Thomas,1988-05-27 A study of the realities of nuclear power using as its basis a detailed evaluation of the programmes in the USA Canada France and the Federal Republic of Germany The book also examines the questions of economic and technological performance of nuclear power      *Review of Regional Economic Research and Planning on New England* New England Economic Research Foundation,United States. Congress. House. Committee on Science and Technology. almost absolute faith in peaceful atoms and in the boundless almost cost free energy that atoms would soon produce Goldie 1997 p 21 But as the eminent economist Frank Hahn recalled the only failing Cockcroft had was that he wasn't up to much in economics Indeed Hahn recalled that he had to explain to Cockcroft the economic notion of optimum durability as it related to the interest rate in the context of building Churchill College with hand made bricks After his explanation as Hahn recalled Cockcroft smiled and proceeded to order more hand made bricks Hahn 1997 p 27 *Atomic Fuel* John F.
