**Bodies of Pain** Scott E. Pincikowski, 2013-12-16 This study provides a much needed re evaluation of the role of pain and suffering in Hartmann von Aue By critically and carefully combining traditional philology with modern theoretical analysis drawing on theorists such as Mary Douglas Michele Foucault Norbert Elias and Elaine Scarry the author shows how the body is symbolically structured in Hartmann s work to create a distinctly medieval signification system of pain This system is analysed through an examination of the physical body and social body of the court and the harmonious and refined image of courtly society as depicted in Hartmann s work where it is shown that the very ideological system that informs courtly life causes suffering in both the physical and social bodies

**The civilized body** Michael Martin, 2010-12-21 Studienarbeit aus dem Jahr 2010 im Fachbereich Anglistik Kultur und Landeskunde Universit t Potsdam Sprache Deutsch Abstract When talking about civilized behavior a whole set of associations opens up immediately We can talk eat walk act and even dress ourselves in a civilized manner But what does civilization actually mean Are human beings who according to a natural scientific worldview are actually nothing but mammals really capable of civilized behavior An average citizen from a western civilization would probably approve of a

general distinction between civilized and uncivilized The concept of civilization has undergone a massive change It is now more than just an artificial concept constructed by sociologists and philosophers In the modern world of today being or acting civilized does not only entail social norms inside a certain group of people The concept of civilization has also become a powerful weapon on the political and cultural battlefields of the 21st century Most of the time the self control of bodily behavior and spontaneous bodily expressions is one of the most important challenges of a human being living in the modern age It is so important that it has become a central characteristic of humanity in contrast to other animals that usually do not control their behavior for constructed social reasons On the other hand the processes that are involved in controlling and interpreting the actions of the body are barely noticed they have become so internalized that we don't even recognize them anymore Especially in the western world meaning is often transported through separation I am civilized because you are not civilized and so forth Interestingly the control of certain modes of behavior like in the case of eating personal hygiene or social manners in general has not always been a natural course of action
