**Civilian-military Relations in Brazil, 1889-1898** June Edith Hahner, 1969      **The Political Economy of the Brazilian State, 1889-1930** Steven Topik, 1987-07-01 In this first overview of the Brazilian republican state based on extensive primary source material Steven Topik demonstrates that well before the disruption of the export economy in 1929 the Brazilian state was one of the most interventionist in Latin America This study counters the previous general belief that before 1930 Brazil was dominated by an export oligarchy comprised of European and North American capitalists and that only later did the state become prominent in the country's economic development Topik examines the state's performance during the First Republic 1889 1930 in four sectors finance the coffee trade railroads and industry By looking at the controversies in these areas he explains how domestic interclass and international struggles shaped policy and notes the degree to which the state acted relatively independently of civil society Topik's primary concern is the actions of state officials and whether their decisions reflected the demands of the ruling class He shows that conflicting interests of fractions of the ruling class and foreign investors gradually led to far greater state participation than any of the participants originally desired and that the structure of the economy and of society not the intentions of the actors best explains the state's economic presence      *Civil-military Relations*, 1993      **The Military in Brazilian Politics, 1821-1970** Raymond Estep, 1971      Minas Gerais in the Brazilian Federation, 1889-1937 John D. Wirth, 1977 One of three independent but coordinated studies on Brazilian regionalism this book examines the complex dynamics of state level and political structures in the politically important state of Minas Gerais      Fear and Memory in the Brazilian Army and Society, 1889-1954 Shawn C. Smallman, 2003-04-03 For more than half a century the Brazilian army used fear and censorship to erase aspects of its history from public memory and to create its own political myths Although the military had remarkable success in promoting its version of events recent democratization has allowed scholars access to new materials with which to challenge the official story Drawing on oral histories secret police documents memoirs of dissident officers army records and other sources only recently made available Shawn Smallman crafts a compelling revisionist interpretation of Brazil's political history from 1889 to 1954 Smallman examines the topics the Brazilian military wished to obscure racial politics and terror campaigns institutional corruption and civil military alliances political torture and personal rivalries to understand the army's growing involvement in civilian affairs Among the myths he confronts are the military's idealized rendition of its racial policies and its portrayal of itself as above the corruption associated with politicians His account not only illuminates the origins of the military government's repressive and often brutal actions during the 1960s and 1970s but also carries implications for contemporary Brazil as the armed forces debate their role in a democratic country      **Patronage and Politics in Nineteenth-Century Brazil** Richard Graham, 1994-08-01 Focusing on the period from 1840 to 1889 one of the leading historians on Brazil explores the specific ways in which granting protection official positions and other favors in exchange for

political and personal loyalty worked to benefit the interests of wealthy Brazilians

Raimo Väyrynen: A Pioneer in International Relations, Scholarship and Policy-Making Raimo Väyrynen, 2023-01-03

This book provides a broad overview of Professor Raimo Väyrynen's academic work, his role in international research organizations, and his contributions to policy debates. It offers an interesting review of important political issues during the time span of half a century from disarmament in Europe to the changing relationship between state sovereignty and transnational forces. Väyrynen has dealt with the changing agenda of peace and international relations, security, and the arms race and the world economy. This book provides comprehensive analyses of the regional and systemic structure of international relations with the emphasis on conflicts and warfare between nations. It argues that while states, even smaller ones, still matter, transnational issues are increasingly important. Taking a historical perspective, the articles suggest that large-scale violence and arms races have been recurrent and cyclical phenomena in international relations. These events reflect the deep-seated inequalities in the political and economic systems, which moreover vary considerably between regions. The publication is important reading for any researcher as well as students, policy makers, and the science-oriented public at large. It traces the changing agenda of international relations from disarmament and the world economy to the changing relationship between state sovereignty and transnational forces. It provides analyses of the regional and systemic structure in international relations with the emphasis on conflicts and warfare. It argues that large-scale violence and the arms race have been recurrent and cyclical phenomena in international relations. It reviews important political issues from peace and conflict in Europe to the changing power relationship in the world.

*The Military in Politics* Alfred C. Stepan, 2015-03-08

The nature of the military institution in Brazil, its relations with civilian governments up to 1964, and its use of power since the coup of that year are examined by Alfred Stepan. Throughout his study, while looking at the Brazilian experience, he tests and reformulates implicit and explicit models, propositions, and middle-range hypotheses in the literature of civil-military relations and in political development theory. Professor Stepan's analysis suggests that many of the expectations and hypotheses held by theoreticians and policymakers about the capabilities of the military in modernization need to be seriously qualified. His discussion of the socio-economic origins and career patterns of the officer corps and of the ideological changes within the Brazilian army makes extensive and systematic use of previously unexploited data. Brazilian military academy files, editorials, interviews with military and civilian leaders, throughout the experiences of Asian and African countries, are compared to that of Brazil, thus providing a wide comparative framework.

Yesterday's Soldiers Frederick M. Nunn, 1983-01-01 Between 1980 and World War II South America experienced the unsettling first stages of modernization During this half century of economic political and social change the armies of Argentina Brazil Chile and Peru underwent a process of professionalization as European military missions transformed their officer corps into copies of French and German officialdom In so doing European officers inculcated their ideals and values thought and self perception their professionalism in countries historically vulnerable to militarism Based mainly on a comprehensive examination of European and South American military literature this study describes the significant contribution of European military professionalism to South American professional militarism Nunn not only details the workings of the French missions in Brazil and Peru and the German missions in Argentina and Chile but gives great emphasis to the themes and topics that most concerned the European mentors and their overseas disciples He demonstrates convincingly that much of their professional literature was based on a yearning for an idealized past discontent with an unsatisfactory present and apprehension about a future that might threaten the most cherished of traditional officer corps principles and aims The study ends with World War II yet it makes an important contribution to our understanding of South

American history since 1940 The military organizations of the four countries considered here confronted what they perceived to be the major problems of their modernizing nations with solutions learned from their European teachers Since 1940 they have resorted to golpes de estado most notably the post 1964 institutional golpes in order to impose forcibly some of those same solutions Thus despite increased U S influence many of the programs implemented by military regimes in the latter half of this century bear the indelible stamp of yesterday s soldiers

*Class Mates* Andrew J. Kirkendall,2002-01-01 This innovative study considers how approximately seven thousand male graduates of law came to understand themselves as having a legitimate claim to authority over nineteenth century Brazilian society during their transition from boyhood to manhood While pursuing their traditional studies at Brazil s two law schools the students devoted much of their energies to theater and literature in an effort to improve their powers of public speaking and written persuasion These newly minted lawyers quickly became the magistrates bureaucrats local and national politicians diplomats and cabinet members who would rule Brazil until the fall of the monarchy in 1889 Andrew J Kirkendall examines the meaning of liberalism for a slave society the tension between systems of patriarchy and patronage and the link between language and power in a largely illiterate society In the interplay between identity and state formation he explores the processes of socialization that helped Brazil achieve a greater measure of political stability than any other Latin American country
