The Secret Life of Cities Helen Jarvis,Andy C. Pratt,Peter Cheng-Chong Wu,2016-07-01 Contemporary urbanisation has two faces global flows of people money and information and that of localised social and economic disparities Recent research has focused on the headlines of global cities as control centres of the world economy and social and economic shock waves that have raged through cities and regions but less attention has been paid to the secret life of cities and the changing nature of everyday life in the wake of such changes This book challenges current research and policy agendas recommending spatial concentration and relocation as a solution to the problems of environmental sustainability and social dislocation Instead this book highlights the key linkages between social and environmental problems it argues that neither are likely to be resolved with a simple spatial fix The book draws attention to local contexts of contemporary urbanisation emphasising consideration of policy making from the perspective of the household as a key unit of analysis in identifying links between labour and housing markets transport and leisure This book draws upon detailed household interviews about the daily experience of life in a global city It illustrates the dilemmas and solutions that people routinely find in order to go on in their lives It shows that these local fixes that are managed at the level of the household work in spite of and sometimes against existing policies aimed at sustainability It concludes that policy making needs to be radically overhauled in order to address the integrated nature of people s everyday lives [Understanding Shared Micromobility in China Using Massive User-Generated Trip Data](#) Yongping Zhang,2025-09-26 This book provides a data driven analysis of shared micromobility in China Both bike sharing and e bike sharing are considered and several Chinese cities e g Shanghai and Hangzhou are selected as study cases It adopts a variety of methods including GIS big data analytics social network analysis and machine learning to support the analysis The research topics cover travel characteristics of shared micromobility external impacts of shared micromobility e g the environmental and equity impacts and the relationship with 15 minute cities and the planning issues of e fences and bike lanes This book is an invaluable read for undergraduate and graduate students who are interested in urban and transport planning travel behaviour and shared micromobility It can also be used by urban geographers transport researchers and general readers interested in the area of shared micromobility in China **Smart Transportation and Green Mobility Safety** Wuhong Wang,Lisheng Jin,Haiqiu Tan,2024-05-21 This book gathers selected papers from the 13th International Conference on Green Intelligent Transportation Systems and Safety held in Qinghuadao China on September 16 18 2022 It
