Civil Peace And Sacred Order Limits And Renewals:

Civil Peace and Sacred Order Stephen R. L. Clark, 1989 This book is an ambitious and challenging restatement of traditional political philosophy The first of a three volume series Limits and Renewals the book is concerned with the nature of political society particularly with the errors and faulty arguments that have been used to support a liberal modernist view of the state and our political system Clark argues that political modernism which is determinedly secular and untraditional has been a destructive influence on religion and our understanding of community living In order to secure a decent social order he contends we must rediscover our allegiance to a sacred order that is represented by for example family loyalties a respect for tradition and attention to the wider interests of the global and historical community

The Anti-Pelagian Imagination in Political Theory and International Relations Nicholas Rengger, 2017-03-31 This volume draws together some of the key works of Nicholas Rengger focusing on the theme of the anti Pelagian imagination in political theory and international relations Rengger frames the collection with a detailed introduction that sketches out this imagination its origins and character and puts the chapters that follow into context with the work of other theorists including Bull Connolly Gray Strauss Elshtain and Kant The volume concludes with an epilogue contrasting two different ways of reading this sensibility and offering reasons for supposing one is preferable to the other Updating and expanding on ideas from work over the course of the last sixteen years this collection will be of great interest to students and scholars of international relations theory political thought and political philosophy

Yeats Annual No. 10 Warwick Gould, 2016-07-27 Yeats Annual No 10 finds new thresholds and margins in Yeats s thought and work It concentrates upon his plays his occult concerns with spiritualism and the Irish belief in an otherworld and closely examines certain aspects of his textual state and the borders of his canon The admirable Yeats Annual a powerful base of biographical and textual knowledge Since 1982 the vade mecum of Yeats full of interest Bernard O Donoghue The Times Literary Supplement

International Relations, Political Theory, and the Problem of Order Nicholas J. Rengger, 2000 This book seeks to offer a general interpretation and critique of both methodological and substantive aspects of International theory

Philosophy and Technology Roger Fellows, 1995-12-14 This collection of essays examines the philosophical and cultural aspects of technology from a variety of perspectives

On the Road to Emmaus Glenn W. Olsen, 2012-03-05 In distinctive voice and tone cultural commentator Glenn W Olsen presents his latest work on the place of Catholicism in American history Here he clarifies the meaning of American modernity for Catholics and shows the conflicts and tensions confronting the religious person today

The Hastening that Waits Nigel Biggar, 1993 This book offers a fresh and up to date account of the ethical thought of one of the twentieth century s greatest theologians Karl Barth The author seeks to recover Barth s ethics from some widespread misunderstandings and also presents a picture of them as a whole Drawing on recently published sources Dr Biggar construes the ethics of the Church Dogmatics as it might have been had Barth lived to

complete it not only separately in each of its three constituent dimensions but also in its dynamic coinherent integrity. However, *The Hastening that Waits* is more than apology and description. For it recommends to contemporary Christian ethics the theological rigour with which Barth expounds the good life in terms of the living presence of God in Christ to his creatures his conception of right human action as that which is able to hasten in the service of humanity precisely by waiting prayerfully upon God and his discriminate openness to moral wisdom outside of the Christian church. Among the particular topics treated are the concepts of human freedom and of created moral order moral norms and their relation to individual vocation the relative ethical roles of the Bible the Church philosophy and empirical science moral character and its formation and the problem of war.

The Market Economy and Christian Ethics Peter H. Sedgwick, 1999-10-07 Peter Sedgwick explores the relation of a theology of justice to that of human identity in the context of the market economy and engages with critics of capitalism and the market. He examines three aspects of the market economy: first, how does it shape personal identity through consumption and the experience of paid employment in relation to the work ethic? Second, what impact does the global economy have on local cultures? Finally, as manufacturing changes out of all recognition through the impact of technology and global competition, what is the effect in terms of poverty? Drawing on the response of the Catholic Church both in the United States and in papal encyclicals to the market economy from 1985-1991, Sedgwick argues that its involvement deserves to be better known. Moreover, he recommends that the Churches remain part of the debate in reforming and humanizing the market economy.

The Mysteries of Religion Stephen R. L. Clark, 2017-11-28 Philosophy of religion too often confines itself to a few well-worn philosophical puzzles such as the proof of God's existence and overworked examples which are usually drawn from Western Christianity. This book considers religion practice and expression in a number of cultural contexts both familiar and exotic from sacred texts to rites of passage from the British Israel movement to spiritism and Aztec devil worship. The author argues that although there are many points on which religious persons disagree and no definite way of settling these disagreements, Neoplatonic theory about the world and our place in it does at least provide the context for debate. Is religion an irrational human attempt to disguise an essentially meaningless universe? Or is irreligion itself unreasonable and a spiritual universe the best explanation? Using a wide range of examples, *The Mysteries of Religion* provides an invaluable philosophical background for a discussion of such fundamental questions.

Africa's Radicalisms and Conservatisms, 2021-01-11 With Africa as its point of reference and departure, this volume examines why and how the two concepts radicalisms and conservatisms should not be taken as mere binaries around which to organize knowledge. It demonstrates that these concepts have multiple and diverse meanings as perceived and understood from different disciplinary vantage points; hence the deliberate pluralization of the terms. The essays show what happens when one juxtaposes the two concepts and how they are easily intertwined when different peoples lived experiences of poverty political and social alienation education intolerance youth activism social injustice violence etc. across the length and breadth of

Biblical Faith and Natural Theology James Barr, 1993-01-21 Do people know about God just by being human beings Or do they need special divine assistance through the Bible and the church Natural Theology is the idea that human beings by nature that is just through being human know something of God or that perhaps they gain such knowledge from observing the world we live in Its opposite is revealed theology or the knowledge of God communicated only through special channels through Jesus Christ through the Bible through the church Natural theology was long accepted as a basic ingredient in all theology but in the twentieth century it was rejected by important theologians especially Karl Barth His views denied all natural theology and placed greater emphasis on the Bible But what if the Bible itself uses depends on and supports natural theology In this book Professor Barr pursues these questions within the Bible itself and within the history of ideas earlier and more recent and he looks at their implications for religion and theology in the future

The Cambridge Companion to Berkeley Kenneth P. Winkler, 2005-12-19 George Berkeley is one of the greatest and most influential modern philosophers In defending the immaterialism for which he is most famous he redirected modern thinking about the nature of objectivity and the mind s capacity to come to terms with it Along the way he made striking and influential proposals concerning the psychology of the senses the workings of language the aims of science and the scope of mathematics In this Companion volume a team of distinguished authors not only examines Berkeley s achievements but also his neglected contributions to moral and political philosophy his writings on economics and development and his defense of religious commitment and religious life The volume places Berkeley s achievements in the context of the many social and intellectual traditions philosophical scientific ethical and religious to which he fashioned a distinctive response

From Newton's Sleep Joseph Vining, 2023-11-14 What the presence of law tells us about our beliefs our language and the world around us In a strikingly original work intended not only for practicing lawyers but for anyone interested in the modern dilemma of the loss of meaning Joseph Vining invites us to reconsider law as a unique form of thought inseparably connected to everything in the world that makes up human identity Oliver Wendell Holmes asserted at the end of the nineteenth century that human law is ultimately a phenomenon in quantitative relations to its causes and effects and many have been left with an impression of law as a set of processes and rules Vining takes issue with this and with various reductionist attempts in scientific thought today to express the universe in a single mathematical description of forces as well as with post structuralist speculation that there are no valid truth claims and that human interaction can be reduced to analysis of power relationships Law he argues is an independent discourse not reducible to any other that exists

only in human interaction and reflects continuing human worth Vining's search to reinstate the spiritual dimension in public discourse brings him head on with a wide array of powerful academic forces linguistics theory political science the new historicism and the traditional teaching of law This book consists of a collection of what Vining calls amplifications of the implied text of the law impressions commentaries vignettes poems and dialogues which illustrate aspects of conventional legal language and logic and the subjects legal practice regularly deals with such as promises death and crime Throughout we see that law reaches deeply into the way we know ourselves and other persons all of whom speak through law as law connects language to person and person to action The texts generated by legal method constitute the living record of social acquaintance and contest speaking across cultures and across centuries It is the close reading of legal texts and contexts Vining argues that provides the present source of the transcendental in modern secular life But unlike the other academic arts of interpretation law alone is directly connected with the most real the most particular and at the same time the most universal facts of social life From Newton's Sleep casts doubt on the certainties past and present and creates new grounds for skepticism and conviction The fragmentary form of the book mirrors its subject It is intended to be picked up and read as occasion allows by lawyers and anyone interested in law Democratic Culture and Moral Character Jerome

Braun, 2013-06-03 This book returns critical theory to its roots in both psychology and the social sciences It shows some of the relationships between equality in a political and social sense and personal identity that either relates well to such equality or rebels against it All this reflects processes of social and cultural influence that involve not only random change but also processes of social and cultural evolution that themselves have effects regarding potentials for self fulfillment and even public morality This book provides a framework to help one study the interaction between individual aspirations and social opportunities Jerome Braun known for his writings in interdisciplinary social science an approach he calls pragmatic critical theory here provides a book that discusses issues relevant to the moral underpinnings of democratic society including issues of social evolution and of culture and personality This book will be of particular interest to scholars and students of Psychology particularly in the areas of Psychology of Personality and Cultural Psychology Sociology especially those interested in Sociology of Alienation and Sociology of Culture as well as Sociology of Mental Health Anthropology particularly in the area of Psychological Anthropology Cultural Studies and Social Theory in general **Companion Encyclopedia of**

Nature, God and Humanity Richard L. Fern, 2002-04-04 Nature God and Humanity clarifies the task of forming an ethics of nature thereby empowering readers to develop their own critical faith based ethics Calling on original thought provoking analyses and arguments Richard L Fern frames a philosophical ethics of nature assesses it scientifically finds support for it in traditional biblical theism and situates it culturally Though defending the moral value of beliefs affirming the radical Otherness of God and human uniqueness this book aims not to compel the adoption of any particular ethic but rather illumine the contribution diverse forms of inquiry make to an ethics of nature How does philosophy clarify moral conviction What does science tell us about nature Why does religious faith matter Rejecting the illusion of a single rationally compelling ethics Fern answers these questions in a way that fosters both agreement and disagreement allowing those holding conflicting ethics of nature to work together for the common good

The Analogy of Love Gary Chartier, 2015-11-09 This book offers an overview of Christian theology organized around the twin themes of divine and human love The book covers the traditional theological topics as well as basic questions of theological method It seeks to integrate a focus on love throughout While love is regularly canvassed as a dominant theme in Christian thought it has rarely been the focus of Christian theological construction or a constraint on theological formulation The book seeks to suggest chapter by chapter how a given topic relates to the broad theme of love The book is written in a way designed to make it accessible to university students and educated laypersons At the same time it takes positions on controverted scholarly issues and the methodological approach outlined at the beginning will be of interest to academic theologians

Christianity and the Disciplines Mervyn Davies, Oliver D. Crisp, Gavin D'Costa, Peter Hampson, 2012-11-02 This volume will show how various intellectual disciplines most found within the modern university can learn from theology and philosophy in primarily methodological and substantive terms It will explore the possible ways in which current presuppositions and practices of the discipline might be challenged It will also indicate the possibilities of both a Christian

Culture in relation to that discipline or the way in which that discipline might look within a real or theoretical Christian university
