Citizenship and Immigration in Postwar Britain Randall Hansen, 2000-06-01 In this contentious and ground breaking study the author draws on extensive archival research to provide a new account of the transformation of the United Kingdom into a multicultural society through an analysis of the evolution of immigration and citizenship policy since 1945 Against the prevailing academic orthodoxy he argues that British immigration policy was not racist but both rational and liberal In this ground breaking book the author draws extensively on archival material and theoretical advances in the social science literature Citizenship and Immigration in Post war Britain examines the transformation since 1945 of the UK from a homogeneous into a multicultural society Rejecting a dominant strain of sociological and historical inquiry emphasizing state racism Hansen argues that politicians and civil servants were overall liberal relative to the public to which they owed their office and that they pursued policies that were rational for any liberal democratic politician He explains the trajectory of British migration and nationality policy its exceptional liberality in the 1950s its restrictiveness after then and its tortured and seemingly racist definition of citizenship The combined effect of a 1948 imperial definition of citizenship adopted independently of immigration and a primary commitment to migration from the Old Dominions locked British politicians into a series of policy choices resulting in a migration and nationality regime that was not racist in intention but was racist in effect In the context of a liberal elite and an illiberal public Britain's current restrictive migration policies result not from the failing of its policy makers but from those of its institutions

Nationality, Migration Rights and Citizenship of the Union Stephen Hall,2023-10-20 One of the most striking changes contained in the Maastricht Treaty was the establishment of a de jure citizenship of the Union For the first time since the Roman Empire peoples of Eastern Western Northern and Southern Europe share a common legal citizenship status The significance of this development is potentially profound yet it is one of the least discussed aspects of the Maastricht Treaty In this book Stephen Hall examines the legal implications of establishing a European citizenship He shows that Community law has never given unqualified effect to the Member States dispositions of

their nationalities and that the Member States have had their sovereign power to confer and withdraw their nationalities qualified by the Maastricht Treaty The book goes on to discuss the implications of Union citizenship on Community migration rights demonstrating that the new non economic migration rights for Union citizens are directly effective but that they are subject to a range of important limitations and conditions Among these conditions is a residual constitutional power contingently retained by the Member States to derogate from Community rights on the grounds of national or public security

Migration and the Crisis of Democracy in Contemporary Europe Christoph M. Michael, 2021-01-12 This innovative and thought provoking study puts forth a compelling analysis of the constitutive nexus at the heart of the European refugee conundrum It maps and historically contextualises some of the distinctive challenges that pervasive ethnic and cultural pluralism present to real politics as on the level of political theorizing By systematically integrating hitherto insufficiently linked research perspectives in a novel way it lays open a number of paradoxical constellations and regressive tendencies in contemporary European democracy It thereby redirects attention to the ways in which liberal thought and liberal democratic institutions shape interact with and may even provide justification for illiberal and exclusionary practices This book thus makes an important contribution to the analysis of post migrant realities in Europe and the ways in which they are defined by imperial legacies punitive migration regimes the culturalization of mainstream politics and the discursive construction of a European Other

Domination, migration and non-citizens Iseult Honohan, Marit Hovdal-Moan, 2016-03-17 Does the concept of domination cast new light on issues that arise in the context of migration and citizenship If citizenship is a status that provides protection from domination understood as subjection to arbitrary interference are non citizens whether outside or inside the state necessarily subject to domination by virtue of being non citizens Does domination provide a useful basis for considering the harms that migrants suffer If non domination is a value to be promoted in politics what are the implications for the treatment of migrants and resident non citizens This book addresses issues of migration and citizenship within the frame of freedom in terms of domination understood as being subject to the threat of arbitrary interference Coming from a variety of perspectives the chapters examine the issues of migration controls differential resident statuses including temporary workers refugees and long term residents and the conditions for access to citizenship in the light of these concerns This book was published as a special issue of the Critical Review of International Social and Political Philosophy

RIGHTS, CAPABILITIES AND THE MAKING OF CITIZENS Adina BABEȘ-FRUCHTER, 2024-01-01 I began carrying out research for this book over a decade ago As a graduate student at the Hebrew University of Jerusalem I was intrigued by how a newly arrived Jewish immigrant in Israel with little to no knowledge of Hebrew or a limited experience of democratic processes would comprehend and take advantage of their citizenship rights This curiosity sparked my doctoral research which delved into the journeys of Romanian Jewish immigrants as they navigated a new country and its societal particularities and challenges This publication marks the completion of a doctoral dissertation in political science defended at the National School of Political Studies and Public Administration in Bucharest Romania in February 2013 It establishes a theoretical matrix built on the capability theoretical framework and the concept of citizenship as a new way to examine and evaluate how migrants mobilise their beings and doings to exercise the social and political rights of their newly conferred citizenship Employing this evaluative model in further studies could reveal and lead to recommendations to enhance individuals capabilities Additionally this book aims to engage with experts working in the field of migration policy It aspires to provide them with a more comprehensive understanding of the challenges immigrants face and as a result elucidate targeted and inspirational solutions

Protesting Citizenship: Migrant Activisms Imogen Tyler, 2017-07-05 What does it mean to state No One is Illegal This rallying call is what unifies migrant protests against exclusionary border regimes around the world bringing migrants citizens legal and illegal people onto the streets in ever greater numbers Indeed the last decade has witnessed an explosion of immigrant protests political mobilizations by irregular migrants and pro migrant activists This edited collection aims to contribute to the growing body of scholarship on migrant resistance movements and to consider the implications of these struggles for critical understandings of citizenship and borders It offers a rich series of theoretical and political interventions which together explore the tensions between integrationist and autonomous approaches and between migrant and activist strategies of invisibility and visibility By bringing immigrant protests to the heart of debates about

citizenship it also extends discussions about the limits and the possibilities of citizenship as the material and conceptual horizon of critical social analysis political participation and democracy today This book was published as a special issue of Citizenship Studies *Immigration, Integration, and Security* Ariane Chebel D'Appollonia, Simon Reich, 2008-05-01 Recent acts of terrorism in Britain and Europe and the events of 9 11 in the United States have greatly influenced immigration security and integration policies in these countries Yet many of the current practices surrounding these issues were developed decades ago and are ill suited to the dynamics of today s global economies and immigration patterns At the core of much policy debate is the inherent paradox whereby immigrant populations are frequently perceived as posing a potential security threat yet bolster economies by providing an inexpensive workforce Strict attention to border controls and immigration quotas has diverted focus away from perhaps the most significant dilemma the integration of existing immigrant groups Often restricted in their civil and political rights and targets of xenophobia racial profiling and discrimination immigrants are unable or unwilling to integrate into the population These factors breed distrust disenfranchisement and hatred factors that potentially engender radicalization and can even threaten internal security The contributors compare policies on these issues at three relational levels between individual EU nations and the U S between the EU and U S and among EU nations What emerges is a timely and critical examination of the variations and contradictions in policy at each level of interaction and how different agencies and different nations often work in opposition to each other with self defeating results While the contributors differ on courses of action they offer fresh perspectives some examining significant case studies and laying the groundwork for future debate on these crucial issues Citizenship, Immigration and Ethnic Groups in Canada Canada.
