Cities For People Reflections Of A Southeast Asian Architect:

Cities for People William Siew Wai Lim, 1990 A selection of twenty one papers and letters presented at conferences and published in journals over a period of ten years from 1980 to 1989 P v *Critical Reflections on Cities in Southeast Asia* Tim Bunnell, Lisa Drummond, Ho, 2021-11-15 Critical Reflections draws together the multi disciplinary research of scholars working in on cities across Southeast Asia The fourteen essays collected in the volume are organised into three thematic sections re conceptualisation competition and intervention Collectively these reflections contribute to and interrogate the expanding urban and regional studies literature The volume constitutes a critical corrective to the existing literature which all too often seeks to diagnose contemporary urban trends everywhere from a small number of mostly Western paradigmatic cases Yet while acknowledging the increasing interconnectedness and shared global orientation of most cities in Southeast Asia the volume is wary of positing an equally generalising regional model Individually these essays attend to the diversity of contemporary urban experiences in Southeast Asia **Southeast Asian Personalities of Chinese Descent** Leo

Suryadinata, 2012 This is a bold project recording the lives of a particular group of Southeast Asians Most of the people whose biographies are included here have settled down in the ten countries that constitute the region Each of them has either self identified as Chinese or is comfortable to be known as someone of Chinese ancestry There are also those who were born in China or elsewhere who came here to work and do business including seeking help from others who have ethnic Chinese connections With the political and economic conditions of the region in a great state of flux for the past two centuries it is impossible to find consistency in the naming process Confucius had stressed that correct names make for the best relationships In this case Professor Leo Suryadinata has been pursuing for decades the elusive goal of finding the right name to give to the large numbers of people who have in one way or another made their homes in or made some difference to Southeast Asia I believe that when he and his colleagues selected the biographies to be included here they have taken a big step towards the rectification of identities for many leading personalities In so doing he has done us all a great service Professor Wang Gungwu National University of Singapore *Asian Alterity: With Special Reference To Architecture And Urbanism Through The Lens Of Cultural Studies* William Siew Wai Lim, 2007-12-04 Asian Alterity is an interdisciplinary theoretical analysis that vigorously contests the homogeneity of the mainstream Eurocentric values Part I argues for the need for an alternate perspective to be introduced so as to understand the diversity of Asia s cultural differences at their varied development stages and to meet the complex challenges of the explosive urban expansion and disruptive changes in traditional cultures and lifestyles Part II of the book consists of nine case studies of Asian major urban cities by well established academic writers and urban theorists Each author presents diverse aspects of urban dynamism The case studies will collectively demonstrate a broad framework to understand the essentiality of the interdisciplinary mode of Cultural Studies as an important lens towards meeting the challenges in Asian Architecture and Urbanism Highlights of the book

Southeast Asia's Modern Architecture Jiat-Hwee Chang, Imran bin Tajudeen, 2019 What is the modern in Southeast Asia's architecture and how do we approach its study critically This pathbreaking multidisciplinary volume is the first critical survey of Southeast Asia's modern architecture It looks at the challenges of studying this complex history through the conceptual frameworks of translation epistemology and power Challenging Eurocentric ideas and architectural nomenclature the authors examine the development of modern architecture in Indonesia Malaysia Myanmar the Philippines Singapore Thailand and Vietnam with a focus on selective translation and strategic appropriation of imported ideas and practices by local architects and builders The book transforms our understandings of the region's modern architecture by moving beyond a consideration of architecture as an aesthetic artifact and instead examining its entanglement with different dynamics of power

Constructing Identity in Contemporary Architecture Peter Herrle, Stephanus Schmitz, 2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe Paradoxically the reverse process has also emerged In some countries the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the intruding forces of globalization What started as a defensive notion has developed into a more progressive attempt to re create what has allegedly been lost This trend is being strongly expressed in discourses about architecture in countries of the South Who are the actors feeling compelled to construct new identities How are these new identities in architecture created in various parts of the world And which are the ingredients borrowed from various historical and ethnic traditions and other sources These and other questions are discussed in five case studies from different parts of the world written by renowned scholars from Brazil Mexico Egypt India and Singapore

Asian Ethical Urbanism: A Radical Postmodern Perspective William Siew Wai Lim, 2005-07-15 With the impending demise of modernist planning the footprints and corpses of failed modernist visions are littered everywhere A vacuum of implementable urban theories has occurred at the time when unprecedented expansion and restructuring of cities in rapidly developing economies are taking place In this collection of essays William S W Lim zeroes in on the peculiarities and dynamics of present Asian urban and architectural conditions in order to challenge and transcend the socio ecological forms and political influences generated by the current system of global capitalism Part I of this book consists of the main essay which attempts to establish baselines for an effective formulation of ethical urbanism in Asia by clarifying issues that have previously been unquestioningly bound up with Western values and discourses As an architect urbanist Lim lends a determinedly spatialist and environmental perspective to issues such as rights ethics happiness and social justice while compelling his readers to rethink previously established notions about them Part II of this book consists of three city studies on Hanoi Shanghai and Singapore completed in the last two years which attempt to match Lim's theoretical formulation with actual conditions occurring in Asia today Also included is *Asian Architecture in the New Millennium* a fascinating discourse on contemporary design conducted from a postmodern

perspective **Transforming Asian Cities** Nihal Perera, Wing-shing Tang, 2013 While there is no lack of studies on Asian cities the majority focus on financial districts poverty the slum tradition tourism and pollution and use the modern affluent and transforming Western city as the reference point This vast Asian empirical presence is not complemented by a theoretical presence academic discourses overlook common and basic urban processes particularly the production of space place and identity by ordinary citizens Switching the vantage point to Asian cities and citizens *Transforming Asian Cities* draws attention to how Asians produce their contemporary urban practices identities and spaces as part of resisting responding to and avoiding larger global and national processes Instead of viewing Asian cities in opposition to the Western city and using it as the norm this book instead opts to provincialize mainstream and traditional knowledge It argues that the vast terrain of ordinary actors and spaces which are currently left out should be reflected in academic debates and policy decisions and the local thinking processes that constitute these spaces need to be acknowledged enabled and critiqued The individual chapters illustrate that global spaces are more trans local traditional environments are more modern and Asian spaces are better defined than acknowledged The aim is to develop room for understandings of Asian cities from Asian standpoints especially acknowledging how Asians observe interpret understand and create space in their cities *Procuring Innovative Architecture* Leon van Schaik, Geoffrey London, 2010-05-12 The case studies in this book describe how clients promotion of innovative communities of practice has led to important collections of architectural works The book provides an assessment of the effectiveness of their approaches Architects and clients will understand what to look for as they construct their careers and their portfolios with innovation as a goal It is taken for granted nowadays that supporting innovative architecture benefits society In countries as diverse as Austria Australia Belgium England Japan South East Asia Slovenia Spain Switzerland and the USA retailers institutions local and regional government and transport authorities have established substantial bodies of work by new and emerging architects This book looks at what their goals are and how they have achieved them Is it possible to promote sustainable communities of innovative practice through such patronage Can innovation be kick started by importing visionary works *The Impossibility Of Mapping (Urban Asia)* Ute Meta Bauer, Puay Khim Ong, Roger Nelson, 2020-02-12 Following the lifework 1960s to 2010 of visionary Singaporean architect William S W Lim *The Impossibility of Mapping Urban Asia* is a compelling compilation of case studies and historical projects This multifaceted publication takes Lim's ideas to a future Asia a region defined by an irreducibly complex urban topography under constant flux Looking from Singapore to Southeast Asia and from this region to Asia more expansively and beyond it presents a diverse range of activities which may be productively framed through the notion of critical spatial practice The book has three interconnected points of departure Lim's lifework the interdisciplinary exhibition *Incomplete Urbanism* Attempts at Critical Spatial Practice at NTU Centre for Contemporary Art Singapore and the related conference *The Impossibility of Mapping Urban Asia* and the cross cultural and urban festival CITIES FOR PEOPLE NTU CCA Ideas Fest

2016 17 held at venues around Gillman Barracks Singapore The multiple links are emphasised in three key ways through editorial texts through design concepts and through selected projects inserted as intermissions between each of the book's sections Artists planners activists architects scholars get together in this volume to respond to Lim's critical spatial practice Research essays artworks visual and textual documentation spatio temporal maps grapple with the diversity of Southeast Asia offering unexpected responses to planning building and living cities and urban spaces but also put forward the question Who owns the city This key collection offers a path into spatial questions in Asia and beyond and serves as a teaching and research tool

Architecture and the Landscape of Modernity in China before 1949 Edward Denison, 2017-02-17 This book explores China's encounter with architecture and modernity in the tumultuous epoch before Communism an encounter that was mediated not by a singular notion of modernism emanating from the west but that was uniquely multifarious deriving from a variety of sources both from the west and importantly from the east The heterogeneous origins of modernity in China are what make its experience distinctive and its architectural encounters exceptional These experiences are investigated through a re-evaluation of established knowledge of the subject within the wider landscape of modern art practices in China The study

draws on original archival and photographic material from different artistic genres and architecturally concentrates on China's engagement with the west through the treaty ports and leased territories the emergence of architecture as a profession in China and Japan's omnipresence not least in Manchuria which reached its apogee in the puppet state of Manchukuo The study's geographically temporally and architecturally inclusive approach framed by the concept of multiple modernities questions the application of conventional theories of modernity or post colonialism to the Chinese situation By challenging conventional modernist historiography that has marginalised the experiences of the west's other for much of the last century this book proposes different ways of grappling with and comprehending the distinction and complexity of China's experiences and its encounter with architectural modernity
