Circumpolar Religion And Ecology An Anthropology Of The North:

Circumpolar Religion and Ecology Takashi Irimoto, Takako Yamada, 1994 **Circumpolar Religion and Ecology** Takashi Irimoto, Takako Yamada, 1994 The Archaeology of Shamanism Neil S. Price, 2001 No Australian Aboriginal content **The Archaeology of Shamanism** Neil Price, 2003-12-16 In this timely collection Neil Price provides a general introduction to the archaeology of shamanism by bringing together recent archaeological thought on the subject Blending theoretical discussion with detailed case studies the issues addressed include shamanic material culture responses to dying and the dead shamanic soundscapes the use of ritual architecture and shamanism in the context of other belief systems such as totemism Following an initial orientation reviewing shamanism as an anthropological construct the volume focuses on the Northern hemisphere with case studies from Greenland to Nepal Siberia to Kazakhstan The papers span a chronological range from Upper Palaeolithic to the present and explore such cross cutting themes as gender and the body identity landscape architecture as well as shamanic interpretations of rock art and shamanism in the heritage and cultural identity of indigenous peoples The volume also addresses the interpretation of shamanic beliefs in terms of cognitive neuroscience and the modern public perception of prehistoric shamanism *Archaeologies of Sexuality* Robert A. Schmidt, Barbara L. Voss, 2005-06-28 Status age and gender have long been accepted aspects of archaeological enquiry yet it is only recently that archaeologists have started seriously to consider the role of sex and sexuality in their studies *Archaeologies of Sexuality* is a timely and pioneering work It presents a strong diverse body of scholarship which draws on locations as varied as medieval England the ancient Maya kingdoms New Kingdom Egypt prehistoric Europe and convict era Australia demonstrating the challenges and rewards of integrating the study of sex and sexuality within archaeology This volume with contributions by many leading archaeologists will serve both as an essential introduction and a valuable reference tool for students and academics **Circumpolar Animism and Shamanism** Northern Studies Association. Conference, 1997 **Khanty, People of the Taiga** Andrew Wiget, Olga Balalaeva, 2011-05-15 Drawing on nearly twenty years of fieldwork as well as ethnohistory politics and economics this volume takes a close look at changes in the lives of the indigenous Siberian Khanty people and draws crucial connections between those changes and the social cultural and political transformation that swept Russia during the transition to democracy Delving deeply into the history of the Khanty who were almost completely isolated prior to the Russian revolution the authors show how the customs traditions and knowledge of indigenous people interact with and are threatened by events in the larger world **Native Americans and the Environment** Michael Eugene Harkin, David Rich Lewis, 2007-01-01 Often cited as one of the most decisive campaigns in military history the Seven Days Battles were the first campaign in which Robert E Lee led the Army of Northern Virginia as well as the first in which Lee and Thomas Stonewall Jackson worked together **In the Way of Development** Mario Blaser, Harvey A. Feit, Glenn McRae, 2004 Authored as a result of a remarkable collaboration between indigenous people's own leaders other social

activists and scholars from a wide range of disciplines this volume explores what is happening today to indigenous peoples as they are enmeshed almost inevitably in the remorseless expansion of the modern economy and development at the behest of the pressures of the market place and government It is particularly timely given the rise in criticism of free market capitalism generally as well as of development The volume seeks to capture the complex power laden often contradictory features of indigenous agency and relationships It shows how peoples do not just resist or react to the pressures of market and state but also initiate and sustain life projects of their own which embody local history and incorporate plans to improve their social and economic ways of living

Food Sharing in Human Societies Nobuhiro Kishigami, 2022-01-01 This book explores why human beings share food with others using a humanistic anthropological approach This book provides a comparative examination of distinct features and historical changes in food sharing practices in various hunting gathering societies especially in the Inuit The author considers human nature through various human food sharing practices Food sharing is a characteristic of human behavior and has been one of the central topics in anthropological studies of hunter gatherers for a long time While anthropologists have attempted to understand it in functional historical adaptational social cultural psychological or phenomenological perspective they have failed to convincingly explain its origin variation existence or and change Recently evolutionary ecology or behavioral ecology has dominated research of the topic However neither of them adequately considers social cultural and historical factors in the analysis of human food sharing practices This book is an essential and fundamental study for every researcher interested in the relationship between human nature society and culture

Languages - Cultures - Worldviews Adam Glaz, 2019-07-12 This edited book explores languages and cultures or linguacultures from a translation perspective resting on the assumption that they find expression as linguacultural worldviews Specifically it investigates how these worldviews emerge how they are constructed shaped and modified in and through translation understood both as a process and a product The book's content progresses from general to specific from the notions of worldview and translation through a consideration of how worldviews are shaped in and through language to a discussion of worldviews in translation both in macro scale and in specific details of language structure and use The contributors to the volume are linguists linguistic anthropologists practising translators and or translation studies scholars and the book will be of interest to scholars and students in any of these fields

Nine Worlds of Seid-Magic Jenny Blain, 2003-09-02 This accessible study of Northern European shamanistic practice or seidr explores the way in which the ancient Norse belief systems evoked in the Icelandic Sagas and Eddas have been rediscovered and reinvented by groups in Europe and North America The book examines the phenomenon of altered consciousness and the interactions of seidr workers or shamanic practitioners with their spirit worlds Written by a follower of seidr it investigates new communities involved in a postmodern quest for spiritual meaning

Ainu Spirits Singing Sarah M. Strong, 2011-10-31 Indigenous peoples throughout the globe are custodians of a unique priceless and increasingly imperiled legacy of oral lore Among them the Ainu

a people native to northeastern Asia stand out for the exceptional scope and richness of their oral performance traditions Yet despite this cultural wealth nothing has appeared in English on the subject in over thirty years Sarah Strong's *Ainu Spirits Singing* breaks this decades long silence with a nuanced study and English translation of Chiri Yukie's *Ainu Shin yoshu* the first written transcription of Ainu oral narratives by an ethnic Ainu The thirteen narratives in Chiri's collection belong to the genre known as *kamui yukar* said to be the most ancient performance form in the vast Ainu repertoire In it animals and sometimes plants or other natural phenomena all regarded as spiritual beings *kamui* within the animate Ainu world assume the role of narrator and tell stories about themselves The first person speakers include imposing animals such as the revered orca the Hokkaido wolf and Blakiston's fish owl as well as the more humble Hokkaido brown frog snowshoe hare and pearl mussel Each has its own story and own signature refrain Strong provides readers with an intimate and perceptive view of this extraordinary text Along with critical contextual information about traditional Ainu society and its cultural assumptions she brings forward pertinent information on the geography and natural history of the coastal southwestern Hokkaido region where the stories were originally performed The result is a rich fusion of knowledge that allows the reader to feel at home within the animistic frame of reference of the narratives Strong's study also offers the first extended biography of Chiri Yukie 1903-1922 in English The story of her life and her untimely death at age nineteen makes clear the harsh consequences for Chiri and her fellow Ainu of the Japanese colonization of Hokkaido and the Meiji and Taisho governments policies of assimilation Chiri's receipt of the narratives in the Horobetsu dialect from her grandmother and aunt both traditional performers and the fact that no native speakers of that dialect survive today make her work all the more significant The book concludes with a full integral translation of the text

Proceedings of the Ninth Conference of the European Society for Central Asian Studies Tomasz Gacek, Jadwiga Pstrusińska, 2009-10-02 This is an important book which will greatly aid readers in their knowledge of Central Asia one of the crucial regions in the contemporary world It contains papers reflecting the interdisciplinary quality of recent research carried out in many academic institutions dealing with the region In this volume which undertakes the supreme challenge of understanding this vast area of Eurasia acknowledged experts offer their findings on such important topics as history archaeology sociology anthropology language literature religion philosophy civil society and human rights political science economics and the environment This collection undoubtedly constitutes a key gateway to study of the region through the advanced accurate and scholarly information required by contemporary academia

Unveiling the Whale Arne Kalland, 2009 Whaling has become one of the most controversial environmental issues It is not that all whale species are at the brink of extinction but that whales have become important symbols to both pro and anti whaling factions and can easily be appropriated as the common heritage of humankind This book the first of its kind is therefore not about whales and whaling per se but about how people communicate about whales and whaling It contributes to a better understanding and discussion of controversial environmental issues Why and how are issues selected How is

knowledge on these issues produced and distributed by organizations and activists And why do affluent countries like Japan and Norway still support whaling which is of insignificant economic importance Basing his analysis on fieldwork in Japan and Norway and at the International Whaling Commission the author argues how an image of a superwhale has been constructed and how this image has replaced meat and oil as the important whale commodity He concludes that the whaling issue provides an arena where NGOs and authorities on each side can unite swapping political legitimacy and building personal relations that can be useful on issues where relations are less harmonious

Animism and the Question of Life Istvan Praet, 2013-08-15 The central purpose of this book is to help change the terms of the debate on animism a classic theme in anthropology It combines some of the finest ethnographic material currently available including firsthand research on the Chachi of Ecuador with an unusually broad geographic scope the Americas Asia and Africa Edward B Tylor originally defined animism as the first phase in the development of religion The heyday of cultural evolutionism may be over but his basic conception is commonly assumed to remain valid in at least one respect there is still a broad consensus that everything is alive within animism or at least that more things are alive than a modern scientific observer would allow for e g clouds rivers mountains It is considered self evident that animism is based on a kind of exaggeration its adherents are presumed to impute life to this that and the other in a remarkably generous manner Against the prevailing consensus this book argues that if animism has one outstanding feature it is its peculiar restrictiveness Animistic notions of life are astonishingly uniform across the globe insofar as they are restricted rather than exaggerated In the modern Western cosmology life overlaps with the animate Within animism however life is always conditional and therefore tends to be limited to one's kin one's pets and perhaps the plants in one's garden Thus it emerges that our modern biological concept of life is stranger than generally thought

Coming to Shore Marie Mauzé, Michael Eugene Harkin, Sergei Kan, 2004-01-01 The Northwest Coast of North America was home to dozens of Native peoples at the time of its first contact with Europeans The rich artistic ceremonial and oral traditions of these peoples and their preservation of cultural practices have made this region especially attractive for anthropological study Coming to Shore provides a historical overview of the ethnology and ethnohistory of this region with special attention given to contemporary theoretically informed studies of communities and issues The first book to explore the role of the Northwest Coast in three distinct national traditions of anthropology American Canadian and French Coming to Shore gives particular consideration to the importance of Claude Lévi Strauss and structuralism as well as more recent social theory in the context of Northwest Coast anthropology In addition contributors explore the blurring boundaries between theoretical and applied anthropology as well as contemporary issues such as land claims criminal justice environmentalism economic development and museum display The contribution of Frederica de Laguna provides a historical background to the enterprise of Northwest Coast anthropology as do the contributions of Claude Lévi Strauss and Marie Mauzé Marie Mauzé is a senior researcher at the Centre National de la Recherche Scientifique in Paris Her books include

Present Is Past Some Uses of Tradition in Native Societies Michael E Harkin is a professor of anthropology at the University of Wyoming and the editor of *Reassessing Revitalization Movements Perspectives from North America and the Pacific Islands* Nebraska 2004 Sergei Kan is a professor of anthropology and Native American studies at Dartmouth College and author of *Memory Eternal Tlingit Culture and Russian Orthodox Christianity through Two Centuries* Us, Relatives Nurit Bird-David, 2017-02-21 Anthropologists have long looked to forager cultivator cultures for insights into human lifeways But they have often not been attentive enough to locals horizons of concern and to the enormous disparity in population size between these groups and other societies *Us Relatives* explores how scalar blindness skews our understanding of these cultures and the debates they inspire Drawing on her long term research with a community of South Asian foragers Nurit Bird David provides a scale sensitive ethnography of these people as she encountered them in the late 1970s and reflects on the intellectual journey that led her to new understandings of their lifeways and horizons She elaborates on indigenous modes of being many that have been eclipsed by scale blind anthropology which generally uses its large scale conceptual language of persons relations and ethnic groups for even tiny communities Through the idea of pluripresence Bird David reveals a mode of plural life that encompasses a diversity of humans and nonhumans through notions of kinship and shared life She argues that this mode of belonging subverts the modern ontological touchstone of imagined communities rooted not in sameness among dispersed strangers but in intimacy among relatives of infinite diversity **The Peoples of Northeast Asia through Time** Richard Zgusta, 2015-06-29 The focus of Richard Zgusta's *The Peoples of Northeast Asia through Time* is the formation of indigenous and cultural groups of coastal northeast Asia including the Ainu the Paleoasiatic peoples and the Asiatic Eskimo Most chapters begin with a summary of each culture at the beginning of the colonial era which is followed by an interdisciplinary reconstruction of prehistoric cultures that have direct ancestor descendant relationships with the modern ones An additional chapter presents a comparative discussion of the ethnographic data including subsistence patterns material culture social organization and religious beliefs from a diachronic viewpoint Each chapter includes maps and extensive references *Saqiyuq* Nancy Wachowich, 2001 *Saqiyuq* is the name the Inuit give to a strong wind that suddenly shifts direction *Saqiyuq Stories from the Lives of Three Inuit Women* is a vivid portrait of the changing nature of life in the Arctic during the twentieth century Through their life stories a grandmother daughter and granddaughter take us on a remarkable journey in which the cycles of life childhood adolescence marriage birthing and child rearing are presented against the contrasting experiences of three successive generations Their memories and reflections give us poignant insight into the history of the people of the new territory of Nunavut Apphia Awa who was born in 1931 experienced the traditional life on the land while Rhoda Katsak Apphia's daughter was part of the transitional generation who were sent to government schools In contrast to both Sandra Katsak Rhoda's daughter has grown up in the settlement of Pond Inlet among the conveniences and tensions of contemporary northern communities video games and coffee shops but also drugs and alcohol

During the last years of Apphia's life Rhoda and Sandra began working to reconnect to their traditional culture and learn the art of making traditional skin clothing. Through the storytelling in *Saqiyuq*, Apphia, Rhoda, and Sandra explore the transformations that have taken place in the lives of the Inuit and chart the struggle of the Inuit to reclaim their traditional practices and integrate them into their lives. Nancy Wachowich became friends with Rhoda Katsak and her family during the early 1990s and was able to record their stories before Apphia's death in 1996. *Saqiyuq: Stories from the Lives of Three Inuit Women* will appeal to everyone interested in the Inuit, the North, family bonds, and a good story.
