## **Citizen Participation In Science Policy:**

Citizen Participation in Science Policy James C. Petersen, 1982      A History of Science Policy in the United States, 1940-1985, 1986      *Science Policy Implications of DNA Recombinant Molecule Research* United States. Congress. House. Committee on Science and Technology. Subcommittee on Science, Research, and Technology, 1977      **Science Policy Implications of DNA Recombinant Molecular Research** United States. Congress. House. Committee on Science and Technology. Subcommittee on Science, Research, and Technology, 1978      **Science, Policy, and the Coast** National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Committee on Science and Policy for the Coastal Ocean, 1995-10-01 This book summarizes three symposia that were convened in the California Gulf of Maine and Gulf of Mexico regions to seek new ways to improve the use of science in coastal policymaking The book recommends actions that could be taken by federal and state agencies and legislatures local authorities scientists universities the media nongovernmental organizations and the public to yield better coastal decisions and policies It is unique in that it resulted from a partnership among natural scientists social scientists and policymakers      The Professionalization of Public Participation Laurence Bherer, Mario Gauthier, Louis Simard, 2017-03-27 The Professionalization of Public Participation is an edited collection of essays by leading and emerging scholars examining the emerging profession of public participation professionals Public participation professionals are persons working in the public private or third sectors that are paid to design implement and or facilitate participatory forums The rapid growth and proliferation of participatory arrangements call for expertise in the organizing of public participation The contributors analyze the professionalization of this practice in different countries United States France Canada Italy and the United Kingdom to see how their actions challenge the development of participatory arrangements Designing such processes is a delicate activity since it may affect not only the quality of the processes and their legitimacy but also their capacity to influence decision making      Science and Technology Policy Takefumi Tanaka, 1992      **Science, Policy and Stakeholders in Water Management** Geoffrey Gooch, Per Stålnacke, 2010-08-12 One of the major problems facing practitioners and scientists working with water management is how to integrate knowledge and experiences from scientific policy and stakeholder perspectives In this book this science policy stakeholder interface SPSI is examined both analytically and through the description of practical experiences from river basins in Europe India and South East Asia These include the Tungabhadra India Sesan Vietnam Cambodia Tagus Spain Portugal and Glomma Norway which particularly highlight issues associated with pollution severely altered river flows and transboundary conflicts Following two chapters which lay the framework for the book the authors describe how SPSI was managed in the case study basins and how stakeholder participation and scenarios were used to integrate different perspectives and to facilitate the communication of different forms of knowledge Four important aspects of water management and SPSI are then discussed these are water pollution land and water

interaction environmental flow and transboundary water regimes Short descriptions of the case study rivers are provided together with analyses of how SPSI was managed in water management in these basins and policy recommendations for the basins The book concludes by providing a series of recommendations for improving the science policy stakeholder interface in water management It represents a major step forward in our understanding of how to implement integrated water resources management

**Communicating Science** Toss Gascoigne, Bernard Schiele, Joan Leach, Michelle Riedlinger, Luisa Massarani, Bruce V. Lewenstein, Peter Broks, 2020-09-14 Modern science communication has emerged in the twentieth century as a field of study a body of practice and a profession and it is a practice with deep historical roots We have seen the birth of interactive science centres the first university actions in teaching and conducting research and a sharp growth in employment of science communicators This collection charts the emergence of modern science communication across the world This is the first volume to map investment around the globe in science centres university courses and research publications and conferences as well as tell the national stories of science communication How did it all begin How has development varied from one country to another What motivated governments institutions and people to see science communication as an answer to questions of the social place of science Communicating Science describes the pathways followed by 39 different countries All continents and many cultures are represented For some countries this is the first time that their science communication story has been told

*The Science of Citizen Science* Katrin Vohland, Anne Land-zandstra, Luigi Ceccaroni, Rob Lemmens, Josep Perelló, Marisa Ponti, Roeland Samson, Katherin Wagenknecht, 2021-01-11 This open access book discusses how the involvement of citizens into scientific endeavors is expected to contribute to solve the big challenges of our time such as climate change and the loss of biodiversity growing inequalities within and between societies and the sustainability turn The field of citizen science has been growing in recent decades Many different stakeholders from scientists to citizens and from policy makers to environmental organisations have been involved in its practice In addition many scientists also study citizen science as a research approach and as a way for science and society to interact and collaborate This book provides a representation of the practices as well as scientific and societal outcomes in different disciplines It reflects the contribution of citizen science to societal development education or innovation and provides an overview of the field of actors as well as on tools and guidelines It serves as an introduction for anyone who wants to get involved in and learn more about the science of citizen science

*The Role of Public Participation in Energy Transitions* Ortwin Renn, Frank Ulmer, Anna Deckert, 2020-03-21 The Role of Public Participation in Energy Transitions provides a conceptual and empirical approach to stakeholder and citizen involvement in the ongoing energy transition conversation focusing on projects surrounding energy conversion and efficiency reducing energy demand and using new forms of renewable energy sources Sections review and contrast different approaches to citizen involvement discuss the challenges of inclusive participation in complex energy policymaking and provide conceptual foundations for the

empirical case studies that constitute the second part of the book The book is a valuable resource for academics in the field of energy planning and policymaking as well as practitioners in energy governance energy and urban planners and participation specialists

**Science, Policy, and the Value-Free Ideal** Heather E. Douglas, 2009-07-15 The role of science in policymaking has gained unprecedented stature in the United States raising questions about the place of science and scientific expertise in the democratic process Some scientists have been given considerable epistemic authority in shaping policy on issues of great moral and cultural significance and the politicizing of these issues has become highly contentious Since World War II most philosophers of science have purported the concept that science should be value free In *Science Policy and the Value Free Ideal* Heather E Douglas argues that such an ideal is neither adequate nor desirable for science She contends that the moral responsibilities of scientists require the consideration of values even at the heart of science She lobbies for a new ideal in which values serve an essential function throughout scientific inquiry but where the role values play is constrained at key points thus protecting the integrity and objectivity of science In this vein Douglas outlines a system for the application of values to guide scientists through points of uncertainty fraught with moral valence Following a philosophical analysis of the historical background of science advising and the value free ideal Douglas defines how values should and should not function in science She discusses the distinctive direct and indirect roles for values in reasoning and outlines seven senses of objectivity showing how each can be employed to determine the reliability of scientific claims Douglas then uses these philosophical insights to clarify the distinction between junk science and sound science to be used in policymaking In conclusion she calls for greater openness on the values utilized in policymaking and more public participation in the policymaking process by suggesting various models for effective use of both the public and experts in key risk assessments

**Liberation Science: Putting Science to Work for Social and Environmental Justice** Steven H. Emmerman, Marcia Bjørnerud, Jill S. Schneiderman, Sarah A. Levy, 2012-11-25 Liberation Science is the practice of using the knowledge and methods of science to solve the social and environmental problems faced by the poor Liberation Science can address these problems because it has been freed from the flawed scientific paradigms that are linked to the flawed social paradigms of nationalism and capitalism Three themes of Liberation Science are 1 The definition of an ecosystem becomes both more expansive and more holistic to include humans cultural practices and the built environment together with the possibility that an ecosystem could mimic the behavior of a single organism 2 The logic and methods of science are made available to ordinary people empowering them to understand the ecologies of their own communities 3 Science becomes open to complementary philosophical approaches that draw upon cultural and spiritual traditions of particular regions or communities

**Science Policy** Steering Committee and Workshop on Subnational Science Policy, 2017-04-19 In Canada science is as much a provincial endeavour as it is a national one Science has the potential to inform policy development and enhance public welfare in areas such as security health the environment education and social policy Investments in science

can create new economic opportunities and help develop the knowledge and social capital of specific regions Realizing these benefits however requires effective science policies across all levels of government To inform ongoing work relating to provincial science policy the Alberta Government asked the Council of Canadian Academies to convene an expert workshop to identify key considerations for science policies relevant to subnational jurisdictions and specifically to Canadian provinces The workshop held November 21 22 2016 in Canmore Alberta brought together perspectives from academia government research institutions and industry The final report of the Workshop Steering Committee Science Policy Considerations for Subnational Governments is an insightful high quality study that identifies key considerations for the development of science policies and is intended to be used as a roadmap to guide conversations and inform decision making about science policies at the subnational level **Nanotechnology and the Challenges of Equity, Equality and Development** Susan E.

Cozzens,Jameson Wetmore,2010-10-10 Nanotechnology is enabling applications in materials microelectronics health and agriculture which are projected to create the next big shift in production comparable to the industrial revolution Such major shifts always co evolve with social relationships This book focuses on how nanotechnologies might affect equity equality in global society Nanotechnologies are likely to open gaps by gender ethnicity race and ability status as well as between developed and developing countries unless steps are taken now to create a different outcome Organizations need to change their practices and cultural ideas must be broadened if currently disadvantaged groups are to have a more equal position in nano society rather than a more disadvantaged one Economic structures are likely to shift in the nano revolution requiring policymakers and participatory processes to invent new institutions for social welfare better suited to the new economic order than those of the past **Ethics for Science Policy** Torgny Segerstedt,2013-10-22 Ethics for Science Policy

documents the proceedings of a Nobel Symposium held at S dergarn Sweden on August 20 25 1978 which focuses on the freedom of unrestricted research or investigations This book discusses the rationality and personal element in science policy ethical responsibility of social scientists priorities and control in the organization of research ethical principles of scientific institutions and ethical dilemmas in weapon development The topics on science progress and destruction information and communication in the developing world and limits in the regulation of scientific research are also deliberated in this compilation This publication is valuable to students or researchers intending to acquire knowledge on the extent or restrictions in conducting scientific investigations Elgar Encyclopedia of Science and Technology Studies Ulrike Felt,Alan
