Citizens Politics And Social Communication:

Citizens, Politics and Social Communication R. Robert Huckfeldt, John Sprague, 1995-01-27 Democratic politics is a collective enterprise not simply because individual votes are counted to determine winners but more fundamentally because the individual exercise of citizenship is an interdependent undertaking Citizens argue with one another and they generally arrive at political decisions through processes of social interaction and deliberation This book is dedicated to investigating the political implications of interdependent citizens within the context of the 1984 presidential campaign as it was experienced in the metropolitan area of South Bend Indiana Hence this is a community study in the fullest sense of the term National politics is experienced locally through a series of filters unique to a particular setting and its consequences for the exercise of democratic citizenship

The Social Citizen Betsy Sinclair, 2012-12-10 Human beings are social animals Yet despite vast amounts of research into political decision making very little attention has been devoted to its social dimensions In political science social relationships are generally thought of as mere sources of information rather than active influences on one's political decisions Drawing upon data from settings as diverse as South Los Angeles and Chicago's wealthy North Shore Betsy Sinclair shows that social networks do not merely inform citizen's behavior they can and do have the power to change it From the decision to donate money to a campaign or vote for a particular candidate to declaring oneself a Democrat or Republican basic political acts are surprisingly subject to social pressures When members of a social network express a particular political opinion or belief Sinclair shows others notice and conform particularly if their conformity is likely to be highly visible We are not just social animals but social citizens whose political choices are significantly shaped by peer influence The Social Citizen has important implications for our concept of democratic participation and will force political scientists to revise their notion of voters as socially isolated decision makers

Political Psychology of Turkish Political Behavior Cengiz Erisen, 2016-04-14 The primary motivation for this book is to focus on something crucial that is missing in Turkish political science well founded theories on the Turkish voter and empiricism in scholarly research Given the absence of such theories one could ask what then the best model is for explaining a Turkish citizen s vote choice and political behaviour and what schools of thought Turkish political science has Unfortunately it is not possible to offer a satisfactory response to either question at this point and among the clear deficiencies in the current literature the primary one is the lack of a robust model explaining how Turkish citizens form their political attitudes engage in political participation or cast their votes With these important questions in mind this book aims to generate an interest in the theoretical and methodological tools that one can employ to conduct research contributing to the needs of the literature particularly in political behaviour and political psychology This book expands our understanding about the processes and the mechanisms of Turkish political behaviour and contributes to the foundations of theory building in the literature This book was published as a special issue of Turkish Studies

What are

Campaigns For? The Role of Persuasion in Electoral Law and Politics James A Gardner, 2009-06-19 Election campaigns ought to be serious occasions in the life of a democratic polity For citizens of a democracy an election is a time to take stock to reexamine our beliefs to review our understanding of our own interests to ponder the place of those interests in the larger social order and to contemplate and if necessary to revise our understanding of how our commitments are best translated into governmental policy or so we profess to believe Americans however are haunted by the fear that our election campaigns fall far short of the ideal to which we aspire The typical modern American election campaign seems crass shallow and unengaging The arena of our democratic politics seems to lie in an uncomfortable chasm between our political ideals and everyday reality What Are Campaigns For is a multidisciplinary work of legal scholarship that examines the role of legal institutions in constituting the disjunction between political ideal and reality The book explores the contemporary American ideal of democratic citizenship in election campaigns by tracing it to its historical sources documenting its thorough infiltration of legal norms evaluating its feasibility in light of the findings of empirical social science and testing it against the requirements of democratic theory

Revolutionizing the Interaction between State and Citizens through Digital Communications Edwards III, Sam B., Santos, Diogo, 2014-07-31 Networked communication technologies have drastically changed the relationship between States and their citizens This fundamental shift has eased civilians ability to access information and organize groups like never before creating the need to re examine existing theories Revolutionizing the Interaction between State and Citizens through Digital Communications evaluates the relationship between governments and their constituents and how this relationship is impacted by emerging technologies Discussing both developed and underdeveloped nations this book provides a comparison for the ongoing shift in societies serving as a critical reference for legal professionals activists government employees academics and students

Political Disagreement Robert Huckfeldt, Paul E. Johnson, John Sprague, 2004-07-12 Political disagreement is widespread within the communication network of ordinary citizens furthermore political diversity within these networks is entirely consistent with a theory of democratic politics built on the importance of individual interdependence The persistence of political diversity and disagreement does not imply that political interdependence is absent among citizens or that political influence is lacking The book s analysis makes a number of contributions The authors demonstrate the ubiquitous nature of political disagreement They show that communication and influence within dyads is autoregressive that the consequences of dyadic interactions depend on the distribution of opinions within larger networks of communication They argue that the autoregressive nature of political influence serves to sustain disagreement within patterns of social interaction as it restores the broader political relevance of social communication and influence They eliminate the deterministic implications that have typically been connected to theories of democratic politics based on interdependent citizens

Why We Vote David E. Campbell, 2010-12-16 Why do more people vote or get involved in other civic and political activities in some communities than in others Why We Vote demonstrates that our communities shape our civic and political engagement and that schools are especially significant communities for fostering strong civic norms Much of the research on political participation has found that levels of participation are higher in diverse communities where issues important to voters are hotly contested In this well argued book David Campbell finds support for this view but also shows that homogenous communities often have very high levels of civic participation despite a lack of political conflict Campbell maintains that this sense of civic duty springs not only from one's current social environment but also from one's early influences The degree to which people feel a sense of civic obligation stems in part from their adolescent experience Being raised and thus socialized in a community with strong civic norms leads people to be civically engaged in adulthood Campbell demonstrates how the civic norms within one's high school impact individuals' civic involvement even a decade and a half after those individuals have graduated Efforts within America's high schools to enhance young people's sense of civic responsibility could have a participatory payoff in years to come the book concludes thus schools would do well to focus more attention on building civic norms among their students

Karen M. Kaufmann, 2004-01-26 Karen Kaufmann's groundbreaking study shows that perceptions of interracial conflict can cause voters in local elections to focus on race rather than party attachments or political ideologies. Using public opinion data to examine mayoral elections in New York and Los Angeles over the past 35 years, Kaufmann develops a contextual theory of local voting behavior that accounts for the Republican victories of the 1990s in these overwhelmingly Democratic cities and the liberal revivals that followed. Her conclusions cast new light on the interactions between government institutions, local economies, and social diversity. *The Urban Voter* offers a critical analysis of urban America's changing demographics and the ramifications of these changes for the future of American politics. This book will interest scholars and students of urban politics, racial politics, and voting behavior; the author's interdisciplinary approach also incorporates theoretical insights from sociology and social psychology. *The Urban Voter* is appropriate for both undergraduate and graduate level courses. Karen Kaufmann is Assistant Professor in the Department of Government and Politics at the University of Maryland College Park.

The Networked Young Citizen Brian D. Loader, Ariadne Vromen, Michael Xenos, 2014-06-05 The future engagement of young citizens from a wide range of socio-economic, ethnic, and cultural backgrounds in democratic politics remains a crucial concern for academics, policy makers, civics teachers, and youth workers around the world. At a time when the negative relationship between socio-economic inequality and levels of political participation is compounded by high youth unemployment or precarious employment in many countries, it is not surprising that new social media communications may be seen as a means to re-engage young citizens. This edited collection explores the influence of social media such as YouTube, Facebook, and Twitter upon the participatory culture of young citizens. This collection, comprising contributions from a number of leading international scholars in this field, examines such themes as the possible effects of social media use upon patterns of political socialization, the potential of social media to ameliorate young

people's political inequality the role of social media communications for enhancing the civic education curriculum and evidence for social media manifesting new forms of political engagement and participation by young citizens These issues are considered from a number of theoretical and methodological approaches but all attempt to move beyond simplistic notions of young people as an undifferentiated category of the internet generation
