City of a Thousand Suns Samuel R. Delany, 2013-07-25 The war was over The great computer which had arranged and directed the complex military operations of that future nation was to be dismantled But the computer had become expert in the science of self defence and it resisted The government buildings were blasted Rockets rained on the great city and the Empire of Toromon the first great hope of humanity after the millennia of radiation wreckage faced disaster at the hands of a super scientific monster of its own creation But unknown even to Toromon s desperate leaders was the fact that behind the berserk computer lurked the unearthly mind of a real enemy a foe from the most distant realm of space intent on making the Earth the first victim of galactic conquest

**Chasing the Sun** Richard Cohen, 2011-08-04 The Sun is so powerful so much bigger than us that it is a terrifying subject Yet though we depend on it we take it for granted Amazingly the first book of its kind CHASING THE SUN is a cultural and scientific history of our relationship with the star that gives us life Richard Cohen applying the same mix of wide ranging reference and intimate detail that won outstanding reviews for *By the Sword* travels from the ancient Greek astronomers to modern day solar scientists from Stonehenge to Antarctica site of the solar eclipse of 2003 when penguins were said to sing Mexico s Aztecs to the Norwegian city of Tromsø where for two months of the year there is no Sun at all He introduces us to the crucial sunspot cycle in modern economics the religious dances of Indian tribesmen the histories of sundials and calendars the plight of migrating birds the latest theories of global warming and Galileo recording his discoveries in code for fear of persecution And throughout there is the rich Sun literature from the writings of Homer through Dante and Nietzsche to Keats Shelley and beyond Blindingly impressive and hugely readable this is a tour de force of narrative non fiction
