**Modernization, Urbanization and Development in Latin America, 1900s - 2000s** Arturo Almandoz, 2014-10-10

In this book Arturo Almandoz places the major episodes of Latin America's twentieth and early twenty first century urban history within the changing relationship between industrialization and urbanization modernization and development This relationship began in the early twentieth century when industrialization and urbanization became significant in the region and ends at the beginning of the twenty first century when new tensions between liberal globalization and populist nationalism challenge development in the subcontinent much of which is still poverty stricken

Latin America's twentieth century modernization and development are closely related to nineteenth century ideals of progress and civilization and for this reason Almandoz opens with a brief review of that legacy for the different countries that are the focus of his book Mexico Chile Brazil Argentina and Venezuela but with references to others He then explores the regional distortions which resulted from the interaction between industrialization and urbanization and how the imbalance between urbanization and the productive system helps to explain why take off was not followed by the drive to maturity in Latin American countries He suggests that the close yet troublesome relationship with the United States the recurrence of dictatorships and autocratic regimes and Marxist influences in many domains are all factors that explain Latin America's stagnation and underdevelopment up to the so called lost decade of 1980s He shows how Latin America's fate changed in the late twentieth and early twenty first century when neoliberal programmes political compromise and constitutional reform dismantled the traditional model of the corporate state and centralized planning He reveals how economic growth and social improvements have been attained by politically left wing yet economically open market countries while others have resumed populism and state intervention All these trends make up the complex scenario for the new century especially when considered against the background of vibrant metropolises that are the main actors in the book

**Continental Divides: International Migration in the Americas** Katharine M. Donato, Jonathan Hiskey, Jorge Durand, Douglas S. Massey, 2010-08-10

Since Mexico U S migration represents the largest sustained migratory flow between two nations worldwide much of the theoretical and empirical work on migration has focused on this single case In the last

few decades however migration has emerged as a critical issue across all nations in Latin America and the Caribbean with the region seeing its position changed from a net migrant receiving region to one that now stands as one of the foremost sending areas of the world In this latest volume of the ANNALS leading migration scholars seek to redress the imbalance offered when only studying a single case with the first systematic assessment of Latin American migration patterns using ongoing research on the Mexican case as a basis for comparison Each chapter examines specific propositions or findings derived from the Mexican case that have not yet been tested for other Latin American or Caribbean nations Using a common framework of data methods and theories they offer a new perspective on the causes and consequences of migration in the Western Hemisphere
