Beyond Civilization to Post-civilization Peter Baofu,2006 Original Scholarly Monograph Practicing Transcendence Christopher Peet,2019-06-05 This book introduces readers to the concept of the Axial Age and its relevance for a world in crisis Scholars have become increasingly interested in philosopher Karl Jaspers thesis that a spiritual revolution in consciousness during the first millennium BCE decisively shaped world history Axial ideas of transcendence develop into ideologies for world religions and civilizations in turn coalescing into a Eurasian world system that spreads

globally to become the foundation of our contemporary world. Alongside ideas and ideologies the Axial Age also taught spiritual practices critically resisting the new scale of civilizational power. In small counter cultural communities on the margins of society they turn our conscious focus inward to transform ourselves and overcome the destructive potentials within human nature. Axial spiritualities offer humanity a practical wisdom, a profound psychology and deep hope to transform despair into resilience helping us face with courage the ecological and political challenges confronting us today.

Have you ever wondered what could happen when we discover another communicating species outside the Earth? This book addresses this question in all its complexity. In addition to the physical barriers for communication such as the enormous distances where a message can take centuries to reach its recipient, the book also examines the biological problems of communicating between species, the problems of identifying a non Terrestrial intelligence and the ethical, religious, legal and other problems of conducting discussions across light years. Most of the book is concerned with issues that could impinge on your life: how do we share experiences with ETI? Can we make shared laws? Could we trade? Would they have religion? The book addresses these and related issues, identifying potential barriers to communication and suggesting ways we can overcome them. The book explores this topic through reference to human experience through analogy and thought experiment while relying on what is known to date about ourselves, our world and the cosmos we live in. **Civilization, Nation and Modernity in East Asia** Chih-Yu Shih, 2012-06-25. This book explores the crisis of cultural identity which has assaulted Asian countries since Western countries began to have a profound impact on Asia in the nineteenth century. Confronted by Western civilization and by modernity, Asian countries have been compelled to rethink their identity and to consider how they should relate to Western civilization and modernity. The result, the author argues, has been a redefining by Asian countries of their own character as nations and an adaptation of civilization and modernity to their own special conditions. Asian nations, the author contends, have thereby engaged with the West and with modernity but on their own terms, occasionally and in various inconsistent ways, in which they could assert a sense of difference, forcing changes in the Western concept of civilization. Drawing on postmodern theory, the Kyoto School, Confucian and other traditional Asian thought and the actual experiences of Asian countries, especially China and Japan, the author

demonstrates that Asian countries redefining of the concept of civilization in the course of their quest for an appropriate postmodern national identity is every bit as key a part of the rise of Asia as economic growth or greater international political activity

Being After Rousseau Richard L. Velkley, 2002-04-02 In *Being after Rousseau* Richard L Velkley presents Jean Jacques Rousseau as the founder of a modern European tradition of reflection on the relation of philosophy to culture a reflection that calls both into question Tracing this tradition from Rousseau to Immanuel Kant Friedrich Schelling and Martin Heidegger Velkley shows late modern philosophy as a series of ultimately unsuccessful attempts to resolve the dichotomies between nature and society culture and civilization and philosophy and society that Rousseau brought to the fore The Rousseauian tradition begins for Velkley with Rousseau s criticism of modern political philosophy Although the German Idealists such as Schelling accepted much of Rousseau s critique they believed unlike Rousseau that human wholeness could be attained at the level of society and history Heidegger and Nietzsche questioned this claim but followed both Rousseau and the Idealists in their vision of the philosopher poet striving to recover an original wholeness that the history of reason has distorted

Collected Philosophical Essays John O'Loughlin,2022-03-16 As John O Loughlin s mature works became increasingly aphoristic and hence to his mind increasingly metaphysical with what he would regard as truth effectively eclipsing the fumblingly discursive nature of essays and indeed knowledge generally he totally abandoned both the essays as here and the dialogues published in a separate collective volume together with such early aphoristic material that at least had the merit so far as he was concerned of anchoring him in a more genuine approach to philosophy than could ever be found in works of a philosophical nature diluted by prose and hence by a discursive want of both logic and system unworthy in his estimation of true philosophy Nonetheless the reader will be aware that philosophical essays are still distinct from literary prose all the more so when as in this volume and various others the material has been centred the better to intimate of a sort of metaphysical aloofness from the pedament slaving world which customarily fights shy in the angularity of its untransvaluated nature of anything resembling no matter how metaphorically the curvilinear subjectivity of a dome particularly when intimating in true religious vein of transcendental possibility a possibility very much a part of the best of the essays included in this one volume presentation spanning the years 1977 84 of John O Loughlin s literary output A Centretruths Editorial

To Become a God Michael J. Puett,2020-10-26 Evidence from Shang oracle bones to memorials submitted to Western Han emperors attests to a long lasting debate in early China over the proper relationship between humans and gods One pole of the debate saw the human and divine realms as separate and agonistic and encouraged divination to determine the will of the gods and sacrifices to appease and influence them The opposite pole saw the two realms as related and claimed that humans could achieve divinity and thus control the cosmos This wide ranging book reconstructs this debate and places within their contemporary contexts the rival claims concerning the nature of the cosmos and the spirits the proper demarcation between the human and the divine realms and the types of power that humans and spirits can exercise It is often claimed that the

worldview of early China was unproblematically monistic and that hence China had avoided the tensions between gods and humans found in the West By treating the issues of cosmology sacrifice and self divinization in a historical and comparative framework that attends to the contemporary significance of specific arguments Michael J Puett shows that the basic cosmological assumptions of ancient China were the subject of far more debate than is generally thought *Comparative Civilizations and Multiple Modernities* Shmuel N. Eisenstadt, 2022-11-07 This collection of essays provides an analysis of the dynamics of Civilizations The processes of globalization and of world history are described from a comparative sociological point of view in a Weberian tradition These essays were written between 1974 and 2002 by one of the most eminent sociologists of today The print edition is available as a set of two volumes 9789004129931
