*Civil Defense Begins at Home* Laura McEnaney, 2020-10-06 Dad built a bomb shelter in the backyard Mom stocked the survival kit in the basement and the kids practiced ducking under their desks at school This was family life in the new era of the A bomb This was civil defense In this provocative work of social and political history Laura McEnaney takes us into the secretive world of defense planners and the homes of ordinary citizens to explore how postwar civil defense turned the front lawn into the front line The reliance on atomic weaponry as a centerpiece of U S foreign policy cast a mushroom cloud over everyday life American citizens now had to imagine a new kind of war one in which they were both combatants and targets It was the Federal Civil Defense Administration s job to encourage citizens to adapt to their nuclear present and future As McEnaney demonstrates the creation of a civil defense program produced new dilemmas about the degree to which civilian society should be militarized to defend itself against internal and external threats Conflicts arose about the relative responsibilities of state and citizen to fund and implement a home front security program The defense establishment s resolution was to popularize and privatize military preparedness The doctrine of self help defense demanded that citizens become autonomous rather than rely on the federal government for protection Families would reconstitute themselves as paramilitary units that could quash subversion from within and absorb attack from without Because it solicited an unprecedented degree of popular involvement the FCDA offers a unique opportunity to explore how average citizens community leaders and elected officials both participated in and resisted the creation of the national security state Drawing on a wide variety of archival sources McEnaney uncovers the broad range of responses to this militarization of daily life and reveals how government planners and ordinary people negotiated their way at the dawn of the atomic age Her work sheds new light on the important postwar debate about what total military preparedness would actually mean for American society

**Savage Perils** Patrick B. Sharp, 2012-09-05

Revisiting the racial origins of the conflict between civilization and savagery in twentieth century America The atomic age brought the Bomb and spawned stories of nuclear apocalypse to remind us of impending doom As Patrick Sharp reveals those stories had their origins well before Hiroshima reaching back to Charles Darwin and America s frontier In *Savage Perils* Sharp examines the racial underpinnings of American culture from the early industrial age to the Cold War He explores the influence of Darwinism frontier nostalgia and literary modernism on the history and representations of nuclear weaponry Taking into account such factors as anthropological race theory and Asian immigration he charts the origins of a worldview that continues to shape our culture and politics Sharp dissects Darwin s arguments regarding the struggle between civilization and savagery theories that fueled future war stories ending in Anglo dominance in Britain and influenced Turnerian visions of the frontier in America Citing George W Bush s Axis of Evil Sharp argues that many Americans still believe in the racially charged opposition between civilization and savagery and consider the possibility of nonwhite savages gaining control of technology the biggest threat in the war on terror His insightful book shows us that this conflict is but the latest installment in an ongoing saga that has been at the heart of American identity from the beginning and that understanding it is essential if we are to eradicate racist mythologies from American life

**Survival City** Tom Vanderbilt, 2010-04-15

On the road to *Survival City* Tom Vanderbilt maps the visible and invisible legacies of the cold war exhuming the blueprints for the apocalypse we once envisioned and chronicling a time when we all lived at ground zero In this road trip among ruined missile silos atomic storage bunkers and secret test sites a lost battleground emerges amid the architecture of the 1950s accompanied by Walter Cotten s stunning photographs *Survival City* looks deep into the national soul unearthing the dreams and fears that drove us during the latter half of the twentieth century A crucial and dazzling book masterful and for me at least intoxicating Dave Eggers A genuinely engaging book perhaps because Vanderbilt is skillful at conveying his own sense of engagement to the reader Los Angeles Times A retracing of Dr Strangelove as ordinary life Greil Marcus Bookforum
