Cistercian Europe Architecture Of Contemplation:

Cistercian Europe Terryl Nancy Kinder, 2002 There is a renaissance of interest in Cistercian architecture The simplicity harmonious proportions and excellent construction of these abbeys many still situated in the wooded intimacy of Europe's rural valleys today attract thousands of visitors who come to experience the buildings and to learn more about the medieval men and women who lived there *Cistercian Europe Architecture of Contemplation* offers a lavishly illustrated journey through Europe's magnificent Cistercian abbeys A leading expert in medieval architecture Terryl Kinder brings these famous monasteries to life showing not only where monks lived worked and prayed but also how the exquisite architecture of these buildings reflects the spiritual transformation to which their residents aspired *Cistercian Architecture and Medieval Society* Maximilian Sternberg, 2013-08-15 In *Cistercian Architecture and Medieval Society* Maximilian Sternberg offers an account of the social functions of the built environment in medieval monasticism Few medieval monuments hold so privileged a place in the modern imagination as Cistercian abbeys yet Sternberg suggests it is precisely our own peculiarly modern fascination with the idea of Cistercian aesthetics that has hindered a full view of the complex social meanings of their architecture This book draws attention instead to the practical and symbolic means by which architecture helped the Cistercians to negotiate the dense web of relations that in actuality bound them to other spheres of medieval society It explores the permeability of monastic boundaries and considers their effectiveness in reconciling a simultaneous need for interaction and distance between monastic communities and these other social spheres *The Cambridge Companion to the Cistercian Order* Mette Birkedal Bruun, 2013 Presents the Order's figureheads practical life and spiritual horizon and its contribution to medieval Europe's religious cultural and political climate **Medieval Cistercian History** Thomas Merton, 2019-03-28 Thomas Merton's deep roots in his own Cistercian tradition are on display in the two sets of conferences on the early days of the Order included in the present volume The first surveys the relevant monastic background that led up to the foundation of the Abbey of Cîteaux in 1098 and goes on to consider the contributions of each of the first three abbots of the New Monastery that would become the epicenter of the most dynamic religious movement of the early twelfth century The second set investigates the arc of medieval Cistercian history in the two centuries following the death of Saint Bernard in which the Order moves from being ahead of its time in its formative stages to being representative of its time in its most powerful and influential phase to becoming regressive with the rise of new religious currents that begin to flow in the thirteenth century Merton stresses the need to respect the complexity of the actual lived reality of Cistercian life during this period to beware of easy generalizations and instead consider the full range of factual data The result is a richly nuanced picture of the development of early Cistercian life and thought that serves as a fitting concluding volume to the series of Merton's novitiate conferences providing a thorough Initiation into the Monastic Tradition *The Prelate in England and Europe, 1300-1560* Martin Heale, 2014 An investigation into the role of the high ranking churchman in this period who they

were what they did and how they perceived themselves High ecclesiastical office in the Middle Ages inevitably brought power wealth and patronage The essays in this volume examine how late medieval and Renaissance prelates deployed the income and influence of their offices how they understood their role and how they were viewed by others Focusing primarily on but not exclusively confined to England this collection explores the considerable common ground between cardinals bishops and monastic superiors Leading authorities on the late medieval and sixteenth century Church analyse the political cultural and pastoral activities of high ranking churchmen and consider how episcopal and abbatial expenditure was directed justified and perceived Overall the collection enhances our understanding of ecclesiastical wealth and power in an era when the concept and role of the prelate were increasingly contested Dr Martin Heale is Senior Lecturer in Late Medieval History University of Liverpool Contributors Martin Heale Michael Carter James G Clark Gwilym Dodd Felicity Heal Anne Hudson Emilia Jamrozik C dric Michon Elizabeth A New Wendy Scase Benjamin Thompson C M Woolgar The Cistercians in the Middle Ages Janet E. Monastic Life in the Medieval British Isles Julie Kerr, Emilia Jamrozik, Karen Stöber, 2018-10-15 This book celebrates the work and contribution of Professor Janet Burton to medieval monastic studies in Britain Burton has fundamentally changed approaches to the study of religious foundations in regional contexts Yorkshire and Wales placing importance on social networks for monastic structures and female Cistercian communities in medieval Britain moreover she has pioneered research on the canons and their place in medieval English and Welsh societies This Festschrift comprises contributions by her colleagues former students and friends leading scholars in the field who engage with and develop themes that are integral to Burton's work The rich and diverse collection in the present volume represents original work on religious life in the British Isles from the twelfth to the sixteenth century as homage to the transformative contribution that Burton has made to medieval monastic studies in the British Isles German Literature of the High Middle Ages Will Hasty, 2006 New essays on the first flowering of German literature in the High Middle Ages and especially during the period 1180-1230 The High Middle Ages and particularly the period from 1180 to 1230 saw the beginnings of a vibrant literary culture in the German vernacular While significant literary achievements in German had already been made in earlier centuries they were a somewhat precarious vernacular extension of Christian Latin culture But the vernacular literary culture of the High Middle Ages was an integral part of broader cultural developments in which the unquestioned validity of traditional authoritative models began to lose its hold A secular culture began to emerge in which positive value began to be attached to the however transitory allegiances pleasures and loves of life In new essays dealing with the most significant literary genres the heroic epics the romances the love lyrics and political poetry and with broader political social and cultural issues control of

aggression territorialization this third volume of the Camden House History of German Literature demonstrates how the emergence of a vernacular literary culture in Germany was an important part of a broader cultural transformation in which medieval people began to redefine themselves their relationships to one another and the position of humanity in the scheme of things Contributors Albrecht Classen Nicola McLelland Rodney Fisher Neil Thomas Marion Gibbs and Sidney Johnson Rüdiger Krohn Will Hasty Nigel Harris Susann Samples Sara Poor Michael Resler Rüdiger Brandt Elizabeth A Andersen Ulrich Müller and Franz Viktor Spechtler Ruth Weichselbaumer W H Jackson Charles Bowlus Will Hasty is Professor of German Studies and co founder and co director of the Center for Medieval and Early Modern Studies at the University of Florida
