**Legal Empowerment in Informal Settlements** Adrian Di Giovanni, Luciana Bercovich, 2025-06-30

This book investigates grassroots community led justice strategies known as legal empowerment being used to promote the human rights of people living in informal settlements in the Global South. Residents of informal settlements also known as slums or favelas encounter a complex array of human rights violations from systemic discrimination by public officials to threats to physical security from forced evictions or arbitrary arrests to a lack of access to basic services such as housing water sanitation and education. This book shows how grassroots justice organizations around the world are working with residents to defend their rights and secure more dignified living conditions. Drawing on original empirical research across 10 countries in Africa Asia and Latin America the book demonstrates how legal empowerment can put residents at the centre of holistic approaches to urban development and confront exclusionary and undemocratic systems of governance. The book encompasses practical recommendations and strategies such as rights based approaches to informality participation community mobilization and litigation. Bridging the gaps between the law on the books and the harsh realities of informality on the ground this book will be an important read for researchers practitioners and policymakers working in realms of social and economic rights access to justice and urban poverty and development.

Enseñar matemática, 2006 Aquí se presentan propuestas variadas para la enseñanza de la matemática en la educación infantil con sugerencias de juegos recursos y secuencias de trabajo. Se desarrollan desde la acción aquellos contenidos de la disciplina que en los marcos teóricos vigentes son considerados como los más apropiados para abordar en este nivel educativo. La antigua discusión acerca de la pertinencia o no del uso del material concreto la geometría desde edades tempranas y las secuencias didácticas para abordar contenidos son algunos de los temas desarrollados. La obra profundiza sobre el desarrollo de la clase de matemática conocimientos matemáticos previos la conformación de los grupos de trabajo las relaciones entre el abordaje de la matemática y las unidades didácticas. Se analiza la articulación entre el nivel y el primer ciclo de la educación primaria proponiendo criterios para la continuidad. No están ausentes la fuerza de lo lógico y la vivencia emocional que caracteriza a los primeros aprendizajes. Se reflexiona acerca de la evaluación de los aprendizajes significativos en el nivel inicial y se proponen ideas para llevarla adelante.

MELILLA Y LA POESÍA ESPAÑOLA DESDE 1900 HOYOS RAGEL María del Carmen, 2015-05-07 El ensayo Melilla y la poesía española desde 1900 con prólogo del catedrático de Literatura Española José Nicolás Romera Castillo aborda la relación entre literatura y ciudad en concreto la poesía y la metrópoli melillense desde comienzos del siglo pasado. Es una elaboración del espacio urbano a través de la literatura contemporánea en sentido amplio. Se estudian los poemas que definen las campañas militares de comienzos del siglo XX en esta ciudad o la presencia e importancia de las revistas literarias las antologías con este espacio urbano como protagonista y las variaciones representadas por los propios poetas nacidos en Melilla o vinculados a ella por la escritura. Ciudad y poesía como materialización de palabras que fundan una realidad letrada en el recorrido épico rico que se establece desde el comienzo del siglo pasado y se asoma a la catástrofe de la historia al abismo de la incomprendición del lugar y por supuesto a la belleza construida.
