101 Things to Do with a Stone Circle Geoff Holder,2009 This is not a book about the prehistoric peoples who built the stone circles Rather it is light hearted look at the weird and wonderful uses that these circles have been put to through the ages This strange and fascinating list of uses ranges from murder to the site of a rock concert Discover how some circles were used for sex and promoting fertility another for preventing pregnancy and how these sites have been associated with fairies witches the Devil UFOs space aliens and visionary experiences amongst other things In this unique guide by Geoff Holder major sites such as Stonehenge and Avebury rub shoulders with comparatively little known circles As well as stone circles the book includes single standing stones burial cairns prehistoric rock art and carved Pictish stones The Use and reuse of stone circles Courtney Nimura,Richard Bradley,2016-09-30 The study of stone circles has long played a major role in British and Irish archaeology and for Scotland most attention has been focused on the large monuments of Orkney and the Western Isles Several decades of fieldwork have shown how these major structures are likely to be of early date and recognized that that smaller settings of monoliths had a more extended history Many of the structures in Northern Britain were reused during the later Bronze Age the Iron Age and the early medieval period A series of problems demand further investigation including when were the last stone circles built How did they differ from earlier constructions How were they related to henge monuments especially those of Bronze Age date How frequently were these places reused and did this secondary activity change the character of those sites This major new assessment first presents the results of fieldwork undertaken at the Scottish recumbent stone circle of Hillhead the stone circles of Waulkmill and Croftmoraig the stone circle and henge at Hill of Tuach at Kintore and the small ring cairn at Laikenbuie in Inverness shire Part 2 brings together the results of these five projects and puts forward a chronology for the construction and primary use of stone circles particularly the Chalcolithic and Bronze Age examples It considers the reuse of stone circles long after they were built and discusses four neighboring stone circles in Aberdeenshire which display both similarities and contrasts in their architecture use of raw materials associated artefacts and structural sequences Finally a reassessment and reinterpretation of Croftmoraig and its sequence is presented the new interpretation drawing attention to ways of thinking about these monuments which have still to fulfill their potential *Stone Circles in Britain* David J. Evans,2024-10-15 This fascinating picture of this important legacy from the prehistory of Britain will be of interest to all those who have seen and visited these mysterious structures
