Carp,2007-08-22 While port cities connected the American colonies economically politically and culturally to the British empire urban colonists Benjamin Carp argues were among the first to slough off their British identity and unite as Americans Looking at the physical environments of cities as political catalysts Carp contends that what began as interaction negotiation conflict and compromise in churches taverns wharves and city streets developed into a wider political awareness and collaborative political action City dwellers ability to transmit their ideas to their neighbors in rural areas was an important step on the path to Revolution Carp focuses on a specific type of space in each of the five largest cities of the Anglo American colonies maritime and commercial spaces of the Boston waterfront the taverns of New York the houses of worship in Newport the households of Charleston and the streets outside the halls of power in Philadelphia While each of the chapter takes a single city as a case study each also illuminates the conditions and changes taking place elsewhere from the 1740s to the 1780s In the epilogue Carp discusses how these cities became untenable and ineffective as sites of political mobilization during wartime and how patriots moved administrative

military and economic management to the hinterlands In discussing the diverse backgrounds interests and classes of the people mobilized for the Revolutionary cause Carp includes artisans free blacks slaves and women This groundbreaking work will contribute to scholarship on the American Revolution as well as those who study material culture geography urban studies and the local history **The Intelligible Metropolis** Nora Pleßke,2014-08-15 Writings on the metropolis generally foreground illimitability stressing thereby that the urban ultimately remains both illegible and unintelligible Instead the purpose of this interdisciplinary study is to demonstrate that mentality as a tool offers orientation in the urban realm Nora Ple ke develops a model of urban mentality to be employed for cities worldwide Against the background of the Spatial Turn she identifies dominant urban specific structures of London mentality in contemporary London novels such as Monica Ali s Brick Lane J G Ballard s Millennium People Nick Hornby s A Long Way Down and Ian McEwan s Saturday *Topography and Literature* Reinhard Zachau,2009-07-22 Die Beitr ge der gleichnamigen Tagung an der University of the South in Tennessee USA untersuchen die Beziehung zwischen der Auswirkung des Berliner Stadtraums auf k nstlerische Darstellungen In einem ersten Teil werden die Wilhelminischen Stadtsymbole und die einsetzende moderne Stadtplanung in Beziehung zu Berliner Flaneuren wie Georg Hermann und Robert Walser gebracht Der Schwerpunkt des Bandes liegt im zweiten Teil wo die Auswirkungen der Stadtplanung auf Kunst und Literatur im Berlin der Weimarzeit im Mittelpunkt stehen In diesem Teil zeigen eine Reihe von Einzeldarstellungen Aspekte der Wechselwirkung von Raum und Kunstprodukt u a bei Otto Dix Walter Ruttmann Hans Fallada und Alfred D blin Den Abschluss bilden Beitr ge ber das Fortwirken von Weimars Moderne in der heutigen Zeit **Beyond the Grand Tour** Rosemary Sweet,Gerrit Verhoeven,Sarah Goldsmith,2017-02-17 Travel in early modern Europe is frequently represented as synonymous with the institution of the Grand Tour a journey undertaken by elite young males from northern Europe to the centres of the arts and antiquity in Italy Taking a somewhat different perspective this volume builds upon recent research that pushes beyond this narrow orthodoxy and which decentres Italy as the ultimate destination of European travellers Instead it explores a much broader pattern of travel undertaken by people of varied backgrounds and with divergent motives for travelling By tapping into current reactions against the reification of the Grand Tour as a unique and distinctive practice this volume represents an important contribution to the ongoing process of resituating the Grand Tour as part of a wider context of travel and topographicalmwriting Focusing upon practices of travel in northern and western Europe rather than in Italy particularly in Britain the Low Countries and Germany the essays in this collection highlight how itineraries continually evolved in response to changing political economic and intellectual contexts In so doing the reasons for travel in northern Europe are subjected to a similar level of detailed analysis as has previously only been directed on Italy By doing this the volume demonstrates the variety of travel experiences including the many shorter journeys made for pleasure health education and business undertaken by travellers of varying age and background across the period In this way the volume brings to the fore the experiences of varied categories of traveller

from children to businessmen which have traditionally been largely invisible in the historiography of travel

Dense+Green Urban Development Thomas Schröpfer,2025-05-06 Building on previous Dense Green publications this book explores sustainable integrated districts as models for high density high liveability cities It highlights how green elements are strategically deployed and integrated into broader systemic solutions at an urban scale Beyond identifying key factors for successful spatial implementation the book examines the planning instruments and governance arrangements enabling such developments across diverse socio spatial contexts A collaboration between the Singapore ETH Centre SUTD and ETH Zurich the publication provides in depth analyses of international case studies including one north in Singapore King s Cross in London and Quayside in Toronto It also explores urban green development within Zurich s existing fabric In depth analysis of international case studies Integrating urban and architectural design planning tools and socio spatial contexts With a foreword by Kees Christiaanse   *Cross Stitch Gold Issue 136 - 2017* Magazines Global, Cross Stitch Gold Issue 136 2017   **Push Guide to Which University** Johnny Rich,2004-08 This popular guide has been fully updated and redesigned to reflect exactly what today s students want to know It is the most accessible guide to higher education and student life in the UK and provides reliable lively and unbiased information on what universities really offer The establishments are listed alphabetically with each entry providing a wealth of information from a description of the campuses to famous alumni A separate section supplies a list of courses and which universities offer them making it easy for the reader to cross reference their chosen course with the right university   **The Right to Landscape** Shelley Egoz,Jala Makhzoumi,Gloria Pungetti,2016-12-05 Associating social justice with landscape is not new yet the twenty first century s heightened threats to landscape and their impact on both human and more generally nature s habitats necessitate novel intellectual tools to address such challenges This book offers that innovative critical thinking framework The establishment of the Universal Declaration of Human Rights UDHR in 1948 in the aftermath of Second World War atrocities was an aspiration to guarantee both concrete necessities for survival and the spiritual emotional psychological needs that are quintessential to the human experience While landscape is place nature and culture specific the idea transcends nation state boundaries and as such can be understood as a universal theoretical concept similar to the way in which human rights are perceived The first step towards the intellectual interface between landscape and human rights is a dynamic and layered understanding of landscape Accordingly the Right to Landscape is conceived as the place where the expansive definition of landscape with its tangible and intangible dimensions overlaps with the rights that support both life and human dignity as defined by the UDHR By expanding on the concept of human rights in the context of landscape this book presents a new model for addressing human rights alternative scenarios for constructing conflict reduced approaches to landscape use and human welfare are generated This book introduces a rich new discourse on landscape and human rights serving as a platform to inspire a diversity of ideas and conceptual interpretations The case studies discussed are wide in their geographical distribution and

interdisciplinary in the theoretical situation of their authors breaking fresh ground for an emerging critical dialogue on the convergence of landscape and human rights   Urban Violence and Insecurity Caroline O N Moser,2004
