Power in Action Steven Friedman,2019-03-01 Argues that South Africans like everyone else need democracy for a more equal society What are democracies meant to do And how does one know when one is a democratic state These incisive questions and more by leading political scientist Steven Friedman underlie this robust enquiry into what democracy means for South Africa post 1994 Democracy is often viewed through a lens reflecting Western understanding New democracies are compared to idealized notions by which the system is said to operate in the global North The democracies of Western Europe and North America are understood to be the finished product and all others are assessed by how far they have progressed towards approximating this model Power in Action persuasively argues against this stereotype Friedman asserts that democracies can only work when every adult has an equal say in the public decisions that affect them Democracy is achieved not by adopting idealized models derived from other societies rather it is the product of collective action by citizens who claim the right to be heard not only through public protest action but also through the conscious exercise of influence on public and private power holders Viewing democracy in this way challenges us to develop a deeper understanding of democracy s challenges and in so doing to ensure that more citizens can claim a say over more decisions in society

The Liberal Heartland Jon K. Lauck,Catherine McNicol Stock,2025-04-29 Over the last two decades the political narrative of the liberal coasts and the conservative heartland has become something of a truism leading many Democrats to write off much of the Midwest as a Republican stronghold Today s polarized divide between rural and urban voters makes it easy to forget that things have not always been this way The Liberal Heartland is a powerful reminder that the American Midwest has a progressive legacy that rivals the coasts Across twenty chapters The Liberal Heartland traces the political history of this region from the post New

Deal period to the rise of the New Right and Donald Trump's right wing populism The contributors explore the way liberals and progressives across the Midwest fought for expanding environmental protection engaged in community activism developed a queer labor coalition before Stonewall struggled for women's rights and representation in the Great Plains states opposed the death penalty and mobilized for Indigenous self determination among other topics In addition to well known leaders like Harry Truman and George McGovern the book highlights lesser known figures such as Lydia Cady Langer Mary Jean Collins Richard Hatcher Jim Jontz and Paul Wellstone A companion to the 2020 volume *The Conservative Heartland The Liberal Heartland* explores the history of the Midwest from a less acknowledged perspective recounting often forgotten stories that demonstrate the importance of the Midwest for New Deal liberalism and various forms of left wing politics This is a long overdue book that represents a fresh look at the American heartland
