The Role of Civil Society in Africa's Quest for Democratization Abadir M. Ibrahim, 2016-12-08 This book tests many of the assumptions hypotheses and conclusions connected with the presumed role of civil society organizations in the democratization of African countries Taking a comparative approach it looks at countries that have successfully democratized those that are stuck between progress and regression those that have regressed into dictatorship and those that are currently in transitional flux and evaluates what role if any civil society has played in each instance The countries discussed South Africa Ghana Nigeria Ethiopia Egypt and Tunisia represent a diverse set of social and political circumstances and different levels of democratic achievement providing a rich set of case studies Each sample state also offers an internal comparison as each has historically experienced different stages of democratization Along the course of each case study the book also considers the effect that other traditionally studied factors such as culture colonization economic development and foreign aid may have had on individual attempts at democratization The first extensive work on civil society and democratization in Africa the book adds new insights to the applicability of democratization theory in a non Western context both filling a gap in and adding to the existing universal scholarship This book will be useful for scholars of political science economics sociology and African studies as well as human rights activists and policy makers in the relevant geographical areas

**Civil Society & Development** Jude Howell, Jenny Pearce, 2001 Setting out to explore critically the way civil society has entered development thinking policy and practice as a paradigmatic concept of the 21st century Howell development studies U of Sussex and Pearce Latin American politics U of Bradford trace the historical path leading to the encounter between the ideas of development and civil society in the late 1980s and how donors have translated these into development policy and programs They find that there are competing normative visions which have deep roots in Western European political thought about the role of civil society in relation to the state and market both among donors and within the societies where donors are operating This leads to donors playing a major role in shaping the character of service provision They also argue that their study exposes the hitherto unexplored power of the market as opposed to solely the state to distort donor programs c Book News Inc

**Civil Society, Democratization and the Search for Human Security** Duncan McDuie-Ra, 2009 This book examines the relationship between civil society and human security in the Indian state of Meghalaya part of the region known as Northeast India Civil society has been revived over the last two decades and is now one of the key concepts in development politics and international aid The concept has gained particular significance as part of attempts to analyse and instigate grassroots democratisation through widespread political participation This is seen as enabling a broader range of issues to be politicised and made a part of political agendas at the local national and global

levels However there are few studies that examine the constraints on civil society at the local level even in contexts where civil society may appear to be active and vibrant Those studies that do exist tend to focus on the constraints coming from the state overlooking the constraints that come from within civil society itself During the same period human security has gained prominence as a challenge to state centric conceptions of security and as an alternative approach to development by focusing on the security and insecurity of groups and individuals The concept has been taken up by international organisations development agencies and bilateral donors as a more effective way to understand the difficulties people face in their everyday lives that go beyond conventional categories and indicators In order for those experiencing insecurity to identify and contest the causes of insecurity participation in civil society is necessary

*Civil Society in Asia* Wayne Hudson, 2024-11-01 In East and Southeast Asia the creation of civil society is a crucial yet most difficult issue Europeans have had the luxury of centuries in a slow moving world characterised by weak governments in which the foundation institutions norms and values of civil society could ferment and develop Asia however faces this task when a nation's currency can devalue in seconds destabilising its government and when states have far more effective means of surveillance suppression and terror This book examines these issues and shows that a better understanding of civil society in the Asian context is central to promoting contemporary political social and economic reform in Asia It will appeal to students and teachers of politics law and sociology because it provides new perspectives on how to understand civil society drawing on Asian examples as well as indications for rethinking what civil society means in Asia Individual chapters combine theoretical and empirical issues in a way which fills a major gap in the literature Henceforth works about civil society will need to take more account of the Asian evidence and Asianists will need to have a clear idea of what civil society in Asia means

Press,2017-03-02 An innovative study that examines how peaceful domestic tactics by individual human rights activists and organizational activists with public support can force an authoritarian regime to make key concessions Robert Press explores the creation and impact of a culture of resistance He examines how domestic pressure can be more important than foreign pressure for political reform especially in underdeveloped authoritarian states This study of contemporary Kenya fills a gap in traditional social movement theory to show how a resistance movement actually starts Contrary to long dominant theory the book shows how the initiative for such a movement can come from activists themselves in the face of severe obstacles in society With its unique findings on the effects of individual activism and peaceful resistance this book will attract a broad audience in the study and practice of international relations comparative politics sociology interest groups peace and conflict and human rights      **Rethinking Civil Society in Transition** Ester Sigillò,2025-10-01 This book illustrates the results of ethnographical research designed to shed light on the notion of civil society in a context characterized by the transformation of power relations Such

transformation is given by shifting resources renewed local and international opportunities and a general reframing of goals and objectives The academic literature has usually relied on a substantialist understanding of the notion of civil society referring to the latter as something that exists a priori or does something This volume relies instead on a relational approach where civil society becomes the name we give to a host of complex interactions in which local associations are involved in a time of reconfiguration of power relations Building on this approach this volume analyses the relational dynamics affecting Tunisian associations after the fall of the authoritarian regime in 2011 and their implications for the changing political order Findings show two main interrelated trends the nationwide professionalization of local associations and the localized networking strategies of various socio political categories crossing the associational sector The book shows how their members understand the standardization of local associations as a strategy to have guaranteed access to the public sphere and therefore to influence the changing political order
