Remaking the City Street Grid Fanis Grammenos, G.R. Lovegrove, 2015-03-18 Of all the elements of a neighborhood the pattern of streets and their infrastructure is the most enduring Given the 20th century's additions to the range of transportation means trains subways buses trucks bicycles motorbikes and cars all vying for space and effectiveness a fresh look at the streets is warranted This book contributes a new system of neighborhood design with a focus on contemporary planning priorities Drawing lessons from historic and current development it proposes a new pattern more fitting for modern culture addressing such issues as walkability mobility health safety security cost and greenhouse gas emissions Case studies of national and international neighborhoods and districts based on the new network model demonstrate its application in real world situations Instructors considering this book for use in a course may request an examination copy here City, Street and Citizen Suzanne Hall, 2012-06-25 How can we learn from a multicultural society if we don't know how to recognise it The contemporary city is more than ever a space for the intense convergence of diverse individuals who shift in and out of its urban terrains The city street is perhaps the most prosaic of the city's public parts allowing us a view of the very ordinary practices of life and livelihoods By attending to the expressions of conviviality and contestation City Street and Citizen offers an alternative notion of multiculturalism away from the ideological frame of nation and away from the moral imperative of community This book offers to the reader an account of the lived realities of allegiance participation and belonging from the base of a multi ethnic street in south London City Street and Citizen focuses on the question of whether local life is significant for how individuals develop skills to live with urban change and cultural and ethnic diversity To animate this question Hall has turned to a city street and its dimensions of regularity and propinquity to explore interactions in the small shop spaces along the Walworth Road The city street constitutes exchange and as such it provides us with a useful space to consider the broader social and political significance of contact in the day to day life of multicultural cities Grounded in an ethnographic approach this book will be of interest to academics and students in the fields of sociology global urbanisation migration and ethnicity as well as being relevant to politicians policy makers urban designers and architects involved in cultural diversity public space and street based economies City Blvd Construction from Eutaw St to Russell St and I-395 from Ostend St to Russell St and Conway St, Baltimore, 1977 The Urban Section Robert Mantho, 2014-09-25 The design of streets and the connections between streets of different character is the most important task for architects and urbanists working in an urban context Considered at two distinct spatial scales that of the individual street the Street Section and the complex of city streets the City Transect Urban Section identifies a range of generic street types and their success or otherwise in responding to climatic cultural traditional morphological social and economic well being Using comparative studies a profile of best practice in street and city design is identified showing methodologies in both the analysis of and design for successful streets and public places place making In uniquely dealing with both the historic and contemporary

Connecticut River Shipbuilding Wick Griswold & Ruth Major,2020 Shipbuilding and shipping have always been key elements in the life of Essex Since the seventeenth century the men and women of lower Connecticut River Valley sustained maritime traditions that spanned the globe in splendid wooden sailing vessels Noted historians detail one village s important role in American maritime history Back cover     **Urban Design: Method and Technique** Rafael Cuesta,Christine Sarris,Paola Signoretta,Raf Cuesta,2007-07-11 This book deals with a wide range of techniques used in the urban design process It is invaluable for architecture planning landscape and surveying students and will also help professionals in the day to day practice A method of urban design is developed which has sustainability and environmental protection at the centre of its philosophy Previously literature regarding the urban design method has been almost totally neglected this book introduces the topic to the reader A number of techniques are illustrated by example or case study Where techniques are discussed they are located within the structure of the design process The book develops a logical framework for a process which includes problem definition survey analysis concept generation evaluation and implementation It is this framework which is presented here as a discourse towards the development of an urban design method This book is a practical guide one that the authors themselves would have found useful as students or in the early years of their professional careers It is organized so that each chapter provides guidance which hitherto students and practitioners in this field have had to discover for themselves often with some difficulty since methods and techniques for urban design is a broad topic thinly spread in published form     *Waterfront Manhattan* Kurt C. Schlichting,2021-04-27 Rich in historical sociological and economic detail a new way to look at the ascendancy and growth of America s most important city Civil Engineering With its maritime links across the oceans along the Atlantic coast and inland to the Midwest and New England Manhattan became a global city and home to the world s busiest port It was a world of docks ships tugboats and ferries filled with cargo and freight a place where millions of immigrants entered the Promised Land In *Waterfront Manhattan* Kurt C Schlichting tells the story of the Manhattan waterfront as a struggle between public and private control of New York s priceless asset From colonial times until after the Civil War the city ceded control of the waterfront to private interests excluding the public entirely and sparking a battle between shipping companies the railroads and ferries for access to the waterfront In the second half of the

nineteenth century the City of New York regained control of the waterfront but a whirlwind of forces beyond the control of either public or private interests technological change in the form of the shipping container and the jet airplane devastated the city's maritime world The city slowly and painfully recovered Visionaries reimagined the waterfront and today the island is almost completely surrounded by parkland the world of piers and longshoremen gone replaced by luxury housing and tourist attractions Waterfront Manhattan is an impressive narrative which is sure to shed light on this underappreciated aspect of New York City history Global Maritime History An important book There is much to ponder on the future of New York City's harbor Journal of American History

*Subaltern Geographies* Tariq Jazeel, Stephen Legg, 2019 *Subaltern Geographies* is the first book length discussion addressing the relationship between the historical innovations of subaltern studies and the critical intellectual practices and methodologies of cultural urban historical and political geography This edited volume explores this relationship by attempting to think critically about space and spatial categorizations Editors Tariq Jazeel and Stephen Legg ask What methodological philosophical potential does a rigorously geographical engagement with the concept of subalternity pose for geographical thought whether in historical or contemporary contexts And what types of craft are necessary for us to seek out subaltern perspectives both from the past and in the present In so doing *Subaltern Geographies* engages with the implications for and impact on disciplinary geographical thought of subaltern studies scholarship as well as the potential for such thought In the process it probes new spatial ideas and forms of learning in an attempt to bypass the spatial categorizations of methodological nationalism and Eurocentrism
