## **Citizenship Beyond The State:**

Citizenship Beyond the State John Hoffman, 2004-05-25 Citizenship Beyond the State is a critical introduction to the concept of citizenship it challenges the notion that citizenship has to be defined as membership of a state a notion implicit in Derek Heater's book and only touched on in Keith Faulks' earlier work

**Global Citizen - Challenges and Responsibility in an Interconnected World** Aksel Braanen Sterri, 2015-02-03 A globalized world places new demands on us as citizens Global Citizen Challenges and Responsibility in an Interconnected World gives insight and perspectives on what it means to be a citizen in a global world from Norway's most distinguished scholars It poses and answers important questions such as which duties and rights do we have as citizens in a globalized world which institutions are just and sustainable and how can a global ethic and a global worldview be reconciled with the fact that the lives of the greater part of the Earth's population is still local Global Citizen Challenges and Responsibility in an Interconnected World draws on insights from philosophy jurisprudence theology and the social sciences to shed light on this manifold and important topic with relevance for policy makers stakeholders academics but most important for us as citizens who need to take both a political and personal decision on how to live as a citizen in a global world

**EU Citizenship Beyond Urban Centres** Astrid Lorenz, Lisa H. Anders, 2023-07-14 This open access book provides in depth and comparative analyses of how young people in peripheral areas in Poland the Czech Republic Slovakia Hungary and Romania perceive EU citizenship It also informs the reader about the challenges faced by EU Youth Dialogue projects that aim at promoting active EU citizenship in these areas and it offers context specific recommendations for local regional national and European policymakers and people working with young people The contributions are based on new qualitative data collected within the framework of the Jean Monnet Centre of Excellence at Leipzig University It will be of interest to practitioners and scholars working on Europe and the EU citizenship and the promotion of an active EU citizenship beyond urban centres

The Oxford Handbook of Citizenship Ayelet Shachar, Rainer Bauböck, Irene Bloemraad, Maarten Peter Vink, 2017 This Handbook sets a new agenda for theoretical and practical explorations of citizenship analysing the main challenges and prospects informing today's world of increased migration and globalization It will also explore new forms of membership and democratic participation beyond borders and the rise of European and multilevel citizenship

**The Idea of Global Civil Society** Randall Germain, Michael Kenny, 2004-08-02 This book evaluates the claim that in order to explore the changing social foundations of global power relations today we need to include in our analysis an understanding of global civil society particularly if we also wish to raise ethical questions about the changing political and institutional practices of transnational governance Bridging the normative concerns of political theorists with the historical and institutional focus of scholars of international relations and international political economy this book is of broad interest to students and researchers concerned with international relations civil society global governance and ethics

Citizenship in Contemporary Times Gorky Chakraborty, 2022-12-23 This book

engages with evolving definitions of borders and citizenship in the public discourse in the South Asia region The traditional understanding of citizenship and belonging in the Indian context has been fraying in recent decades The book offers an analysis of discussions on India's contested zones the anxieties around identity and the implications of and reactions to the National Register of Citizens and the Citizenship Amendment Act CAA in different regions in the country It interrogates the concepts of belonging ownership and dissent through an analysis of the anti CAA protests the Namasudra movements the life of Tibetan refugees in India and the precarious lives of many communities in India who are identified as stateless refugees migrants or outsiders Interdisciplinary and topical this book will be of interest to students and researchers of sociology political science law refugee studies borderland studies migration studies public policy social policy and development studies

**Citizenship** Keith Faulks, 2013-09-27 This book presents a clear and comprehensive overview of citizenship which has become one of the most important political ideas of our time The author an experienced textbook writer and teacher uses a postmodern theory of citizenship to ask topical questions as Can citizenship exist without the nation state What should the balance be between our rights and responsibilities Should we enjoy group as well as individual rights Is citizenship relevant to our private as well as our public lives Have processes of globalisation rendered citizenship redundant *Troubling Notions of Global Citizenship and Diversity in Mathematics Education* Anna Chronaki, Ayşe Yolcu, 2025-03-06 This edited volume explores how mathematics education is re configured in relation to its past present and future when the rhetoric of critical global citizenship education is being applied to diverse local settings Drawing upon diverse theoretical and methodological traditions across the globe including countries in South America Asia Australia and Europe each chapter challenges and eventually troubles the wide circulation of a universal imagery of citizenship based on mathematical competence in not only curriculum school reforms and policy but also in teaching and learning practices Troubling the Euro centric and global notions of citizenship and diversity the book foregrounds local practices in mathematics education to portray a broader picture for the current problems of equity social justice and democracy The book also engages with critical discussions on how citizens and noncitizen are being fabricated in the context of educational policies and specific mathematical practices First of its kind to trouble what is at stake when mathematics education is framed within the discourses of citizenship globally through challenging and problematising what is understood as normal this book will be of relevance to scholars academics and researchers in the field of sociology of education anthropology of education philosophy of education mathematics education citizenship studies and international and comparative education *Citizenship Education and Global Migration* James A. Banks, 2017-06-23 This groundbreaking book describes theory research and practice that can be used in civic education courses and programs to help students from marginalized and minoritized groups in nations around the world attain a sense of structural integration and political efficacy within their nation states develop civic participation skills and reflective cultural national and global identities Changing Notions of Citizenship Education

in Contemporary Nation-states ,2007-01-01 This book offers an examination into the meanings of citizenship in the contemporary world and trends that are forcing a rethinking of the concept in today's nation states These changing meanings in turn give rise to new understandings of and approaches to citizenship education The underlying values of participation deliberation and loyalty or patriotism that define different notions of citizenship are under strain in a world increasingly defined by global processes by the rise of transnational or supranational institutions and by interconnections that bring different cultures and value systems into closer contact with each other What does this new citizen look like What does this new citizen need to know or need to be able to do To whom and to what is this new citizen loyal One way to think about this new citizen is as a cosmopolitan a citizen of the world more than of any particular nation state another way to think about it is in terms of different kinds or levels of affiliation existing simultaneously to nation and to regional alliance such as the European Union for example These conditions of citizenship and of citizenship education are rapidly changing and diverse and in some instances they come into conflict This collection of essays an outstanding international group of scholars examines the tensions between national transnational and postnational conceptions of citizenship brought back always to the grounded question of citizenship education and how to go about it The authors illuminate the complexity and subtlety of these issues and offer helpful guidance for rethinking the meanings and values that inform our educational endeavours

**Beyond State Crisis?** Mark Beissinger,M. Crawford Young,2002-01-24 The contributors not only study state breakdown but compare the consequences of post communism with those of post colonialism      **The Future Governance of Citizenship** Dora Kostakopoulou,2008-05-08 In much of the citizenship literature it is often considered if not simply assumed that citizenship is integral to the character of a self determining community and that this process by definition involves the exclusion of resident foreigners Dora Kostakopoulou calls this assumption into question arguing that aliens are by definition outside the bounds of the community by virtue of a circular reasoning which takes for granted the existence of bounded national communities and that this process of collective self definition is deeply political and historically dated Although national citizenship has enjoyed a privileged position in both theory and practice its remarkable elasticity has reached its limit thereby making it more important to find an alternative model Kostakopoulou develops a new institutional framework for anational citizenship which can be grafted onto the existing state system defends it against objections and proposes institutional reform based on an innovative approach to citizenship      **Citizenship in the European Union** Anne Wesemann,2020-10-30 The book proposes a new approach to constitutional analysis of the EU and its legal framework arguing that the existence of constitutional rights norms within EU law enables this particular legal order to respond effectively to societal and political challenges within the rigidity of constitutionalism Providing new perspectives on constitutionalism in the EU this book considers the way the Court of Justice of the European Union CJEU discusses and applies the EU citizenship Treaty norms by analysing the courts approach to decision making which resembles the balancing

and weighing of conflicting principles      **EU Citizenship, Nationality and Migrant Status** Kristīne Krūma, 2013-10-24 In EU Citizenship Nationality and Migrant Status An Ongoing Challenge Kristīne Krūma offers an account of the regulation of nationality at international EU and national Latvian levels Growing global migration and multiple individual loyalties lead to a fusion of national identities traditionally preserved by the EU Member States Dismantling national borders and granting directly effective rights to EU citizens broadens our understanding about belonging only to the limited territory of a single State The primary focus is the status of the EU citizenship which has become a meaningful status capable of satisfying claims by citizens The Latvian example shows that migrant status cannot be ignored because of the crucial role of migrants in the future construct of the EU

**Global Citizenship** Nigel Dower, John Williams, 2016-04-22 The idea of global citizenship is that human beings are citizens of the world Whether or not we are global citizens is a topic of great dispute however those who take part in the debate agree that a global citizen is a member of the wider community of humanity the world or a similar whole which is wider than that of a nation state or other political community of which we are normally thought to be citizens Through four main sections the contributors to Global Citizenship discuss global challenges and attempt to define the ways in which globalization is changing the world in which we live Offering a breadth of coverage to the core theme of the individual in a global world Global Citizenship combines two factors the idea of global responsibility and the development of institutional structures through which this responsibility can be exercised

**The Political Theory of Global Citizenship** April Carter, 2013-07-04 This book provides a comprehensive overview of the meaning of cosmopolitanism and world citizenship in the history of Western political thought and in the evolution of international politics since 1500 Providing an invaluable overview of earlier political thought recent theoretical literature and current debates this book also discusses recent developments in international politics and transnational protest It will be of great interest to those specialising in political theory International Relations and peace conflict studies It will also interest those already acting as global citizens

*Citizenship* Richard Yarwood, 2013-12-17 The idea of citizenship is widely used in daily life Citizenship tests are used to determine who can inhabit a country citizen charters have been used to prescribe levels of service provision citizens juries are used in planning or policy enquiries citizenship lessons are taught in schools youth organisations attempt often aim to instil good citizenship active citizens are encouraged to contribute voluntary effort to their local communities and campaigners may use citizens rights to achieve their goals What is meant by citizenship is never static and the subject of debate by academics politicians and activists These ideas are manifest and contested at a range of different scales This book therefore argues geography is crucial to understanding citizenship The text is organised around a number of spatial themes to examine how spatialities of citizenship are played out at a range of scales Ideas about locality boundaries mobility networks rurality and globalisation are used to reveal the importance of space and place in the constitution contestation and performance of citizenship In doing so the book reveals how different ideas of citizenship can include or exclude people from

society and space Consideration is given to ways in which different groups have sought to empower themselves through various actions associated with and beyond conventional notions of citizenship Written in an accessible way with detailed case studies to illustrate conceptual ideas and approaches this book offers social scientists new spatial perspectives on citizenship while also bridging together strands of social cultural and political geography in ways that deepen understandings of people and place

**The Practice of Citizenship** Derrick R. Spires, 2019-03-08 In the years between the American Revolution and the U S Civil War as legal and cultural understandings of citizenship became more racially restrictive black writers articulated an expansive practice based theory of citizenship Grounded in political participation mutual aid critique and revolution and the myriad daily interactions between people living in the same spaces citizenship they argued is not defined by who one is but rather by what one does In *The Practice of Citizenship* Derrick R Spires examines the parallel development of early black print culture and legal and cultural understandings of U S citizenship beginning in 1787 with the framing of the federal Constitution and the founding of the Free African Society by Absalom Jones and Richard Allen and ending in 1861 with the onset of the Civil War Between these two points he recovers understudied figures such as William J Wilson whose 1859 *Afric American Picture Gallery* appeared in seven installments in *The Anglo African Magazine* and the physician abolitionist and essayist James McCune Smith He places texts such as the proceedings of black state conventions alongside considerations of canonical figures such as Frances Ellen Watkins Harper and Frederick Douglass Reading black print culture as a space where citizenship was both theorized and practiced Spires reveals the degree to which concepts of black citizenship emerged through a highly creative and diverse community of letters not easily reducible to representative figures or genres From petitions to Congress to Frances Harper s parlor fiction black writers framed citizenship both explicitly and implicitly the book demonstrates not simply as a response to white supremacy but as a matter of course in the shaping of their own communities and in meeting their own political social and cultural needs

**Defiant Publics** Daniel Drache, 2013-08-23 Social activism and dissent have become global phenomena for our times Ordinary people across the world are fighting back This newly potent political force has defeated governments in India and Spain and has brought down the EU draft constitution Disaffected by the triumph of markets public goods public interest and public spaces are regaining political ground Daniel Drache argues that feeding off distrust and suspicion of governments and assisted by the new cultural flows of people ideas and information this is a political phenomenon without historical precedent No one owns the new public elites remain baffled by its power and impact No one can contain its innovative inclusive and rapidly evolving organizational style No one can determine when the current cycle of dissent will peak This lively and engaging book is a must read for anyone interested in the role of protesters and publics in contemporary politics

**Protesting Citizenship: Migrant Activisms** Imogen Tyler, 2017-07-05 What does it mean to state No One is Illegal This rallying call is what unifies migrant protests against exclusionary border regimes around the world bringing migrants citizens legal and illegal people onto the

streets in ever greater numbers Indeed the last decade has witnessed an explosion of immigrant protests political mobilizations by irregular migrants and pro migrant activists This edited collection aims to contribute to the growing body of scholarship on migrant resistance movements and to consider the implications of these struggles for critical understandings of citizenship and borders It offers a rich series of theoretical and political interventions which together explore the tensions between integrationist and autonomous approaches and between migrant and activist strategies of invisibility and visibility By bringing immigrant protests to the heart of debates about citizenship it also extends discussions about the limits and the possibilities of citizenship as the material and conceptual horizon of critical social analysis political participation and democracy today This book was published as a special issue of Citizenship Studies
