experience in academic life and the public realm especially in foreign policy this book argues that a single categorical classification of cities is inadequate and that cities have had different and varied impacts and positions throughout the history of civilization The author examines how the formation transformation destruction or reestablishment of many civilizational cities reveals a clearer picture of the cornerstones of the course of human history These cities which play a decisive and pivotal role in the direction of the flow of history as well as providing us with a compass to guide our efforts to

understand and interpret this flow are conceptualized by the author as civilizations pivot cities This innovative book explores the role of great cities in political historical change presenting an alternative view of these pivot cities from a culturalist perspective Within this framework the role played by pivot cities in the history of civilization may be considered under seven distinct headings pioneering cities which founded civilizations cities which were founded by civilizations cities which were transplanted during the formation of civilizations ghost cities which lost their importance through shifts in political power and civilizational transformation lost cities which were destroyed by civilizations cities on lines of geocultural geoeconomic interaction and cities which combine transform or are transformed by different civilizations The author's concept of pivot cities explores the interplay between vital cities and civilizations which bears on the future of globalization at a time of instability as projected continuing de Westernization becomes a theme in studies of global history This book provides highly productive discussions relevant to the literature on city civilization relationships and the historicity of pivot cities Its clear language rich content deep and original perspective interdisciplinary approach and rich bibliography will ensure that it appeals to students and scholars in a variety of disciplines including cultural studies political science comparative urban studies anthropology history and civilizational studies *Ancient Civilizations of the World* Denny Rose & Rowan Allen, 2018-05-08

About 5 000 years ago the first urban societies developed laying the foundations for the first civilizations Nearly all civilizations share the same few features they have abundant food surpluses contained cities political bureaucracies armies defined religious and social hierarchies and long distance trading Ancient Egyptian culture flourished between c 5500 BCE with the rise of technology as evidenced in the glass work of faience and 30 BCE with the death of Cleopatra VII the last Ptolemaic ruler of Egypt It is famous today for the great monuments which celebrated the triumphs of the rulers and honored the gods of the land The culture is often misunderstood as having been obsessed with death but had this been so it is unlikely it would have made the significant impression it did on other ancient cultures such as Greece and Rome Neolithic means e new stonee even though agriculture was the crowning achievement of the period Civilizations started out small Agriculture at first tended to tie only small groups together These groups also all settled along rivers important as a reliable and predictable source of water As time passed families usually worked the same plot of land over successive generations leading to the concept of ownership Ancient mortars and grinding tools unearthed in a large mound in the Zagros Mountains of Iran reveal that people were grinding wheat and barley about 11 000 years ago Grass pea wild wheat wild barley and lentils were found throughout the site including some of the earliest known samples This was much further east than most sites known for early agriculture This book furnishes with utmost facility to all classes of readers the needed information on ancient civilization The unusual variety of the subject makes this a work of endless fascination

Cities and Civilizations Christopher Hibbert, 2003 **The Culture of Cities** Lewis Mumford, 2016-03-08 A classic work advocating ecological urban planning from a civic visionary and former architecture critic for the New Yorker

Considered among the greatest works of Lewis Mumford a prolific historian sociologist philosopher of technology and longtime architecture critic for the New Yorker *The Culture of Cities* is a call for communal action to rebuild the urban world on a sounder human foundation First published in 1938 this radical investigation into the human environment is based on firsthand surveys of North American and European locales as well as extensive historical and technological research Mumford takes readers from the compact worker friendly streets of medieval hamlets to the symmetrical neoclassical avenues of Renaissance cities He studies the squalor of nineteenth century factory towns and speculates on the fate of the booming twentieth century Megalopolis whose impossible scale Mumford believes can only lead to its collapse into a Nekropolis a monstrosity of living death A civic visionary Mumford is credited with some of the earliest proposals for ecological urban planning and the appropriate use of technology to create balanced living environments In the final chapters of *The Culture of Cities* he outlines possible paths toward utopian future cities that could be free of the stressors of the Megalopolis in sync with the rhythms of daily life powered by clean energy integrated with agricultural regions and full of honest and comfortable housing for the working class The principles set forth by these visions once applied to Nazi occupied Europe's razed cities are still relevant today as technological advances and overpopulation change the nature of urban life

Economics of Good and Evil Tomas Sedlacek, 2011-07-01 Tomas Sedlacek has shaken the study of economics as few ever have Named one of the Young Guns and one of the five hot minds in economics by the Yale Economic Review he serves on the National Economic Council in Prague where his provocative writing has achieved bestseller status How has he done it By arguing a simple almost heretical proposition economics is ultimately about good and evil In *The Economics of Good and Evil* Sedlacek radically rethinks his field challenging our assumptions about the world Economics is touted as a science a value free mathematical inquiry he writes but it's actually a cultural phenomenon a product of our civilization It began within philosophy Adam Smith himself not only wrote *The Wealth of Nations* but also *The Theory of Moral Sentiments* and economics as Sedlacek shows is woven out of history myth religion and ethics Even the most sophisticated mathematical model Sedlacek writes is de facto a story a parable our effort to rationally grasp the world around us Economics not only describes the world but establishes normative standards identifying ideal conditions Science he claims is a system of beliefs to which we are committed To grasp the beliefs underlying economics he breaks out of the field's confines with a tour de force exploration of economic thinking broadly defined over the millennia He ranges from the epic of Gilgamesh and the Old Testament to the emergence of Christianity from Descartes and Adam Smith to the consumerism in *Fight Club* Throughout he asks searching meta economic questions What is the meaning and the point of economics Can we do ethically all that we can do technically Does it pay to be good Placing the wisdom of philosophers and poets over strict mathematical models of human behavior Sedlacek's groundbreaking work promises to change the way we calculate economic value *Global Urban Value Chain in History of Human Civilization* Pengfei Ni, Marco Kamiya, Jing Guo, Haidong Xu, 2024-09-26 This study was

DESCENDANTS Aver Omadis,2024-11-16 The human oceanic civilization arising when after the Great Cataclysm life on land became increasingly difficult and eventually impossible had lasted for thousands of years Life on land had become a very distant memory for the roughly one hundred million humans who were now living in cities in the depths of the planet s oceans Given the amenities comfort and security which oceanic cities provided to their citizens few would ever wonder about what human life on land might have been like But not all was well The human oceanic civilization had been in decline for centuries A decline that some were seeking to stop and revert using different means All of them seemingly required humans to move back to life on land But this was nothing the average citizen on any oceanic city would have been aware of Then came the discovery of the fossil of a human skull It showed that human life on land had never ceased to exist and revealed that another human species had evolved on land This discovery triggered events which changed the trajectory of human oceanic civilization and of the human civilization their cousin species had built in what they believed to be the only habitable area on land In the end this changed not only their future but even more so what they had considered their human history

Tropical Biology and Conservation Management - Volume IX Kleber Del Claro,Paulo S. species but also in terms of the diversity of interactions among distinct organisms that it maintains In this sense the complexity of web structure in tropical systems is a promise of future to nature preservation on Earth In the chemicals of tropical plant and animals could be the cure to infinite number of diseases new food sources and who knows what more Despite these facts tropical areas have been exploited in an irresponsible way for more than 500 years due the lack of an ecological conscience of men Exactly in the same way we did with temperate areas and also tropical areas in the north of Equator line Nowadays is estimated that due human exploitation nation conflicts and social problems less than 8% of tropical nature inside continental areas is still now untouchable The extension of damage in the tropical areas of oceans is unknown Thus so all knowledge we could accumulate about tropical systems will help us as in the preservations of these important and threatened ecosystems as in a future recuperation when it was possible Only knowing the past and developing culture mainly that directed to peace to a better relationship among nations and responsible use and preservation of natural resources human beings will have a long future on Earth These volumes Tropical Biology and Natural Resources was divided in sessions to provide the reader the better comprehension possible of issue and also to enable future complementation and improvements in the encyclopedia Like we work with life we intended to transform this encyclopedia also in a life volume in what new information could be added in any time As president of the encyclopedia and main editor I opened the theme with an article titled Tropical Biology and Natural resources Historical Pathways and Perspectives providing the reader an initial view of the origins of human knowledge about the tropical life and what we hope to the future In the sequence we have more than 100 chapters distributed in tem sessions Tropical Ecology TE Tropical Botany TB Tropical Zoology TZ Savannah Ecosystems SE Desert Ecosystems DE Tropical Agriculture TA Natural History of Tropical Plants NH Human Impact on Tropical Ecosystems HI Tropical Phytopathology and Entomology TPE Case Studies CS This 11 volume set contains several chapters each of size 5000 30000 words with perspectives applications and extensive illustrations It is the only publication of its kind carrying state of the art knowledge in the fields of Tropical Biology and Conservation Management and is aimed by virtue of the several applications at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers and NGOs

The Past Prologue , *Smart Economy in Smart Cities* T. M. Vinod Kumar, 2016-08-25 The present book highlights studies that show how smart cities promote urban economic development The book surveys the state of the art of Smart City Economic Development through a literature survey The book uses 13 in depth city research case studies in 10 countries such as the North America Europe Africa and Asia to explain how a smart economy changes the urban spatial system and vice versa This book focuses on exploratory city studies in different countries which investigate how urban spatial systems adapt to the specific needs of smart urban economy The theory of smart city economic development is not yet entirely understood and applied in metropolitan regional plans Smart urban economies are largely the result of the influence of ICT applications on

all aspects of urban economy which in turn changes the land use system It points out that the dynamics of smart city GDP creation takes different paths which need further empirical study hypothesis testing and mathematical modelling Although there are hypotheses on how smart cities generate wealth and social benefits for nations there are no significant empirical studies available on how they generate urban economic development through urban spatial adaptation This book with 13 cities research studies is one attempt to fill in the gap in knowledge base **The Executive's Book of Quotations** Julia Vitullo-Martin, J.
