Beaumont, Christopher Baker, 2011-08-18 Exploration of postsecularism in theory and practice of urban life evaluating the secular to postsecular shift in terms of public space building use governance and civil society **Progressive Cities**

Bradley Robert Rice, 2014-10-01 Although the commission government movement is often treated by historians as an element of the reform surge of the Progressive Era this is the first full scale study of the origins spread and decline of the commission idea Commission government originated in Galveston Texas where business leaders conceived the plan as a temporary measure to speed recovery from the great hurricane of 1900 Other cities in Texas and across the nation soon followed by 1920 about 500 municipalities had adopted the plan in which elected representatives serve as heads of city departments and collectively as a policy making body Beginning with Galveston and Houston and Des Moines Iowa Bradley Robert Rice presents detailed case studies of the earliest commission cities and shows how the plan was developed and modified to suit each community's needs He goes on to chronicle the adoption of the commission plan by other cities across the country that strove for businesslike efficiency as a reaction against corruption and machine politics in urban government Most commission charters included a wide ranging package of municipal reforms such as the short ballot at large representation nonpartisanship civil service and direct legislation Yet Rice shows that the commission plan generally offered little in the way of social reform to accompany its reorganization of municipal government Applying a model of innovation diffusion the author analyzes how and why the new form of city government spread across Progressive Era America He also thoroughly explores the relationship between the commission plan and other Progressive Era reforms and reports on the reasons for its decline from both a social and a practical perspective *Progressive Cities* is described by Professor Bruce M Stave editor of the *Journal of Urban History* as a sound piece of work which should make a useful and worthwhile contribution to the existing scholarship on urban reform and should appeal to an audience which cuts across disciplines history political science urban studies and urban planning *The World's Cities* Andrew James Jacobs, 2013 *The World's Cities* offers instructors and students in higher education an accessible introduction to the three major perspectives influencing city regions worldwide City Regions in a World System Nested City Regions and The City Region as the Engine of Economic Activity Growth The book provides students with helpful essays on each perspective case studies to illustrate each major viewpoint and discussion questions following each reading *The World's Cities* concludes with an original essay by the editor that helps students

understand how an analysis incorporating a combination of theoretical perspectives and factors can provide a richer appreciation of the world's city dynamics

The New Wealth of Cities John Montgomery, 2008 In *The New Wealth of Cities* John Montgomery provides a long overdue look at the dynamics of the city. Original and wide ranging, the book will be a definitive resource on city economies and urban planning, explaining why it is that cities develop over time in periods of propulsive growth and bouts of decline.

The Student's Concordance to the Revised Version, 1881, of the New Testament of Our Lord and Saviour Jesus Christ, 1882

Social Justice and the City David Harvey, 2010-04-15 Throughout his distinguished and influential career, David Harvey has defined and redefined the relationship between politics, capitalism, and the social aspects of geographical theory. Laying out Harvey's position that geography could not remain objective in the face of urban poverty and associated ills, *Social Justice and the City* is perhaps the most widely cited work in the field. Harvey analyzes core issues in city planning and policy: employment and housing, location, zoning, transport costs, concentrations of poverty, asking in each case about the relationship between social justice and space. How, for example, do built-in assumptions about planning reinforce existing distributions of income? Rather than leading him to liberal technocratic solutions, Harvey's line of inquiry pushes him in the direction of a revolutionary geography, one that transcends the structural limitations of existing approaches to space. Harvey's emphasis on rigorous thought and theoretical innovation gives the volume an enduring appeal. This is a book that raises big questions, and for that reason, geographers and other social scientists regularly return to it.

Design of Cities Edmund N. Bacon, 1974 The major contemporary work on urban design. Splendidly presented, filled with thoughtful and brilliant intuitive insights. *The New Republic* In a brilliant synthesis of words and pictures, Edmund N. Bacon relates historical examples to modern principles of urban planning. He vividly demonstrates how the work of great architects and planners of the past can influence subsequent development and be continued by later generations. By illuminating the historical background of urban design, Bacon also shows us the fundamental forces and considerations that determine the form of a great city. Perhaps the most significant of these are simultaneous movement systems: the paths of pedestrian and vehicular traffic, public and private transportation that serve as the dominant organizing force. And Bacon looks at movement systems in cities such as London, Rome, and New York. He also stresses the importance of designing open space as well as architectural mass and discusses the impact of space, color, and perspective on the city dweller. That the centers of cities should and can be pleasant places in which to live, work, and relax is illustrated by such examples as Rotterdam and Stockholm.

Cities for the New Millennium Marcial Echenique, Andrew Saint, 2014-04-04 *Cities for the New Millennium* is the outcome of a joint conference held in Salford in July 2000 by the Royal Institute of British Architects and the University of Cambridge's Department of Architecture. It tackles these questions in the light of the Urban Task Force's report about the future of Britain's cities and communities but sets them in an international and historical context. Professionals, architects, engineers, and developers as well as academics from different countries and disciplines here lavish

their expertise on issues of transportation density land use risk and energy saving others present urban scale buildings or landscapes that have been judged inspirational or inventive This book therefore is not just about theories of urbanism It reveals how co operation and debate between different parties and professions can illuminate the creative kind of urban development we should be aiming for

The Organization of Cities John R Miron,2017-01-20 This book focuses on the relationship between the state and economy in the development of cities It reviews and reinterprets fundamental theoretical models that explain how the operation of markets in equilibrium shapes the scale and organization of the commercial city in a mixed market economy within a liberal state These models link markets for the factors of production markets for investment and fixed capital formation markets for transportation and markets for exports in equilibrium both within the urban economy and the rest of the world In each case the model explains the urban economy by revealing how assumptions about causes and structures lead to predictions about scale and organization outcomes By simplifying and contrasting these models this book proposes another interpretation that governance and the urban economy are outcomes negotiated by political actors motivated by competing notions of commonwealth and the individual desire for wealth and power The book grounds its analysis in economic history explaining the rise of commercial cities and the emergence of the urban economy It then turns to factors of production export and factor markets introducing and parsing the Mills model breaking it down into its component parts and creating a series of simpler models that can better explain the significance of each economic assumption Simplified models are also presented for real estate and fixed capital investment markets transportation and land use planning The book concludes with a discussion of linear programming and the Herbert Stevens and the Ripper Varaiya models A fresh presentation of the theories behind urban economics this book emphasizes the links between state and economy and challenges the reader to see its theories in a new light As such this book will be of interest to scholars students and practitioners of economics public policy public administration urban policy and city and urban planning

Justice and Cities Mark Davidson,2023-06-20 This book explores different theories of justice and explains how these connect to broader geographical questions and inform our understanding of urban problems Since philosophers like Socrates debated in the ancient agora cities have prompted arguments about the best ways to live together Cities have also produced some of the most vexing moral problems including the critical question of what obligations we have to people we neither know nor affiliate with The first part of this book outlines the most well developed answers to these questions the justice theories of Utilitarianism Libertarianism Liberalism Marxism Communitarianism Conservativism and recent post critiques Within each theory we find a set of geographical propensities that shape the ways purveyors of the theories see the city and its moral problems The central thesis of the book is therefore that competing moral theories have distinct geographical concerns and perspectives and that these propensities often condition how the city and its injustices are understood The second part of the book features three studies of contemporary urban problems gentrification segregation and un affordability to demonstrate

how predominant justice theories generate distinctive moral and geographical interpretations This book therefore serves as an urbanist's guide to justice theory written for undergraduates and postgraduates studying human geography urban and municipal planning urban theory and urban politics sociology and politics and government **The City** Robert E. Park, Ernest W. Burgess, 2019-04-15 First published in 1925 The City is a trailblazing text in urban history urban sociology and urban studies Its innovative combination of ethnographic observation and social science theory epitomized the Chicago school of sociology Robert E Park Ernest W Burgess and their collaborators were among the first to document the interplay between urban individuals and larger social structures and institutions seeking patterns within the city's riot of people events and influences As sociologist Robert J Sampson notes in his new foreword though much has changed since The City was first published we can still benefit from its charge to explain where and why individuals and social groups live as they do **The city of Rum, and the sketches**, ed. by a friend mr Onyx (pseud.), 1872 **Senses of the City** Joseph S C Lam, 2017-03-15 From its first designation as temporary capital in 1138 the city of Hangzhou then called Lin'an was deemed representative of the diminished empire of the Song 960-1279 in all its contradictory aspects The exquisite beauty of the city confirmed its destiny to become an imperial residence but it also portended its fatal corruption The wealth and ease of Hangzhou epitomized the vigor of the southern empire as well as its oblivious decadence The city was paramount and feeble aweinspiring and threatened the most admired city in the civilized world and a disgrace to the dynastic founders Rather than perpetuating the debate about the merit of these polemical judgments the contributors of Senses of the City treat them as expressions of their historical moment revealing of ideological conviction or aesthetic preference rather than of historical truth By reading the sources as expressions of individual experience and political conviction the contributors defy the impassioned rhetoric of past generations in order to recover the solid ground of historical evidence Leading scholars of the field including Beverly Bossler Stephen West and Martin Powers have produced essays that relate changes in literary convention to shifts in territorial boundaries and analyze writing painting dance and music as means by which individual literati placed themselves in time and space The contributors reestablish the historical connections between writing and meaningful action between text and world between the sources and their own words and between the page and the senses Their efforts to retrieve the sounds sights and smells of Hangzhou from Southern Song texts replicate in reverse direction the attempts of twelfth and thirteenth-century authors to devise effective tropes and suitable genres that would preserve their living impressions of the city in writing **The Shape of the City** John Sewell, 1993-01-01 Critics have long voiced concerns about the wisdom of living in cities and the effects of city life on physical and mental health For a century planners have tried to meet these issues John Sewell traces changes in urban planning from the pre-Depression garden cities to postwar modernism and a revival of interest in the streetscape grid In this far-ranging review Sewell recounts the arrival of modern city planning with its emphasis on lower densities limited access streets segregated uses and considerable green space He

makes Toronto a case history with its pioneering suburban development in Don Mills and its other planned communities including Regent Park St Jamestown Thorncrest Village and Bramalea The heyday of the modern planning movement was in the 1940s to the 1960s and the Don Mills concept was repeated in spirit and in style across Canada Eventually strong public reaction brought modern planning almost to a halt within the city of Toronto The battles centred on saving the Old City Hall and stopping the Spadina Expressway Sewell concludes that although the modernist approach remains ascendant in the suburbs the City of Toronto has begun to replace it with alternatives that work This is a reflective but vigorous statement by a committed urban reformer Few Canadians are better suited to point the way towards city planning for the future

Cities, Change, and Conflict Nancy Kleniewski, Alexander R. Thomas, Gregory Fulkerson, 2024-06-28 Cities Change and Conflict was one of the first texts to embrace the perspective of political economy as its main explanatory framework and then complement it with the rich contributions of human ecology as well as perspectives derived from critical approaches to social theory Although its primary focus is on North American cities the book contains several chapters on cities in other parts of the world including the Global North and Global South It provides both historical and contemporary accounts of the impact of globalization on urban development and urban institutions This sixth edition features a new groundbreaking chapter on the relationship between the physical environment and human settlements including the urban rural nexus This edition also expands and updates coverage of recent trends such as the establishment and evolution of gay neighborhoods the suburbanization of immigrant groups the situation of the immigrant youth known as Dreamers the reverse migration of Blacks from the North to the South and the proliferation of exurban communities Beyond examining the dynamics that shape the form and functionality of cities the text surveys the experience of urban life among different social groups including a new perspective on intersectionality as it affects people's experiences in cities It illuminates the workings of the urban economy local and federal governments and the criminal justice system while addressing policy debates and decisions that affect almost every aspect of urbanization and urban life Catalog of Copyright Entries.
