tragic climax in the 20th century age of totalitarian extremism more recently the troubled relationship of heritage and global commercialism has become dominant Miles Glendinning's new book authoritatively presents for the first time the entire history of this architectural Conservation Movement and traces its dramatic fluctuations in ideas and popularity ending by questioning whether its recent international ascendancy can last indefinitely Alternative Visions of Post-War Reconstruction John Pendlebury, Erdem Erten, Larkham J Peter, 2014-08-19 The history of post Second World War reconstruction has recently become an important field of research around the world *Alternative Visions of Post War Reconstruction* is a provocative work that questions the orthodoxies of twentieth century design history This book provides a key critical statement on mid twentieth century urban design and city planning focused principally upon the period between the start of the Second World War to the mid sixties The various figures and currents covered here represent a largely overlooked field within the history of 20th century urbanism In this period while certain modernist practices assumed an institutional role for post war reconstruction and flourished into the mainstream such practices also faced opposition and criticism leading to the production of alternative visions and strategies Spanning from a historically informed modernism to the increasing presence of urban conservation the contributors examine these alternative approaches to the city and its architecture **Library Accessions** United States. Federal Works Agency. Library, 1942 *New Architecture and Urbanism* Saswati Chetia, Deependra Prashad, 2010-01-08 This book on *New Architecture and Urbanism* Development of Indian Traditions builds on the contributions from various architects planners educationists decision makers others from across the world who gathered together to create a forum for the promotion of traditional processes and techniques for the creation of the built environment This forum was initiated by INTBAU India The International Network for Traditional Building Architecture and Urbanism in India and supported by The Nabha Foundation This book presents the arguments axioms and case studies related to Traditional Architecture and Urbanism in a sequential format Firstly it examines the New ways of looking at Heritage by separating it from pure history into a living and evolving process The book looks at what defines traditional methods and their relevance to the contemporary context It also examines the aspects of Continuity and Contextual frameworks in the built environment The section on Sustainable Buildings Places and Communities explores the many facets of locally driven processes from the viewpoint of tradition and sustainability These include many community based planning methods and their applications in shaping the built environment aspects of environmental sustainability and on how appropriateness could be ingrained into current architectural education Lastly the book delves into a number of executed examples in architecture seeking to learn from tradition and examples in place making urbanism which in turn promotes humane walkable and connected neighbourhoods **Showpiece City** Todd Reisz, 2020-10-27 Staggering skylines and boastful architecture make Dubai famous this book traces them back to a twentieth century plan for survival In 1959 experts agreed that if Dubai was to become something more than an unruly port a plan was needed Specifically a town plan

was prescribed to fortify the city from obscurity and disorder With the proverbial handshake Dubai's ruler hired British architect John Harris to design Dubai's strategy for capturing the world's attention and then its investments Showpiece City recounts the story of how Harris and other hired professionals planned Dubai's spectacular transformation through the 1970s Drawing on exclusive interviews private archives dog eared photographs and previously overlooked government documents Todd Reisz reveals the braggadocio and persistence that sold Dubai as a profitable business plan Architecture made that plan something to behold Reisz highlights initial architectural achievements including the city's first hospital national bank and skyscraper designed as showpieces to proclaim Dubai's place on the world stage Reisz explores the overlooked history of a skyline that did not simply rise from the sands In the city's earliest modern architecture he finds the foundations of an urban survival strategy of debt wielding brinkmanship and constant pitch making Dubai became a testing ground for the global city and prefigured how urbanization now happens everywhere
