City As Suburb A History Of Northeast Baltimore Since 166:

The City as Suburb Eric L. Holcomb, 2008 Northeast Baltimore has undergone a transformation from a rural area into a city suburb an experience shared by many similar U S metropolitan areas Now reflecting changes through 2007 Eric L Holcomb s updated edition traces this prototypical process from the region s origins as a hunting ground of the Susquehannocks through its earliest settlement by Europeans in the eighteenth century and its idealization as a picturesque landscape during the nineteenth century to its rise as a suburb in the twentieth century Holcomb s obvious passion for the area combined with his thorough research in geographic indicators such as land ownership patterns provide a broad empirical foundation for this richly illustrated history Distributed for the Center for American Places

How the Suburbs Were Segregated Paige Glotzer, 2020-04-28 The story of the rise of the segregated suburb often begins during the New Deal and the Second World War when sweeping federal policies hollowed out cities pushed rapid suburbanization and created a white homeowner class intent on defending racial barriers Paige Glotzer offers a new understanding of the deeper roots of suburban segregation The mid twentieth century policies that favored exclusionary housing were not simply the inevitable result of popular and elite prejudice she reveals but the culmination of a long term effort by developers to use racism to structure suburban real estate markets Glotzer charts how the real estate industry shaped residential segregation from the emergence of large scale suburban development in the 1890s to the postwar housing boom Focusing on the Roland Park Company as it developed Baltimore s wealthiest whitest neighborhoods she follows the money that financed early segregated suburbs including the role of transnational capital mostly British in the U S housing market She also scrutinizes the business practices of real estate developers from vetting homebuyers to negotiating with municipal governments for services She examines how they sold the idea of the suburbs to consumers and analyzes their influence in shaping local and federal housing policies Glotzer then details how Baltimore s experience informed the creation of a national real estate industry with professional organizations that lobbied for planned segregated suburbs *How the Suburbs Were Segregated* sheds new light on the power of real estate developers in shaping the origins and mechanisms of a housing market in which racial exclusion and profit are still inextricably intertwined

Croucher, Lindsay Weiss, 2011-08-10 The Archaeology of Capitalism in Colonial Contexts Postcolonial Historical Archaeologies explores the complex interplay of colonial and capital formations throughout the modern world The authors present a critical approach to this topic trying to shift discourses in the theoretical framework of historical archaeology of capitalism and colonialism through the use of postcolonial theory This work does not suggest a new theoretical framework as such but rather suggests the importance of revising key theoretical terms employed within historical archaeology arguing for new engagements with postcolonial theory of relevance to all historical archaeologists as the field de centers from its traditional locations Examining case studies from North America South America the Caribbean Africa Australia the Middle East and Europe the chapters offer an unusually broad ranging geography of historical archaeology with each focused on the interplay between the particularisms of colonial structures and the development of capitalism and wider theoretical discussions Every author also draws attention to the ramifications of their case studies in

the contemporary world With its cohesive theoretical framework this volume is a key resource for those interested in decolonizing historical archaeology in theory and praxis and for those interested in the development of modern global dynamics
