**Second International Handbook of Urban Education** William T. Pink, George W. Noblit, 2017-01-06 This second handbook offers all new content in which readers will find a thoughtful and measured interrogation of significant contemporary thinking and practice in urban education Each chapter reflects contemporary cutting edge issues in urban education as defined by their local context One important theme that runs throughout this handbook is how urban is defined and under what conditions the marginalized are served by the schools they attend Schooling continues to hold a special place both as a means to achieve social mobility and as a mechanism for supporting the economy of nations This second handbook focuses on factors such as social stratification segmentation segregation racialization urbanization class formation and maintenance and patriarchy The central concern is to explore how equity plays out for those traditionally marginalized in urban schools in different locations around the globe Researchers will find an analysis framework that will make the current practice and outcomes of urban education and their alternatives more transparent and in turn this will lead to solutions that can help improve the life options for students

historically underserved by urban schools      **International Handbook of Urban Education** William T. Pink, George W. Noblit, 2008-09-03 It is evident that urban education has become the central focus of educators at the present time In the U S for example almost one third of all school age children attend schools in large urban school districts It is in these urban schools where the diversity of cultures and languages is highest and where student learning is most problematic What has emerged from recent work to improve urban schools is the insight that there is no one size fits all panacea Rather we have discovered that the local context shapes in critically important ways what will be effective at the school level The universality of the problematics with urban education together with the importance of understanding the local or situated context of improvement interventions brings into sharp focus the importance and timeliness of an undertaking like the International Handbook of Urban Education An important focus of the International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region An important question to be answered for example is what it takes in terms of resources political will and policy actions to improve urban education      **Urban Education** Karen Symms Gallagher, Rodney Goodyear, Dominic Brewer, Robert Rueda, 2013-03-19 Many factors complicate the education of urban students Among them have been issues related to population density racial ethnic cultural and linguistic diversity poverty racism individual and institutional and funding levels Although urban educators have been addressing these issues for decades placing them under the umbrella of urban education and treating them as a specific area of practice and inquiry is relatively recent Despite the wide adoption of the term a consensus about its meaning exists at only the broadest of levels In short urban education remains an ill defined concept This comprehensive volume addresses this definitional challenge and provides a 3 part conceptual model in which the achievement of equity for all regardless of race gender or ethnicity is an ideal that is central to urban education The model also posits that effective urban education requires attention to the three central issues that confronts all education systems a accountability of individuals and the institutions in which they work b leadership which occurs in multiple ways and at multiple levels and c learning which is the raison d tre of education Just as a three legged stool would fall if any one leg were weak or missing each of these areas is essential to effective urban education and affects the others      **The Oxford Handbook of the History of Education** John L. Rury, Eileen Tamura, 2019 This handbook offers a global perspective on the historical development of educational institutions systems of schooling educational ideas and educational experiences Its 36 chapters consider the field s changing scholarship while examining particular national and regional themes and offering a comparative perspective Each also provides suggestions for further research and analysis      Encyclopedia of the Social and Cultural Foundations of Education: A-H ; 2, I-Z ; 3, Biographies, visual history, index Eugene F.
