*Civil-Military Relations, Nation-Building, and National Identity* Constantin P. Danopoulos, Dharendra K. Vajpeyi, Amir Bar'or, 2004-08-30 Contains both theoretical and substantive issues in the field of conflict and conflict resolution State Capacity Building in Contemporary China Hiroko Naito, Vida Macikenaite, 2020-03-26 This volume explores the governing mechanism employed by the Chinese Communist Party CCP in the light of state capacity building It is built on the premise that regime type notwithstanding boosting state capacity and utilizing it in their political survival is of crucial concern for any political leader Xi Jinping who is no exception to this has called for the necessity to expand state capacity while he aims to centralize the power under the party This volume stands out as it offers a comprehensive view of Chinese party state especially under Xi Jinping The research presented here is built on the analysis of authentic datasets and materials It examines the CCP's relations with various state organs in the Chinese political system mainly administrative organs legislature the people's congresses judicial branch the people's court system as well as the military the People's Liberation Army and state owned enterprises This volume attempts to bring China closer to the field of comparative politics making it a more comparable case The Power Triangle Hazem Kandil, 2016 Iran Egypt and Turkey all experienced remarkably similar coup installed regimes in the middle of the twentieth century and shared comparable state building ambitions Despite these similarities each followed a different trajectory Iran became an absolutist monarchy that was overthrown from below Turkey evolved into a limited democracy and Egypt metamorphosed into a police state What accounts for this divergence In The Power Triangle Hazem Kandil attributes the different outcomes to the power struggle between the political military and security components of each regime Following a coup officers immediately divide their labor one group runs government another supervises the military and the third handles security Their interests initially overlap but begin to vary as each group becomes identified with its own institution The politicians wish to remain in power indefinitely but need the support of the custodians of violence military officers prefer to withdraw from politics after implementing the needed reforms since their prerogatives are usually guaranteed regardless of regime type and politicization corrupts the corps and security men strive to consolidate authoritarianism in order to maintain the inflated privileges they have acquired during the emergency period following the coup Driven by conflicting agendas the three partners struggle to control the regime Through comparative historical analysis Kandil demonstrates that the new regime is shaped and reshaped through the recurrent clashes and changing alliances between the team of rivals in this power triangle Bringing realism into domestic politics The Power Triangle demonstrates that we cannot gain a clear understanding of pivotal events in Iran Egypt and Turkey without a firm grasp of the balance of power within the ruling bloc of each country The Palgrave Encyclopedia of Global Security Studies, 2023-02-15 This encyclopedia provides an authoritative guide intended for students of all levels of studies offering multidisciplinary insight and analysis of over 500 headwords covering the main concepts of Security and Non traditional

Current Transformations and their Potential Role in Realizing Change in the Arab World The Emirates Center for Strategic Studies and Research, 2007-02-05 In recent years terms and concepts like change reform modernization development political transformation and democratization have become commonplace at various national and international levels among both civil and official organizations Although audible in the past appeals for reform from within the Arab world have taken on a new dimension since the beginning of the 21st century The 2002 UNDP Arab Human Development Report sketched the first systematic structure for these demands This new drive for reform has emerged in the midst of unfavorable regional and international circumstances such as the continued Israeli occupation of Palestinian territories the occupation of Iraq by the United States and the escalation of terrorism In the face of calls for reform from both their own peoples and foreign forces Arab ruling regimes have exploited these issues to cripple or postpone the introduction of comprehensive reforms In the Arab world the influence of non governmental organizations NGOs and civil society institutions remains limited However further cultural and political development will strengthen the role of these bodies in creating a system of freedom and good governance in Arab states Recently demands by Arab societal and political forces for democracy have increased to such an extent that progressive Islamic thought has endeavored to achieve historical reconciliation with the mechanisms and values of democracy seeking for example to bring together democracy and the Islamic principle of Shura consultation Most political Islamic groups now advocate democracy but there is still some doubt as to whether these movements do so out of true conviction or are simply using the concept of democracy as a vehicle to seize power which can be discarded after serving its purpose Hence political Islamic movements must clarify their attitudes towards democracy and ultimately decide whether not to follow a democratic path It is also vital that Arab regimes refrain from intimidating internal and external forces by threatening the possibility of Islamic movements taking power if free and honest elections were to be held and by using this to justify their hindrance of democratic transformations effectively paralyzing Arab political life Modern developmental experiences and theories have clearly established a strong if not vital link between liberty and development Ultimately therefore any project to spread democracy in the Arab world must be associated with an effective process of comprehensive development

Commercializing Cosmopolitan Security Andreas Krieg, 2016-09-07 This book analyses two key topics within

international politics the responsibility to protect R2P and the commercialization and privatization of security In a world of ungoverned spaces state failure and erupting humanitarian crises the international community is increasingly called upon to exercise its responsibility to protect communities under threat Here Krieg explains the civil military dynamics behind the state's failure to effectively intervene in humanitarian crises overseas using its serviceman The central question that follows is would the private military contractor be a better alternative agent of the state in humanitarian intervention This book demonstrates that given his professional identity and role towards client state and public the contractor can be employed effectively in humanitarian intervention to generate more ethical outcomes This volume is essential reading for researchers and post graduate students of R2P International Security Studies and privatization as well as Peace and Conflict studies and International Relations more broadly

*Confucian Political Ethics* Daniel A. Bell, 2010-04-24 For much of the twentieth century Confucianism was condemned by Westerners and East Asians alike as antithetical to modernity Internationally renowned philosophers historians and social scientists argue otherwise in *Confucian Political Ethics* They show how classical Confucian theory with its emphasis on family ties self improvement education and the social good is highly relevant to the most pressing dilemmas confronting us today Drawing upon in depth cross cultural dialogues the contributors delve into the relationship of Confucian political ethics to contemporary social issues exploring Confucian perspectives on civil society government territorial boundaries and boundaries of the human body and body politic and ethical pluralism They examine how Confucianism often dismissed as backwardly patriarchal can in fact find common ground with a range of contemporary feminist values and need not hinder gender equality And they show how Confucian theories about war and peace were formulated in a context not so different from today's international system and how they can help us achieve a more peaceful global community This thought provoking volume affirms the enduring relevance of Confucian moral and political thinking and will stimulate important debate among policymakers researchers and students of politics philosophy applied ethics and East Asian studies The contributors are Daniel A Bell Joseph Chan Sin Yee Chan Chenyang Li Richard Madsen Ni Lexiong Peter Nosco Michael Nylan Henry Rosemont Jr and Lee H Yearley

**Not So Strange Bedfellows** Rob Imre, Jim Jose, 2014-08-11 At the intersection of politics and religion is a nexus of belief in doctrine and adherence to socio political cultural conventions Lines of communication and methods of belonging permeate both spheres enabling their respective participants especially the often self described true believers to bond and belong and most importantly to adhere to their various belief systems Traditionally this nexus has been approached from a standpoint that posits the idea of secularity as the governing principle The authors in this volume challenge this orthodoxy They examine a diverse range of historical and geographic locations involving markedly different religious and political movements They explore how nation states develop political religions how they actively promote a politics infused with religiosity and how they transfer symbols and meanings from one socio political construct to another Despite markedly different philosophical differences the contributors repudiate

the currently dominant orthodoxies on the relationship between religion and politics They demonstrate that secular democracy is not radically separate from religion Nation states actively participate in the construction of this nexus even as they extol their commitment to secular values In so doing they demonstrate that secularity as it is currently understood remains deeply implicated in the nexus between religion and politics in the twenty first century The Comparative Method and Civil-Military Relations J. 'Bayo Adekanye, 2024-10-11 Comprising critical writings in civil military relations theory and research this book of essays integrates the ideas and insights drawn from political science particularly its subfields of comparative politics theory and methodology both normative and empirical with those from the combined disciplines of philosophy of science history sociology and development studies bringing out the relevance of these ideas and insights for understanding and analysing the issues central to the place and role of military in the Nigerian society This book will be useful to students academics journalists and activists working on Nigeria in particular and Africa in general Print edition not for sale in Nigeria **Muslim Women of Power** Clinton Bennett, 2010-12-30 An exploration of powerful Muslim women covering issues of gender culture and politics in Islam Water Resource Conflicts and International Security Dharendra K. Bruneau, Florina Cristiana Matei, 2013 The Routledge Handbook of Civil Military Relations not only fills this important lacuna but offers an up to date comparative analysis which identifies three essential components in civil military relations 1 democratic civilian control 2 operational effectiveness and 3 the efficiency of the security institutions This Handbook will be essential reading for students and practitioners in the fields of civil military relations **Beyond Liberal Democracy** Daniel A. Bell, 2009-01-10 Is liberal democracy appropriate for East Asia In this provocative book Daniel Bell argues for morally legitimate alternatives to Western style liberal democracy in the region Beyond Liberal Democracy which continues the author s influential earlier work is divided into three parts that correspond to the three main hallmarks of liberal democracy human rights democracy and capitalism These features have been modified substantially during their transmission to East Asian societies that have been shaped by nonliberal practices and values Bell points to the dangers of implementing Western style models and proposes alternative justifications and practices that may be more appropriate for East Asian societies If human rights democracy and capitalism are to take root and produce beneficial outcomes in East Asia Bell argues they must be adjusted to

contemporary East Asian political and economic realities and to the values of nonliberal East Asian political traditions such as Confucianism and Legalism Local knowledge is therefore essential for realistic and morally informed contributions to debates on political reform in the region as well as for mutual learning and enrichment of political theories Beyond Liberal Democracy is indispensable reading for students and scholars of political theory Asian studies and human rights as well as anyone concerned about China's political and economic future and how Western governments and organizations should engage with China

**Sino-Pakistani Relations** Filippo Boni, 2019-08-08 This book analyses the relationship between Pakistan and China in the post 9/11 period against the backdrop of Pakistan's domestic politics and proposes that the major source of continuity in the ties between the two countries is represented by the military The evolution and continuity of Sino-Pakistani relations are explored through three timely case studies the port of Gwadar where Chinese investment well pre-dates the advent of the Belt and Road Initiative the China-Pakistan Economic Corridor the flagship project of China's global ambitions and how the relationship between China and Pakistan has played out in Afghanistan The book assesses the extent of military influence in Pakistan's relations with China throughout the last 20 years in several key decision-making areas ranging from internal security to elite recruitment By looking at the extent of military prerogatives in Pakistan's domestic politics the book reveals how the major source of continuity in the ties between the two countries was represented by the role that the military has played overtime While since the announcement of the BRI elected representatives have gained some leverage in decision-making the military has invariably been the main port of call even under a civilian dispensation A novel approach to the study of Sino-Pakistani relations this book will be of interest to academics working on South Asian Politics Chinese Politics and International Relations Sino-Pakistani relations civil-military ties and China's role in Asia including the One Belt One Road initiative
