Banks, 2017-06-23 This groundbreaking book describes theory research and practice that can be used in civic education courses and programs to help students from marginalized and minoritized groups in nations around the world attain a sense of structural integration and political efficacy within their nation states develop civic participation skills and reflective cultural national and global identities **Citizen, Student, Soldier** Gina M. Pérez, 2015-11-27 Since the 1990s Junior Reserve Officer Training Corps JROTC programs have experienced unprecedented expansion in American public schools The program and its proliferation in poor urban schools districts with large numbers of Latina o and African American students is not without controversy Public support is often based on the belief that the program provides much needed discipline for at risk youth Meanwhile critics of JROTC argue that the program is a recruiting tool for the U S military and is yet another example of an increasingly punitive climate that disproportionately affect youth of color in American public schools Citizen Student Soldier intervenes in these debates providing critical ethnographic attention to understanding the motivations aspirations and experiences of students who participate in increasing numbers in JROTC programs These students have complex reasons for their participation

reasons that challenge the reductive idea that they are either dangerous youths who need discipline or victims being exploited by a predatory program. Rather, their participation is informed by their marginal economic position in the local political economy as well as their desire to be regarded as full citizens both locally and nationally. Citizenship is one of the central concerns guiding the JROTC curriculum; this book explores ethnographically how students understand and enact different visions of citizenship and grounds these understandings in local and national political economic contexts. It also highlights the ideological, social, and cultural conditions of Latina/o youth and their families who both participate in and are enmeshed in vigorous debates about citizenship obligation, social opportunity, militarism, and ultimately the American Dream.

Activist Citizenship Education Keith Heggart, 2021-01-02. This book explores alternative models of civics and citizenship education. Specifically, it uses Justice Citizens, a participatory research and film-making project, as a tool to examine young people's ideas about active citizenship and participation in public spaces. It introduces a framework that seeks to explore the diverse and apparently contradictory nature of young people's active citizenship. The framework draws on complexity theory combined with critical pedagogy and democratic education to formulate an approach to developing active citizenship among young people. This approach extends theories of both critical pedagogy and education for citizenship and, by doing so, seeks to explain the variegated nature of young people's engagement with civil society. This book contains a valuable repository of ideas and resources for application for teachers to use in schools and classrooms. Academics engaged in initial teacher education at both primary and secondary levels will find the framework of use when describing the importance and new approaches to civics and citizenship education within the current school and policy environments.

Global Citizenship Education Eva Aboagye, S. Nombuso Dlamini, 2021-03-05. Drawing on contemporary global events, this book highlights how global citizenship education can be used to critically educate about the complexity and repressive nature of global events and our collective role in creating a just world.

International Migration and Citizenship Today Niklaus Steiner, 2009-09-10. International migration has emerged in the last decade as one of the world's most controversial and pressing issues. This thought-provoking textbook offers the reader a more nuanced and knowledgeable understanding of the complex economic, political, cultural, and moral concerns that arise when people move across borders seeking admission into other countries. Splitting the text into five broad sections, Steiner facilitates easy navigation of the complex discussions that surround the issue of migration. Section One, Introduction, examines how the central questions that frame the book will be addressed, including what criteria should be used to admit migrants and how should a country grant citizenship. Section Two, Immigrants, discusses the criteria for accepting immigrants, dealing with the unwanted, and assessing the economic, cultural, and political impacts. Section Three, Refugees, evaluates the methods used to protect refugees, the controversies surrounding asylum, and the shortcomings of current refugee definitions. Section Four, Citizenship, charts the rise of nationalism, presents modern issues of minority rights and diversity, and examines processes of naturalization across the

globe Section Five Conclusion considers more unconventional approaches to migration and citizenship and suggests moving towards a more holistic approach Carefully constructed to spark discussion and student reflection and featuring suggested resources at the end of each section this book offers dozens of contemporary examples and case studies from across the globe International Migration and Citizenship Today is essential reading for not only students of migration and citizenship but also globalization international relations and democracies Articulating Citizenship Robert Culp,2020-03-23 At the genesis of the Republic of China in 1912 many political leaders educators and social reformers argued that republican education should transform China s people into dynamic modern citizens social and political agents whose public actions would rescue the national community Over subsequent decades however they came to argue fiercely over the contents of citizenship and how it should be taught Moreover many of their carefully crafted policies and programs came to be transformed by textbook authors teachers administrators and students Furthermore the idea of citizenship once introduced raised many troubling questions Who belonged to the national community in China and how was the nation constituted What were the best modes of political action How should modern people take responsibility for public matters What morality was proper for the modern public This book reconstructs civic education and citizenship training in secondary schools in the lower Yangzi region during the Republican era It also analyzes how students used the tools of civic education introduced in their schools to make themselves into young citizens and explores the complex social and political effects of educated youths civic action **Language Policies and (Dis)Citizenship** Vaidehi Ramanathan,2013-08-07 This volume explores the concept of citizenship and argues that it should be understood both as a process of becoming and the ability to participate fully rather than as a status that can be inherited acquired or achieved From a courtroom in Bulawayo to a nursery in Birmingham the authors use local contexts to foreground how the vulnerable particularly those from minority language backgrounds continue to be excluded whilst offering a powerful demonstration of the potential for change offered by individual agency resistance and struggle In addressing questions such as under what local conditions does dis citizenship happen what role do language policies and pedagogic practices play and what kinds of margins and borders keep humans from fully participating The chapters in this volume shift the debate away from visas and passports to more uncertain and contested spaces of interpretation **Howe's New Era Civics for the Students of Today and the Citizens of Tomorrow** John Benedict Howe,1922 Learning Citizenship Paul Clarke,Jenny Wales,2005-07-05 This book shows how a variety of teaching strategies can be used to teach citizenship skills across a range of curriculum subjects as well as in Citizenship lessons **Citizenship Education in the Era of Globalization** ,2008-01-01 This collection of timely articles is the first to explore the dynamics between globalization and education from a specifically Canadian perspective The articles engage with emergent debates and new discourses around global orientations to citizenship education currently defining scholarly work and teaching practices in Canada This book will therefore be of great interest to Canadian teacher educators who are seeking

to infuse a global perspective into their pre service programs as well as to globally oriented undergraduate and graduate course instructors from a range of scholarly disciplines both in Canada and elsewhere The Canadian perspective proves to be not surprisingly global in essence The articles contained in Citizenship Education in the Era of Globalization Canadian Perspectives map the history of citizenship education and global studies and probe the notion of global citizenship for its possibilities and impossibilities Recognizing the importance of engaging with the lives of students and teachers the contributions also include articles reporting on research and theory about such topics as the complexities of second generation youth identity and the extent to which mainstream teachers can bring global citizenship education into their classrooms The collection presents an engaging look into the theory and practice of citizenship education in Canada during a time when bringing global issues to the classroom is an imperative of democratic schooling

Campus Student Activism, Politics, and Citizenship in the 21st Century Tshishonga, Ndwakhulu, 2025-04-03 Student activism and citizenship remain an integral part of the governance of academic institutions democratizing the learning environment and advancing democratic values and societal change As a result student activism has become a key aspect of the global higher education landscape Individually and through the student councils students have been at the forefront fighting for social justice and equality inside their academic institutions and in larger society by fusing activism with citizenship Through student activism and citizenship students demonstrate their power to keep governments responsible and in redirecting the voices of students in higher education s decision making processes Further exploration may afford students the opportunity to influence social change by partaking in educational policy reforms and broadening global sociopolitical and economic growth **Campus Student Activism Politics and Citizenship in the 21st Century** examines the dynamics of campus politics through student activism and citizenship perspectives academia public private and civil society sectors It explores how student leadership engages university society stakeholders including management and governance structures and student welfare and institutional policy reformation in defense of the rights and interests of students This book covers topics such as higher education political engagement and social justice and is a useful resource for policymakers government officials sociologists political scientists academicians and researchers

Citizenship and Higher Education James Arthur, Karen Bohlin, 2005-03-16 This comparative text considers models of higher education in the UK and the US and individuals perceptions about the role of university in society

Teaching History, Learning Citizenship Jeffery D. Nokes, 2019 Learn how to design history lessons that foster students knowledge skills and dispositions for civic engagement Each section of this practical resource introduces a key element of civic engagement such as defending the rights of others advocating for change taking action when problems are observed compromising to promote reform and working with others to achieve common goals Primary and secondary sources are provided for lessons on diverse topics such as the Alice Paul and the Silent Sentinels Samuel Gompers and the American Federation of Labor Harriet Tubman Reagan and Gorbachev s unlikely

friendship and Lincoln's plan for Reconstructing the Union With Teaching History Learning Citizenship teachers can show students how to apply historical thinking skills to real world problems and to act on civic dispositions to make positive changes in their communities Teachers will appreciate the adaptability of the unscripted lessons in this book Each lesson provides background historical context for the teacher and the resources to expose students to themes of civic engagement that cut across historical time periods and current events With the case studies ideas and sources in this book teachers can instill students with the dispositions of democratic citizens From the Foreword by Laura Wakefield interim executive director National Council for History Education
