmill Lesson (120 Poems in Indonesian Print Media) Lasinta Ari Nendra Wibawa, Kinanthi Anggraini, 2018-05-17
WINDMILL LESSONS Love you sincerely O wind it's the same as loving friends of the poor and poor because the wall roof is like the most wanted dream when fate forced him to be a captain without a cabin I never cursed the lips that mention the propeller even though life begins with a dizzying wind not a machine that repeatedly fondles bearings or the burning of fossils that now have a foreign face We rely on life from a blow to blow then work to pull the two wheels that intersect like a fertile field with scattered seeds but we regularly water it even though there is no rain We believe that every job starts with gradual change then learn from the snail that survives from enemy invasion and threat of starvation We believe that every effort beats from the simplicity that is not in vain then contemplate the fallen tree after being slaughtered rot and then pass on the fungi that decompose because that's how opportunity is born not the fruit of waiting luck but from event to event what was once a normal thing struggling to free you from the dark embrace without ever waking up a bunch of smoke is a very

very sacred mission without shouldering any strings attached another day without polluting the baby's soft nose young children and nursing mothers oh no matter how fast persistent we run keep the heart back where we started Surakarta November 25 28 2013 The poem was published in Suara Merdeka newspaper December 1 2013
