Intersections of Displacement Priya N. Kissoon, 2015-09-18 Refugees are forced to gamble with their lives to flee conflicts and if they arrive at their intended destination unscathed they may face the turbulent prospect of asylum defined by a meagre existence social exclusion poverty and even homelessness Operating at different scales and imagined places homelessness and asylum seeking are issues of fundamental social justice typically viewed as a problem of cities and crises of national and international concern respectively However over the past two decades in particular the increasing and volatile numbers of asylum seekers arriving in the West have created a new form of homelessness mainly hidden often vulnerable and located in the interstices of international and local displacement Considering refugee settlement in London England and Toronto Canada this book argues that this new form of homelessness also requires a new perspective in order to be properly understood and this perspective should come from refugees themselves Two main questions are considered How do refugees conceive locate and reconstruct home in the asylum and settlement process and How do national and residential dynamics affect refugees sense of home or homelessness Drawing on structuration theory amongst other ideas the book examines the relationship between refugeehood and homelessness and how each is shaped in the countries of asylum Managed migration strategies in Canada and deterrent migration strategies in the UK have a profound effect on refugees perceptions of belonging and acceptance equality and the desire and ability to make a home for themselves In addition to shaping notions of belonging national support and services or the lack thereof structure the pathways to homelessness revealing distinct trajectories amongst refugees in London and Toronto The author's proceeds from the sale of this book will be contributed to the Canadian Council for Refugees      *A Decision-centred View of Environmental Planning* A. Faludi, 2013-10-22 Planning theorists are often criticised for being insufficiently concerned with the needs of practitioners The author of this book takes a view of planning which centres around the decision making process and offers a theoretical approach which takes practice as its starting point Building on his earlier important work *Planning Theory* Pergamon URPS 1984 first edition 1973 this book constitutes a further major advance in planning thought synthesizing the influence of the British IOR School with the American rational planning model Going beyond previous generic approaches the work culminates in a consideration of theory and practice in the planning of all forms of environmental intervention      **The Pataphysician's Library** Ben

Fisher,2000-01-01 The Pataphysician s Library is a study of aspects of 1890s French literature with specific reference to the traditions of Symbolism and Decadence Its main focus is Alfred Jarry who has proved perhaps surprisingly to be one of the more durable fin de si cle authors The originality of this study lies in its use of the enigmatic list of books termed the livres pairs which appears in Jarry s 1898 novel Gestes et Opinions du docteur Faustroll pataphysicien his best known prose work The greatest interest of the livres pairs lies in a group of works by Jarry s friends and contemporaries primarily Leon Bloy Georges Darien Gustave Kahn Catulle Mendes Josephin Madan Rachilde and Henri de Regnier Several of these authors feature as the lords of islands visited by the pataphysician Dr Faustroll in his curious voyage around Paris In conjunction with Jarry s own works the contemporary livres pairs serve to illustrate the vibrant and experimental atmosphere in which these authors worked
