Civilization Capitalism 15th 18th 3vol:

Phenomenology and Intercultural Understanding Kwok-Ying Lau, 2016-09-29 This book approaches the topic of intercultural understanding in philosophy from a phenomenological perspective. It provides a bridge between Western and Eastern philosophy through in-depth discussion of concepts and doctrines of phenomenology and ancient and contemporary Chinese philosophy. Phenomenological readings of Daoist and Buddhist philosophies are provided; the reader will find a study of theoretical and methodological issues and innovative readings of traditional Chinese and Indian philosophies from the phenomenological perspective. The author uses a descriptive rigor to avoid cultural prejudices and provides a non-Eurocentric conception and practice of philosophy. Through this East-West comparative study, a compelling criticism of a Eurocentric conception of philosophy emerges. New concepts and methods in intercultural philosophy are proposed through these chapters. Researchers, teachers, postgraduates, and students of philosophy will all find this work intriguing, and those with an interest in non-Western philosophy or phenomenology will find it particularly engaging.

Capitalism Richard Smalbach, 2014-07-15 Capitalism is first and foremost an economic system that prizes free and competitive markets, private ownership, and a comparatively small role for government intervention and regulation. Yet capitalism also has many political undertones and has become associated with notions of freedom, individualism, self-determination, and anti-unionism. As a political and economic philosophy, it was a major player in the Cold War, squaring off against communism and seemingly triumphing. The colorful history of this economic system that doubles as a political philosophy is recounted here from Medieval era experiments in agrarian capitalism and mercantilism to the 21st-century digital economy and bitcoins. This is a fascinating and provocative read and an immersive journey through the political and economic history of the modern world.

The Emergence of Modern Europe Kelly Roscoe, 2017-07-15 The sixteenth century in Europe was a period of vigorous economic expansion that led to social, political, religious, and cultural transformations and established the early modern age. This resource explores the emergence of monarchical nation-states and early Western capitalism during this period. Also examined in depth are the Protestant Reformation and the Counter Reformation, which exacerbated tensions between states and contributed to the Thirty Years War, 1618-1648. Readers will come to understand how these events developed, how they led to the age of exploration, and how they inform modern European history.

First Among Abbots Elizabeth Dachowski, 2008-02 Abbo of Fleury was a prominent churchman of late tenth century France abbot of a major monastery leader in the revival of learning in France and England and the subject of a serious work of hagiography Elizabeth Dachowski's study presents a coherent picture of this multifaceted man with an emphasis on his political alliances and the political considerations that colored his earliest biographical treatment Unlike previous studies Dachowski's book examines the entire career of Abbo not just his role as abbot of Fleury When viewed as a whole Abbo's life demonstrates his devotion to the cause of pressing for monastic prerogatives in a climate of political change Abbo's career vividly illustrates how the early Capetian kings and the French monastic communities began the symbiotic relationship that replaced the earlier Carolingian models Despite a stormy beginning Abbo had by the time of his death developed a mutually beneficial working relationship with the Capetian kings and had used papal prerogatives to give the abbey of Fleury a preeminent place among reformed monasteries of northern France Thus the monks of Fleury had strong incentives for portraying the early years of Abbo's abbacy as relatively free from conflict with the monarchy Previous lives of Abbo have largely followed the view put forward by his first biographer Aimoinus of Fleury who wrote the *Vita sancti Abbonis* within a decade of Abbo's death While Aimoinus clearly understood Abbo's goals and the importance of his accomplishment he also had several other agendas including a glossing over of earlier and later conflicts at Fleury and validation of an even closer and more subservient relationship with the Capetian monarchs under Abbo's successor Gaulzin of Fleury Abbo's achievements set the stage for the continuing prosperity and influence of Fleury but at the expense of Fleury's independence from the monarchy With Abbo's death the monastery's relationship with the French crown grew even closer though Fleury continued to maintain its independence from the episcopacy

Economic Transformations Richard G. Lipsey, Kenneth I. Carlaw, Clifford T. Beker, 2005-11-03 This book examines the long term

economic growth that has raised the West's material living standards to levels undreamed of by counterparts in any previous time or place. The authors argue that this growth has been driven by technological revolutions that have periodically transformed the West's economic, social, and political landscape over the last 10 000 years and allowed the West to become, until recently, the world's only dominant technological force. Unique in the diversity of the analytical techniques used, the book begins with a discussion of the causes and consequences of economic growth and technological change. The authors argue that long-term economic growth is largely driven by pervasive technologies now known as General Purpose GPTs. They establish an alternative to the standard growth models that use an aggregate production function and then introduce the concept of GPTs, complete with a study of how these technologies have transformed the West since the Neolithic Agricultural Revolution. Early modern science is given more importance than in most other treatments, and the 19th-century demographic revolution is studied with a combination of formal models of population dynamics and historical analysis. The authors argue that once sustained growth was established in the West, formal models can shed much light on its subsequent behaviour. They build non-conventional dynamic non-stationary equilibrium models of GPT-driven growth that incorporate a range of phenomena that their historical studies show to be important but which are excluded from other GPT models in the interests of analytical tractability. The book concludes with a study of the policy implications that follow from their unique approach.
