The CISRUL PhD programme is centred on the application of political ideas globally. The objective is to inform debate about how political concepts are used in the world, and to what effect. Political principles such as citizenship, democracy, civil society and constitutionalism are used as often by policy makers, media commentators and social movements as they are by scholars. Yet insufficient attention is paid to, for example, how 'citizenship education' is understood by education ministries across the world, what concepts of 'democratisation' are embedded in foreign policy, what 'building civil society' means to strategists in Europe and beyond, and how 'constitutionalism' is understood globally when even authoritarian states have constitutions. Without reflecting on how such concepts are being invoked and deployed, scholars, policy analysts and political actors risk reproducing the misunderstandings and repeating the failures of the past.

CISRUL brings together an inter-disciplinary group of researchers, from across the humanities and social sciences, to consider how political principles have been fostered historically, debated philosophically and politically, fought over by social movements, codified in law, transmitted through education and the media, and lived out in everyday life. Our aim is to *understand* how, for example, 'democracy' was understood by the Arab protestors who called for it, what 'nation' is coming to mean in Central and Eastern Europe, in what sense 'civil society' can serve as a bulwark against extremism, and what 'secularism' represents in Europe and

Civil Society, Public Sphere and Citizenship Rajeev Bhargava, Helmut Reifeld, 2005-05-27 The original essays brought together in this volume examine the relationship between state and society in India discuss ideas of citizenship and study the broad area known as public sphere

The eminent scholars who have contributed to this volume provide numerous fresh insights into issues that have been the subject of extensive debate in recent years. The first book which deals simultaneously with civil society, the public sphere and citizenship in the contemporary context, it also provides a comparative perspective with the West. Performing Citizenship Inbal Ofer, Tamar Groves, 2015-12-07. In this book, Tamar Groves and Inbal Ofer explore the effects of social movements and activism on the changing practices and conceptions of citizenship. Presenting empirically rich case studies from Latin America, Asia and Europe, leading experts analyze the ways in which the shifting balance of power between nation-state, economy and civil society over the past half century affected social movements in their choice of addressees and repertoires of action. Divided into two parts, the first part focuses on citizenship as a form of political and cultural participation. The three case studies that make up this section look into the ways in which social movements and activism prompted a critical re-evaluation of two central questions: Who can be considered a citizen? And what forms of political and cultural participation effectively enable citizens to exercise their rights? The second section focuses on citizenship as a form of community building. The three case studies that are included in this section address the ways in which activism fosters new forms of advocacy and communication, leading to the emergence of new communities and assigning qualities of fraternity to the status of citizenship. Throughout most of the 20th century, social movements literature focused on the challenges these entities posed to the state, since it was the state that had the capacity and willingness to grant social and economic concessions. This situation started to shift in the late 1960s. By the 1980s, the existing configuration between the state, civil society and the economy was increasingly challenged by market penetration. Accordingly, we witness a proliferation of social movements that no longer target state institutions or do so only partially. Their repertoires of action interact continuously with everyday practices, reshaping demands within specific organizational, legislative and political contexts. As a result, such activism expands the understanding of the concept of citizenship so as to include demands relating to livelihood, division of resources, the production and dissemination of knowledge and forms of civic participation and solidarity. Written for scholars who study social movements, citizenship and the relationship between the state and civil society over the past half century, this book provides a fresh insight on the nature of citizenship, increasingly framing the condition of being a citizen in terms of performance and on-going practices rather than simply in relation to the attainment of a formal status. Citizenship In A Global Age Delanty, Gerard, 2000-12-01. This book provides a comprehensive and concise overview of the main debates on citizenship and the implications of globalization. It argues that citizenship is no longer defined by nationality and the nation-state but has become de-territorialized and fragmented into the separate discourses of rights, participation, responsibility and identity.
