Andersson, Charlotta Mellander, 2011-01-01 With the publication of The Rise of the Creative Class by Richard Florida in 2002 the creative city became the new hot topic among urban policymakers planners and economists Florida has developed one of three path breaking theories about the relationship between creative individuals and urban environments The economist E Andersson and the psychologist Dean Simonton are the other members of this creative troika In the Handbook of Creative Cities Florida Andersson and Simonton appear in the same volume for the first time The expert contributors in this timely Handbook extend their insights with a varied set of theoretical and empirical tools The diversity of the contributions reflect the multidisciplinary nature of creative city theorizing which encompasses urban economics economic geography social psychology urban sociology and urban planning The stated policy implications are equally diverse ranging from libertarian to social democratic visions of our shared creative and urban future Being truly international in its scope this major Handbook will be particularly useful for policy makers that are involved in urban development academics in urban economics economic geography urban sociology social psychology and urban planning as well as graduate and advanced undergraduate students across the social sciences and in business

Entrepreneurial Seoulite Mihye Cho, 2019-02-01 Entrepreneurial Seoulite might be read as a memoir on Hongdae based on the author's observations as a member of South Korea's Generation X During the 1990's Hongdae became widely known as a cool place associated with discourses on alternative music independent labels and club culture Today Hongdae is well known for its youth culture and nightlife as well as its gentrification Recent research on Korean culture approaches the K wave phenomenon from the perspectives of cultural consumption media analysis and cultural management and policy Meanwhile studies on Seoul have centered on its transformation as a global creative city Rather than examining the K wave or the city itself this book explores the experience of living through the city in transition focusing on the relationship between the ideology that justified engagement in capitalism and the subjectification process The book aims to understand the project to institutionalize a cultural district in Hongdae as a demonstration of the coevolution of ideologies and citizenship in a

society undergoing rapid liberalization politically culturally and economically A cultural turn took place in Korea during the 1990s amid the economic prosperity driven by state led industrialization and the collapse of the military dictatorship due to democratization movements Cultural critiques emerging as an alternative to social movements proliferated to assert the freedom and autonomy of individuals against regulatory systems and institutions The nation was hit by the Asian financial crisis in 1997 and witnessed massive economic restructuring including layoffs stakeouts and a prevalence of contingent employment As a result the entire nation had to find new engines of economic growth while experiencing a creative destruction At the center of this national transformation Seoul has sought to recreate itself from a mega city to a global city equipped with cutting edge knowledge industries and infrastructures By juxtaposing the cultural turn and cultural creative city making Entrepreneurial Seoulite interrogates the formation of new citizen subjectivity namely the enterprising self in post Fordist Seoul What kinds of logic guide individuals in the engagement of new urban realities in rapidly liberalized Seoul culturally and economically In order to explore this query Mihye Cho draws on Weber's concept of the spirit of capitalism on the formation of a new economic agency focusing on the re configuration of meanings and seeks to capture a transformative moment detailing when and how capitalism requests a different spirit and lifestyle of its participants Likewise this book approaches the enterprising self as the new spirit of post Fordist Seoul and explores the ways in which people in Seoul internalize and negotiate this new enterprising self

Limits to Culture Malcolm Miles, 2015-06-20 How can we unmask the vested interests behind capital's cultural urban agenda *Limits to Culture* pits grass roots cultural dissent against capital's continuing project of control via urban planning In the 1980s notions of the creative class were expressed through a cultural turn in urban policy towards the creative city De industrialisation created a shift away from how people understood and used urban space and consequently gentrification spread With it came the elimination of diversity and urban dynamism new art museums and cultural or heritage quarters lent a creative mask to urban redevelopment This book examines this process from the 1960s to the present day revealing how the notion of creativity been neutered in order to quell dissent In the 1960s creativity was identified with revolt yet from the 1980s onwards it was subsumed in consumerism which continued in the 1990s through cool Britannia culture and its international reflections Today austerity and the scarcity of public money reveal how the illusory creative city has given way to reveal its hollow interior through urban clearances and underdevelopment
