Norton, 2013-10-22 City Life Cycles and American Urban Policy is an interdisciplinary study of differential urban development in the United States since 1945 that aims to place urban policy choices in historical perspective The book discusses the issues and establishes a framework within which relevant quantitative measurements can be interpreted The text also describes systematic empirical tests which typically take the form of regression equations and traces city population changes into two proximate causes annexation and urban growth The reasons for annexation contrasts among the nation's largest cities the second city growth determinant and the institutional explanation for fiscal differential among large cities are also considered The book further tackles the issue of federal fiscal assistance to declining cities Economists will find the book invaluable *Institutional Constraints and Policy Choice* James C. Feiock, 2001-04-12 Demonstrates how governmental structure and institutional rules determine who gets what in American cities *Gentrification of the City* Neil Smith, Peter Williams, 2013-10-15 The author and contributors of this book seek to present alternatives to the mainstream discussions of gentrification It does not present a single coherent vision of the causes effects and experiences of gentrification but a number of different views that do not always coincide What the authors have in common is the attempt to escape a naive empiricism which has dominated much mainstream research as well as the conviction that questions of social class lie at the heart of this issue This book was first published in 1986 **The Saqqara Necropolis through the New Kingdom** Nico Staring, 2022-11-28 This book is the first comprehensive monographic treatment of the New Kingdom 1539 1078 BCE necropolis at Saqqara the burial ground of the ancient Egyptian city of Memphis and addresses questions fundamental to understanding the site's development through time For example why were certain areas of the necropolis selected for burial in certain time periods what were the tombs spatial relations to contemporaneous and older monuments and what effect did earlier structures have on the positioning of tombs and structuring of the necropolis in later times This study adopts landscape biography as a conceptual tool to study the long time interaction between people and landscapes **Case Studies in Public Budgeting and Financial Management, Revised and Expanded** W. Frey, Alden, Jr. Speare, 1988-10-18 During the 1970s several striking population shifts attracted widespread attention and colorful journalistic labels Urban gentrification the rural renaissance the rise of the Sunbelt these phenomena signaled major reversals in long term patterns of population distribution In *Regional and Metropolitan Growth and Decline in the United States* authors Frey and Speare place such reversals in context by examining a rich array of census data This comprehensive study describes new population distribution patterns explores their consequences and evaluates competing explanations of current trends The authors also provide an in depth look at the changing race status and household demographics of the nation's largest cities and discuss the broad societal forces precipitating such changes Frey and Speare conclude that the 1970s represented a transition decade in the history of population distribution and that patterns now emerging do not suggest a return to the past With impressive scope and detail this volume offers an unmatched picture of regional growth and decline across the United States A Volume in the Russell Sage Foundation Census Series [Catalog of Copyright Entries.  Kingsport Tennessee was the first thoroughly diversified professionally planned and privately financed city in twentieth century America The advent of this so called model city a glittering new industrial jewel in the green mountains offered area residents an alternative to rural life and staid small town existence as the new century dawned Neither an Appalachian hamlet nor a company town Kingsport developed as a self proclaimed All American City Produced by the marriage of New South philosophy and Progressivism born of a passing historical moment when capitalists turned their attention to Southern Appalachia and nurtured by the Protestant work ethic Kingsport today reflects its heritage From flaunting its patriotism with grandiose Fourth of July parades to being defensive about its pollution the city exhibits values almost stereotypically those of middle class America But loss of vision and a decline in the quality of leadership plague contemporary Kingsport and like other American industrial strongholds it is buffeted by the winds of the high tech revolution and the changing world economy This first full length biography of Kingsport challenges interpretations of regional history that promote the colonial and poverty models Margaret Ripley Wolfe brings to it the advantage of an insider s perspective In considering the special roles of capital labor industry and government over seven decades she neither patronizes Appalachian workers nor treats developers and industrialists as villains Her book will interest scholars of urbanization city planning landscape architecture and industrialization as well as local history enthusiasts      *Futures for a Declining City* Katharine L.
