The Civil War in Books David J. Eicher, 1997 With the assistance of several scholars including James M McPherson and Gary Gallagher and a long time specialist in Civil War books Ralph Newman David Eicher has selected for inclusion in The Civil War in Books the 1 100 most important books on the war These are organized into categories as wide ranging as Battles and Campaigns Biographies Memoirs and Letters Unit Histories and General Works The last of these includes volumes on black Americans and the war battlefields fiction pictorial works politics prisons railroads and a host of other topics Annotations are included for all entries in the work which is presented in an oversized 8 1 2 x 11 inch volume in two column format Appendixes list prolific Civil War publishers and other Civil War bibliographies and the works included in Eicher s mammoth undertaking are indexed by author or editor and by title Gary

Gallagher's foreword traces the development of Civil War bibliographies and declares that Eicher's annotation exceeds that of any previous comprehensive volume. The Civil War in Books, Gallagher believes, is precisely the type of guide that has been needed. The first full-scale fully annotated bibliography on the Civil War to appear in more than thirty years, Eicher's *The Civil War in Books* is a remarkable compendium of the best reading available about the worst conflict ever to strike the United States. The bibliography, the most valuable reference book on the subject since *The Civil War Day by Day*, will be essential for college and university libraries, dealers in rare and secondhand books, and Civil War buffs. *Civil War Newspaper Maps* David C. Bosse, 1993. Bull Run, Ball's Bluff, Secessionville, Antietam, Champion's Hill, Chickamauga. To the Northern public during the Civil War, they were exotic names of unfamiliar places where husbands, sons, fathers, and brothers fought and died. Hungry for information from these far-off battlefields, Americans began buying daily newspapers in record numbers. Competition among publishers grew keen. Correspondents reporting from the field soon began supplementing written dispatches with battlefield maps, and before long newspapers were seeking new ways to portray topography and battle lines in clear, effective images. In *Civil War Newspaper Maps*, David Bosse shows how nineteenth-century advances in printing and engraving technology, coupled with an unprecedented public demand for information, led to the development of a means of mass communication still in use today: the quickly produced newspaper battlefield map. Bosse's introduction offers a concise overview of the subject, including how correspondents got maps to their papers from the field press, military relations during the war, and the economic problems of map printing. Following the text is an atlas of forty-five newspaper maps printed by the Northern daily press. Each map is accompanied by a summary of the military operation it illustrates and a commentary on the map itself, including an evaluation of its accuracy based on comparison with other historical and cartographic sources. Arranged chronologically, the maps cover nearly every theater of the war and represent a unique historical record of one of the pivotal events in American history. *The Geographical Imagination in America, 1880-1950* Susan Schulten, 2001-04. Schulten examines four enduring institutions of learning that produced some of the most influential sources of geographic knowledge in modern history: maps and atlases, the National Geographic Society, the American university, and public schools.
