Civilized Life in the Universe George Basalla,2006-01-19 This book is a selective and fascinating history of scientific speculation about intelligent extraterrestrial life From Plutarch to Stephen Hawking some of the most prominent western scientists have had quite detailed perceptions and misperceptions about alien civilizations Johannes Kepler fresh from transforming astronomy with his work on the shape of planetary orbits was quite sure alien engineers on the moon were excavating circular pits to provide shelter Christiaan Huygens the most prominent physical scientist between Galileo and Newton dismissed Kepler's speculations but used the laws of probability to prove that planetarians on other worlds are much like humans and had developed a sense of the visual arts Carl Sagan sees clearly that Huygens is a biological chauvinist but doesn't see as clearly that he Sagan may be a cultural technological chauvinist when he assumes aliens have highly developed technology like ours but better Basalla traces the influence of one speculation on the next showing an unbroken but twisting chain of ideas passed from one scientist to the next and from science to popular culture He even traces the influence of popular culture on science Sagan always admitted how much E R Burroughs' Martian novels influenced his speculations about Mars Throughout Basalla weaves his theme that scientific belief in and search for extraterrestrial civilizations is a complex impulse part secularized religious and part anthropomorphic He questions the common modern scientific reasoning that life converges on intelligence and intelligence converges on one science valid everywhere He ends the book by agreeing with Stephen Hawking usually a safe bet that intelligence is overrated for survival in the universe and that we are most likely alone

Life at the Extremes Frances Ashcroft,2002-03-18 Explores the limits of human survival and the physiological adaptations that enable us to exist under extreme conditions The author reviews limits to human life underwater at high altitudes at high speeds at micro levels and at freezing and hot temperatures

Argo Bernard Smith,2004-08 Jason Steele has no time to lose He has managed to achieve a position of power at a young

age But even this success is not enough He has higher ambitions and feels an urgent need to hurry And with the sudden arrival of a spaceship signaling to the political powers of earth his chance has arrived Now all he has to do is convince the President he can captain the ship then get a crew he can trust and battle for the future of earth and his crew Argo is a science fiction work with humor adventure and a fast pace This ARGO travels through space but it finds adventure in the same manner as its namesake **Book Review Digest** ,2000 **Dead Seas** Taras Grescoe,2009 Explores the impact we are having on sea life by overfishing This book draws our attention to some of the ethical choices we can make

Undomesticated Ground Stacy Alaimo,2019-01-24 From Mother Earth to Mother Nature women have for centuries been associated with nature Feminists troubled by the way in which such representations show women controlled by powerful natural forces and confined to domestic space have sought to distance themselves from nature In Undomesticated Ground Stacy Alaimo issues a bold call to reclaim nature as feminist space Her analysis of a remarkable range of feminist writings as well as of popular journalism visual arts television and film powerfully demonstrates that nature has been and continues to be an essential concept for feminist theory and practice Alaimo urges feminist theorists to rethink the concept of nature by probing the vastly different meanings that it carries She discusses its significance for Americans engaged in social and political struggles from for example the Indian Wars of the early nineteenth century to the birth control movement in the 1920s to contemporary battles against racism and heterosexism Reading works by Catherine Sedgwick Mary Austin Emma Goldman Nella Larsen Donna Haraway Toni Morrison and others Alaimo finds that some of these writers strategically invoke nature for feminist purposes while others cast nature as a postmodern agent of resistance in the service of both environmentalism and the women s movement By examining the importance of nature within literary and political texts this book greatly expands the parameters of the nature writing genre and establishes nature as a crucial site for the cultural work of feminism *Rights, Wrongs and Responsibilities* M. Kramer,2001-10-10 In this wide ranging investigation of many prominent issues in contemporary legal and political philosophy eight distinguished philosophers and legal theorists including Matthew Kramer Hillel Steiner Antony Duff Sandra Marshall Wilfrid Waluchow and Nicholas Bamforth tackle issues such as the rights of animals and foetuses the relationship between law and politics the requirements of justice the demands of practical rationality the role of public policy considerations in legal reasoning the fundamental characteristics of legal and moral entitlements the appropriateness of compensation as a means of rectifying mishaps and misdeeds the extent of individuals responsibility for the consequences of their choices and the culpability of failed attempts to commit crimes Together the eight principal essays in *Rights Wrongs and Responsibilities* shed philosophical light on public law criminal law and most areas of private law as they explore the bearings of the three key concepts in the volume s title Discover ,2000 *American Scientist* ,1998 Oceans '99 MTS/IEEE ,1999 *Ireland's Ocean* Michael Viney,Ethna Viney,2008 Ireland s ocean neighbourhood is both intimate and vast from the pools and kelp forests of the shores to the distant canyons and

precipices of the continental shelf a territory now mapped by the National Seabed Survey Among its discoveries are astonishing deep sea coral reefs teeming with diversity part of the hidden landscape explored in these pages The ocean species and ecosystems lives as microscopic as plankton as majestic as sharks and whales are introduced and described as are the challenges that face both the fish and their human predators BOOK JACKET [The Publishers Weekly](#) ,2002

The Theosophist ,1890 **Yearbook of Science and the Future** ,1999 **The Boston Globe Index** ,1998 *Book Review Index* ,2003 Vols 8 10 of the 1965 1984 master cumulation constitute a title index **Canadian Periodical Index** ,2000 Biblical Creation versus Darwinian Evolution Dr. Gary G. Cohen,2024-11-18 All truth is God s truth so the believer need not fear Eventually true biblical interpretation and true scientific knowledge will harmonize Thus this book attempts to harmonize true modern scientific discoveries with careful biblical interpretation It magnifies our Creator Some on both sides will frown disliking our arguments against Darwinian evolution while on the other side of the aisle some believers will likewise not at first accept some of our suggestions on the interpretation of some verses Don t put the book down Keep reading Remember that Jesus said And no man puts new wine into old bottles Mark 2 22 If you read this book you will hopefully learn many new things about the human body animal classification astronomy history paleontology and logic This book is written for the believer who loves God and the Bible but is perplexed by the advocacy in schools and in literature pushing evolution and excluding all mention of God or intelligent design It attempts to show 1 the impossibility of godless evolution 2 the evidence for God being the creator of our world and 3 the harmony between the Bible and true modern scientific knowledge 2
