Civilization & Science in Conflict Or Collaboration? Ciba Foundation,1972 **Civilization and Science in Conflict Or Collaboration?** ,1972 *Civilization & Science in Conflict Or Collaboration?* Gordon E. W. Wolstenholme,Maeve O'Connor,1972 Civilization and Science G. E. W. Wolstenholme,Maeve O'Connor,2009-09-16 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world *Civilization & science in conflict or collaboration?* ,1972 *Science and Civilisation in China: Volume 7, The Social Background, Part 2, General Conclusions and Reflections* Joseph Needham,2004-07-22 It would be difficult to overstate the importance of Joseph Needham s Science and Civilisation in China series For nearly fifty years Needham and his collaborators have revealed the ideals concepts and achievements of China s scientific and technological traditions from the earliest times to about 1800 through this great enterprise During his long working lifetime Needham kept in draft various essays some written with collaborators in which he set out his broad views on the Chinese social and historical context These essays edited by one of his closest collaborators Kenneth Robinson are contained in the present volume A reading of this material makes it possible to reconstruct the assumptions and problematics that underpinned and drove the Needham project throughout the nearly one half century during which he was at the helm The documents gathered here reveal the intellectual foundations of one of the greatest scholarly enterprises of the twentieth century *Civilization and Science, in Conflict Or Collaboration. a Ciba Foundation Symposium, London, 1971* Ciba Foundation,1972 CIVILIZATION AND SCIENCE IN CONFLICT OR COLLABORATION- SYMPOSIUM- PAPERS- CIBA FOUNDATION. , **Current Catalog** National Library of Medicine (U.S.),1979 First multi year cumulation covers six years 1965 70 **The Socio-Intellectual Foundations of Malek Bennabi's Approach to Civilization** Badrane Benlahcene,2011-01-01 Since the publication of Samuel Huntington s The Clash of Civilizations concern about civilization has been reintroduced into the debate on the world order Malek Bennabi 1905 1973 prominent Algerian thinker and great Muslim intellectual intently focused on unraveling the causes of Muslim decline and the success of Western civilization and culture The key problem he theorized lay not in the Qur an or Islamic faith but in Muslims themselves The author investigates Bennabi s approach to civilization and the fundamental principles drawn using metatheorizing methodology In doing so he sheds further light on perhaps one of the more intriguing elements of Bennabi s theory that civilization is governed by internal external and social intellectual factors and that an equation can be generated for civilization itself This equation of Man Soil Time Civilization and of which religion according to Bennabi forms the all important catalyst is explained and its significance in terms of the reversal of Muslim decline evaluated What is clearly apparent is that for Bennabi Man is the central force in any civilizing process and without him the other two

elements are of no value With regard to outcomes Bennabi's unerring conviction that unless Muslims changed their spiritual condition they could not affect any far reaching meaningful change in society is echoed in the Qur'anic verse Verily never will Allah change the condition of a people until they change what is in themselves 13 11 **Civilization and Science: in**

Conflict Or Collaboration?, 1973 *Science under Fire* Andrew Jewett, 2020-12-08 Americans have long been suspicious of experts and elites This new history explains why so many have believed that science has the power to corrupt American culture Americans today are often skeptical of scientific authority Many conservatives dismiss climate change and Darwinism as liberal fictions arguing that tenured radicals have coopted the sciences and other disciplines Some progressives especially in the universities worry that science's celebration of objectivity and neutrality masks its attachment to Eurocentric and patriarchal values As we grapple with the implications of climate change and revolutions in fields from biotechnology to robotics to computing it is crucial to understand how scientific authority functions and where it has run up against political and cultural barriers *Science under Fire* reconstructs a century of battles over the cultural implications of science in the United States Andrew Jewett reveals a persistent current of criticism which maintains that scientists have injected faulty social philosophies into the nation's bloodstream under the cover of neutrality This charge of corruption has taken many forms and appeared among critics with a wide range of social political and theological views but common to all is the argument that an ideologically compromised science has produced an array of social ills Jewett shows that this suspicion of science has been a major force in American politics and culture by tracking its development varied expressions and potent consequences since the 1920s Looking at today's battles over science Jewett argues that citizens and leaders must steer a course between on the one hand the naive image of science as a pristine value neutral form of knowledge and on the other the assumption that scientists' claims are merely ideologies masquerading as truths *Cumulated Index Medicus*, 1973
