The Genesis Column W. Joseph Stallings,2018-08-08 It is the assertion of Old Earth Creationism that God created the Earth and then made it into an inhabitable environment over the course of a week of epoch long creation days It is the assertion of modern science that the Earth is 4 6 billion years old and has reached such an age by passing through a number of geologic periods that are differentiated by stratigraphic paleontological and other empirical markers Therefore it seems very logical that if one holds to the veracity of these two basic assertions then the long creation days of Genesis and the geologic ages of modern science can and should be effectively correlated with one another in some cohesive and systematic manner Here we offer our origins correlation model The Genesis Column which does just that

Hearings United States. Congress. House,1952 **The Folly of War** Donald E. Schmidt,2005 The Folly of War is a hard hitting critical analysis of American wars in the 20th century that set a pattern for the early 21st century Drawing on a wide range of sources and rigorously marshaling the facts the book concludes that these wars have been futile unnecessary and foolish Rejecting the Left s contention that American foreign policy has been driven by greedy corporate interests the author starts from the premise that average Americans have supported these wars out of a will to do good but have failed in that aim and in the process done much harm This is a disturbing book that raises questions about how we go to war how we fight wars and how we eventually lose wars Many Americans viewed the military defeat in Vietnam as an aberration interrupting a string of foreign military successes This book sees that tragedy as part of a line of politically reckless engagements Driven by a proud self assurance that is often termed American exceptionalism the nation arms itself to the teeth and intrudes into every region pacing on a treadmill of perpetual war to achieve perpetual peace Writing Chapter 13 The War on Terror The Contrived War in 2003 just as the Bush administration was making its fateful decision to invade Iraq Schmidt concluded at that time that the discussion among the principals Bush Cheney Rumsfeld Rice Powell etc was stacked with faulty information and the decision was made on an emotional level rather than a rational one Further he predicted that nothing good would come of the Iraq venture unfortunately that assessment was correct One of the officials in the Bush White House who participated in the pre war discussions admitted the attack was irrational The only reason we went into Iraq is we were looking for somebody s ass to kick Afghanistan was too easy Days of Fire Bush and Cheney in the White House by Peter Baker p 191 Doubleday 2013 At the end of seven major wars and after one million American soldiers have been killed we are no closer to the perfect security we seek Chinese Culture, Western Culture Tai Ng,2007-02 This book explores how complementary Chinese and Western cultures are how they should learn from each other to establish a dynamic balance and

how institutions need constant redefinition and renewal in order to prosper By studying the history and development of thought and philosophy in these cultures it suggests lessons from our past that may shed light on current events and help us in handling future challenges The book presents answers to the following important questions Do Chinese people think differently from Westerners and if so how and why What are the key differences between Chinese and Western culture and why How did China become the most technologically advanced and sociologically sophisticated nation in the world until the seventeenth century and why did it ultimately decline What are the key characteristics of political institutions in historical China and Europe and how were they significant In this postmodern time and era of globalization what can we learn from Chinese culture and experiences As China rapidly industrializes what can it learn from the West without repeating some of the mistakes that Europeans and North Americans made in their periods of industrialization Science and Technology in World History, Volume 4 David Deming, 2016-04-05 The history of science is a story of human discovery intertwined with religion philosophy economics and technology The fourth in a series this book covers the beginnings of the modern world when 16th century Europeans began to realize that their scientific achievements surpassed those of the Greeks and Romans Western Civilization organized itself around the idea that human technological and moral progress was achievable and desirable Science emerged in 17th century Europe as scholars subordinated reason to empiricism Inspired by the example of physics men like Robert Boyle began the process of changing alchemy into the exact science of chemistry During the 18th century European society became more secular and tolerant Philosophers and economists developed many of the ideas underpinning modern social theories and economic policies As the Industrial Revolution fundamentally transformed the world by increasing productivity people became more affluent better educated and urbanized and the world entered an era of unprecedented prosperity and progress
