The study of civil military relations in Latin America produced a rich debate and research agenda prior to 2000 But this agenda was largely abandoned during the past decade as the spectre of military dictatorship has virtually disappeared with the political role of the military in many countries dramatically diminished Indeed in no country that has initiated a process of holding the military accountable to civilian control has the military openly rebelled Yet the institutions and public attitudes that guarantee democratic civilian control of the military exist in a general context of political polarisation citizen insecurity and in many countries a sense of developing ungovernability The military coup in Honduras 2009 the military response to the police rebellion in Ecuador 2010 and the speculation concerning the Venezuelan military's behaviour in the event that Hugo Chavez is incapacitated or dies 2013 demonstrates the relevance and importance of the civil military relationship today In this volume leading scholars from Latin America the U S and Spain debate the ability of contemporary Latin American civil military relationships to weather these challenges The authors examine new types of regimes the rise of participatory democracy new political orientations the renaissance of the Left in Latin America and new missions for the military Debate centres on the indicators to evaluate the level of consolidation of civilian control the manner in which these indicators are measured and the empirical ambiguities that arise These challenges must be confronted in order to effectively address the question of how much progress has been made in the region in subordinating the military to civilian control which countries are lagging behind and why Published in association with CILAS University of California San Diego *An Incomplete Transition* Jimmy M. Phillips, 1999 *Soldiers, Politicians, and Civilians* David Pion-Berlin, Rafael Martínez, 2017-07-29

Are interactions between soldiers politicians and civilians improving Every nation has to come to grips with achieving a more enduring harmony between government the armed forces and society if it aspires to strengthen its democracy While there is an abundance of studies on civil military affairs few examine all three of these actors let alone establish any standards with which to assess whether progress is being made This ambitious book devises a novel framework equipped with six dimensions each of which opens a unique window into civil military affairs and which form a more integrated view of the subject Those dimensions are accompanied by a set of benchmarks and metrics that assess progress and compare one country against another The framework is applied to case studies of Argentina Brazil Chile and Uruguay with the conviction that insights could be gleaned that may be relevant elsewhere Ultimately by unpacking the civil military relation into its various dimensions this study has shed light on what it takes to transform what was once a politically minded military into an organization dedicated to serving a democratic state and society *For la Patria* Brian Loveman, 1999-04

A narrative history of the military's political role in Latin America in national defence and security The author contends that the military institutions in each Latin American nation have resulted from that country's own blend of local and imported

influences *The Soldier and the State in South America* P. Silva, 2001-01-19 After a long era of military rule the South American nations have been working on the construction of a new democratic order This book provides a long term historical assessment of the main features of civil military relations in this region from independence in the early nineteenth century to the current process of democratic consolidation with special attention to the cases of Argentina Brazil Chile and Peru

State and Soldier in Latin America Wendy Hunter, 1996 Recent years have given rise to an intense debate about the boundaries and appropriate missions of Latin America's armed forces This report examines the efforts of civilian leaders in Latin America to identify missions for their militaries appropriate to both the security environment of the post Cold War era and to civil military relations in a democracy and to provide ways militaries will effectively adopt these missions It also analyses the implications for democracy and civilian control of specific roles for the armed forces that are either under consideration or already underway in Argentina Brazil and Chile **For la Patria** Brian Loveman, 2004-09-08 Defending la patria or homeland is the historical mission claimed by Latin American armed forces For la Patria is a comprehensive narrative history of the military's political role in Latin America in national defense and security Latin American civil military relations and the role of the armed forces in politics like those of all modern nation states are framed by constitutional and legal norms specifying the formal relationships between the armed forces and the rest of society In actuality they are also the result of expectations attitudes values and practices evolved over centuries integral aspects of national political cultures Military institutions in each Latin American nation have resulted from that country's own blend of local and imported influences developing a distinctive pattern of civil military relations as defender of the fatherland and guarantor of security and order Written by Latin American specialist Brian Loveman For la Patria includes tables maps photographs and a glossary that will assist the student in better understanding the military's intervention in politics in Latin America This new text will give students a thorough and accessible history of Latin American armed forces and their actions in Latin American politics from colonial times to the present

Civil-Military Relations in Latin America: The Hedgehog and the Fox Revisited, 2005 This article argues for a new focus in the study of civil military relations It seeks to provide civilian policymakers with ideas and information to help them best carry out their responsibilities as democratically elected leaders Referring to knowledge of military matters as one big thing it argues that it is not necessary for policymakers to know as much about matters of defense as their military counterparts Based on the academic literature and the author's experience in Latin America and other regions this article suggests that civil military relations are best understood in terms of effectiveness efficiency and civilian control of the armed forces These relations will only be effectively normalized when institutions incorporate and personalize understanding and mechanisms of control at both executive and legislative levels *Military Power in Latin America* Walter Little, 1986 Redegrelse for status og omfang af den militære magt i Mellem og Sydamerika

The Sticking Point Rebecca K. Root, 2007 This dissertation examines change in civil military relations Many countries of Latin America and indeed the world have struggled in recent years to hold their armed forces accountable for human rights violations they have committed in the past In Latin America there has been a gradual progression towards uncovering the truth about such crimes and ultimately prosecution of members of the military for them After examining competing explanations for and discussing the pattern of that change in Argentina and Chile Peru is offered as a recent addition to the list of countries attempting to assert this authority over the armed forces While I find that the Peruvian case supports scholarship that argues that transnational activist networks should be credited with leading states to adopt and institutionalize the norm of human rights accountability over their armed forces I also find that institutional cultural and rationalist factors serve to limit the transformation of civil military relations Though transnational activist networks can often enjoy moments of powerful influence over policy making the return of the human rights accountability to the realm of normal politics and the weak institution of the judicial system present formidable obstacles to the consolidation of the rule of law
