Civilization And Society In The West:

Middle Eastern Societies and the West Meir Litvak, 2006 For many Middle Eastern Muslims the West came to personify the ultimate other occupying a space that was simultaneously appealing intimidating and often abhorrent The multilayered ambivalent interaction between Middle Eastern societies and the West has been a major theme in the history of this region for the past two centuries The al Qaeda terrorist attack against the United States on September 11 2001 the 2003 U S invasion of Iraq and Israel's war against Hizbullah in the summer of 2006 have made the in depth study of this interaction more critically important than ever Taking the concepts of the Middle East and the West into account as useful analytical categories the various articles in this volume examine and analyze a broad spectrum of Middle Eastern encounters and attitudes toward the West This collection provides a fuller understanding of the complexities involved in both the historical and contemporary relationship between Middle Eastern societies and the West **Ancient West Asian**

Civilization Akira Tsuneki, Shigeo Yamada, Ken-ichiro Hisada, 2016-08-19 This book explores aspects of the ancient civilization in West Asia which has had a great impact on modern human society agriculture metallurgy cities writing regional states and monotheism all of which appeared first in West Asia during the tenth to first millennia BC The editors specifically use the term West Asia since the Middle East is seen as an Eurocentric term By using this term the book hopes to mitigate potential bias i.e. historical and Western by using a pure geographical term However the West Asia region is identical to that of the narrower Middle East which encompasses modern Iran and Turkey from east to west and Turkey and the Arabian Peninsula from north to south This volume assembles research from different disciplines such as the natural sciences archaeology and philology linguistics in order to tackle the question of which circumstances and processes these significant cultural phenomena occurred in West Asia Scrutinizing subjects such as the relations between climate geology and human activities the origins of wheat cultivation and animal domestication the development of metallurgy the birth of urbanization and writing ancient religious traditions as well as the treatment of cultural heritage the book undertakes a comprehensive analysis of West Asian Civilization that provided the common background to cultures in various areas of the globe including Europe and Asia These contributions will attempt to demonstrate a fresh vision which emphasizes the common cultural origin between Europe and West Asia standing in opposition to the global antagonism symbolized by the theory of Clash of Civilizations **Civilization, Nation and Modernity in East Asia** Chih-Yu Shih, 2012-06-25 This book

explores the crisis of cultural identity which has assaulted Asian countries since Western countries began to have a profound impact on Asia in the nineteenth century Confronted by Western civilization and by modernity Asian countries have been compelled to rethink their identity and to consider how they should relate to Western civilization and modernity The result the author argues has been a redefining by Asian countries of their own character as nations and an adaptation of civilization and modernity to their own special conditions Asian nations the author contends have thereby engaged with the West and

with modernity but on their own terms occasionally and in various inconsistent ways in which they could assert a sense of difference forcing changes in the Western concept of civilization Drawing on postmodern theory the Kyoto School Confucian and other traditional Asian thought and the actual experiences of Asian countries especially China and Japan the author demonstrates that Asian countries redefining of the concept of civilization in the course of their quest for an appropriate postmodern national identity is every bit as key a part of the rise of Asia as economic growth or greater international political activity

Against Wind and Tide Ousmane K Power-Greene, 2014-09-05 How and why free blacks resisted relocation to Liberia A fine contribution to the story of African colonization movements in early American history The Journal of American History Against Wind and Tide tells the story of African Americans battle against the American Colonization Society ACS founded in 1816 with the intention to return free blacks to its colony Liberia Although ACS members considered free black colonization in Africa a benevolent enterprise most black leaders rejected the ACS fearing that the organization sought forced removal As Ousmane K Power Greene's story shows these African American anticolonizationists did not believe Liberia would ever be a true black American homeland In this study of anticolonization agitation Power Greene draws on

newspapers meeting minutes and letters to explore the concerted effort on the part of nineteenth century black activists community leaders and spokespersons to challenge the American Colonization Society's attempt to make colonization of free blacks federal policy The ACS insisted the plan embodied empowerment The United States they argued would never accept free blacks as citizens and the only solution to the status of free blacks was to create an autonomous nation that would fundamentally reject racism at its core But the activists and reformers on the opposite side believed that the colonization movement was itself deeply racist and in fact one of the greatest obstacles for African Americans to gain citizenship in the United States Power Greene synthesizes debates about colonization and emigration situating this complex and enduring issue into an ever broader conversation about nation building and identity formation in the Atlantic world
