

## THE GROUP-AS-A-WHOLE APPROACH IN FOULKSIAN GROUP ANALYTIC PSYCHOTHERAPY

Malcolm Pines

*The group analytic group-as-a-whole approach of Foulkes privileges the concept of the group matrix. The term matrix is a metaphor for "the network of all individual mental processes, the psychological medium in which they meet, communicate, and interact." The developing group matrix acts both as a container and as a holding environment for the psychic processes of the individual members in the group context. The concept of coherency is evoked to describe the process of the developing capacity of a group to be therapeutic. The concept of coherency is applied both to conscious and to unconscious mental process.*

I shall organize my discussion around the theme of coherency, which I define as "the meaningful organization of parts that make a whole." I hope to make my reasons for doing so clear and to show that the concept of coherency underlines and informs the concept of wholeness, which is intrinsic to the concept of the group-as-a-whole.

Psychodynamic processes represent effort to make the organization of the psychotherapeutic situation meaningful, therefore coherent. We take as our data the set-up of patient and therapist.

In psychoanalysis the enterprise to un-cover and dis-cover underlining meanings in the psychoanalytic discourse produced by the basic rule of free association is governed by a conviction that it is possible to raise, apparently at random, associations originating from a deeper level of consciousness, closer to the primary process, than to the higher levels of secondary process organization, therefore of coherency.

We ask our patients to tell us their life stories, that is, we join them in a narrative enterprise. When the life story of the patient fails to present a mysterious incoherence, Freud regarded this as a sign that the neurotic process was not present. As therapists we assume that a person's life has a story, that the narrative will include both the self and significant others, that there will be beginnings, middles and endings, causes, sequences, and some sense of purpose. The defenses of our patients may range from the presentation to us of an apparently complete story that has the effect of knocking the beginning of a new story, the therapeutic enterprise; other patients will come with no

## **Circular Reflections Selected Papers Of Malcolm Pines:**

*Foundations and Applications of Group Psychotherapy* Mark F. Ettin, 1992      **The Journey from Psychoanalysis to Group Analysis** Malcolm Pines, 2025-05-20

The Journey from Psychoanalysis to Group Analysis presents a selection of papers from Malcolm Pines's long career documenting his profound contribution to group analysis and its applications. John Schlapobersky, editor, is a well-established author who organised the collection in *History Development of Method Metapsychology Neurology Final Papers*. The compilation distils the life's work of a pioneer in many fields: psychiatrist, psychoanalyst, group analyst, editor, and author. Pines's writing encompasses psychoanalytic and group analytic theory, developmental psychology, neuroscience, ethology, social science, language theory, and mythology. He seeks their integration in the crucible of group analysis. The book will become an essential text in psychotherapy and therapeutic communities of value to students and readers in psychoanalysis and psychotherapy, politics, social and neurological sciences, humanities, and language theory.

**From the Couch to the Circle** John Schlapobersky, 2016-02-05

Recipient of the 2017 Anne Alonso Award for Excellence in Psychodynamic Group Therapy conferred by the Group Foundation for Advancing Mental Health, part of the American Group Psychotherapy Association. *From the Couch to the Circle: Group Analytic Psychotherapy in Practice* is a handbook of group therapy and a guide to the group analytic model, the prevailing form of group therapy in Europe. The book draws on both John Schlapobersky's engagement as a practitioner and the words and experience of people in groups as they face psychotherapy's key challenges: understanding and change. This book provides a manual of practice for therapists use that includes detailed descriptions of groups at work, accounts of therapists' own experience, and the issues they face in themselves and in their groups. The book is devoted to the Group Analytic model, but the other principally psychodynamic models of group therapy—the Tavistock, Interpersonal, Psychodynamic, Modern Analytic, and Structural Systemic models—are brought into a comparative discussion and drawn upon to create an integrated and coherent approach. The book is divided into three sections: Foundations, aimed at practitioners using groups of any kind and working at every level, including those providing supportive psychotherapy and providing groups for psychosis, trauma, the elderly, people at risk, the elderly, and children; The Group Analytic Model, defining the group analytic model at a basic and advanced level; The Dynamics of Change, aimed at group analysts, psychotherapists, and psychologists providing short-term psychotherapy and long-term group analysis. The book is illustrated with clinical vignettes, including incisive, instructive commentaries to explain the concepts in use. It is intended for those seeking psychotherapy, whether to resolve personal problems or to find new sources of meaning in their lives. It is also intended for policy makers in mental health, students of different models of psychotherapy, and the psychosocial field. The comparative discussion running through the text about methods and models of practice will likely be of interest to the wider mental health and psychotherapy fields. The author draws together the inherited wisdom of group analysis since Foulkes' time and makes his own lasting contribution. *From the Couch to the Circle* will be an invaluable

accessible resource for psychotherapists psychoanalysts psychologists family therapists academics psychologists mental health practitioners academics and teachers in psychotherapy

**Relational Group Psychotherapy** Richard Billow, 2003-01-31 This volume reveals the deeply personal nature of the intersubjective process of group therapy as it affects the group therapist and other group members By locating the group therapist's experience in the centre of the action Richard M Billow moves away from traditional approaches in group psychotherapy

Dreams in Group Psychotherapy Claudio Neri, Malcolm Pines, Robi Friedman, 2002 This state of the art book provides help for therapists encountering a dream told in their group It covers the major theoretical perspectives for their understanding as well as representing different psychological schools and their approaches to the technical issues of group dream therapy

*Building on Bion-- Roots* Robert M. Lipgar, Malcolm Pines, 2003 This collection of papers by distinguished international contributors explores formative influences affecting Bion's emotional and intellectual development The authors revisit in depth the origins of Bion's ideas his contact with Trotter and his later work with the Tavistock Clinic and psychoanalysis

**A Century of Psychiatry, Psychotherapy and Group Analysis** Ronald Sandison, 2001-01-01 In a very Jungian way the writing is episodic and discursive and the whole is embellished with dreams Most readers will find something of interest I was drawn to the story of his time as a psychiatrist at Powick Hospital in the 1950s and the development of the unit treating patients with combined LSD and psychotherapy Others may relish his many examples of group work in action or the tantalizing glimpses of Louis Zinkin as his analyst in the 1980s *Journal of Analytical Psychology* This compelling book argues for the integration of medical and psychoanalytic models of the workings of the mind and applies an integrated approach to general psychiatric practice and psychotherapy Ronald Sandison looks at the seminal ideas of key figures such as Freud Jung and Foulkes and shows how they have transformed the way people perceive themselves and society He draws on his experience of over fifty years of psychiatric practice which include twenty years work in the former mental hospitals He interweaves and enriches his account with personal experiences and with his dreams This biographical material extends his concept of searching for and finding a unifying principle not only for psychiatry but also for himself Sandison challenges the exclusive use of the medical model in psychiatry arguing that psychoanalysis and its derivatives are the most effective treatments in psychiatry as they take into account the inner life of the client He shows how the prescription of clinical drugs to alleviate mental symptoms can present a barrier to the therapeutic relationship This book brings together the key ideas in psychotherapy in the last century it gives an essential overview that will enable practitioners and theoreticians to gain a deeper understanding of their own work and its significance within the development of this
